A follow up to Chess for Children, this is a very imaginative way of building up your children's knowledge and interest in chess through a series of fun chess games and activities. The same two cheeky children, Jess and Jamie, talk through the games in language that kids would relate to - and this time they are joined by their friends Harry and Marnie so that group chess games can be explored. The book includes puzzles and games, some easy 'variants' of chess, and a guess-the-next move section, along with 'revision' pages to help remind children of the chess basics. All are accompanied by easy-to-read chess boards and fun illustrations. Chess in schools and clubs is growing all the time and our author is a leading light in kids chess, teaching at many London schools, including Dulwich College. The book works well as a companion to the earlier book, Chess for Children, but also as a standalone activity book. Whether your child is just beginning to learn chess or already immersed in the subject, this book will help encourage their interest and love of the subject. A great book for both parents and teachers. Suitable for children aged 7 and up.

Endgame specialist John Nunn has drawn upon his decades of experience to present the ideas that are most important in real games. Step by step he helps you uncover the key points and then add further vital knowledge. Chess Endgame Workbook for Kids is the third in a new series of books that help players gain chess skills by solving hundreds of carefully chosen exercises. The themes are similar to those in Gambit's best-selling 'Chess for Kids' series, but the focus is on getting hands-on experience. Many positions build on ones given earlier, showing how advanced ideas are normally made up of simpler ones that we can all grasp. Each chapter deals with a particular type of endgame and features dozens of exercises, with solutions that highlight the key points. For each endgame we are given tips on the themes that are most important and the strategies for both sides. The book ends with a series of test papers that enable you to assess your progress and identify the areas that need further work. Dr John Nunn is one of the best-respected figures in world chess. He was among the world's leading grandmasters for nearly twenty years and won four gold medals in chess Olympiads. In 2004, 2007 and 2010, Nunn was crowned World Chess Solving Champion, ahead of many former champions.

Amazing Chess for Children

This accessible how-to guide for parents and teachers on the best way to teach chess to children, from international chess expert Richard James, is linked to both his bestselling book, Chess for Kids, and his website chessKIDS academy. James, who taught grandmasters Luke McShane and Jonathan Rowson, shows how learning chess is interesting and fun. It can also help children develop life skills, such as decision-making and social skills, and be a springboard to other subjects in the school curriculum, such as maths, science, history and even languages. In an easy-to-follow, fun way, James explains how to structure short lessons with worksheets and other activities to introduce the chess pieces, chess notation and chess-board dynamics - so that children can understand the thinking behind the moves and start playing and enjoying this fascinating game.

Long, long ago when kings ruled the land, dragons filled the sky and magic still existed, two children stumbled upon the game of chess. This is your chance to play it with them . . . Packed with interactive puzzles and games, join Pip and Holly on a magical fairy-tale adventure and become a chess master.

Whether in the car, waiting at the airport, on the train or by the poolside, the colourful pages will keep children amused for hours - whatever the weather. Puzzle answers and solutions are given at the back of the book

Chess is experiencing a new wave of popularity in schools, and it's educational too. Organisations like Chess in Schools are promoting it as the perfect way to develop analytical thinking skills, foster the competitive instinct and provide a lot of fun along the way. This cute, character-based book, aimed at children aged 7 and up, is a complete guide to chess for those starting out in the game. In straightforward, animated language, Jess and Jamie – two rough-and-tumble kids who are obsessed with chess – explain everything you need to know, from first sitting down at the board to sneaky tricks to help you beat your opponents. The book explains who the pieces are and how they move (and that we're talking about pawns, not prawns), how to reach checkmate (or, in Jess's words, 'how to kill the king'), and the concept of the opening, middlegame and endgame. It also introduces the idea of chess etiquette - and explains why: sometimes no one wins and a game ends in stalemate. Friendlier and more fun than the average children's chess book, *The Batsford Book of Chess for Children* should become an essential addition to any child's bookshelf.

This is a book for those who want to start their chess games purposefully and take full advantage of their opponents' mistakes. It is vital to start a chess game well. Each move needs to be useful and precise. The best way to develop the necessary know-how is by experience and practice, rather than rote learning of 'rules' and principles. It's all about the specifics and being alert to what the opponent is doing, and pouncing on any errors. Chess Opening Workbook for Kids is the second in a new series of books that help players gain chess skills by tackling hundreds of carefully chosen exercises. The themes are similar to those in Gambit's best-selling 'Chess for Kids' series, but the focus is on getting hands-on experience. Each chapter is focused on a particular theme and features dozens of exercises, with solutions that highlight the main strategic and tactical points. Each chapter offers tips on opening play, such as how to detect weaknesses and poorly-placed pieces. Later chapters address key aspects of opening strategy such as the centre, development and castling. The book ends with a series of seven graded tests where you are given few clues about the themes involved. Award-winning author Graham Burgess has written 27 chess books, including two on opening play for the 'Chess for Kids' series. He is a FIDE Master and a former champion of the Danish region of Funen. In 1994 he set a world record for marathon blitz chess playing and won the British Chess Federation Book of the Year Award in 1997.

Most chess games are decided in the endgame. It is here where you reap the reward for your good play, or else use all your cunning to deny the opponent victory. Knowing just a few key endgame techniques will dramatically increase your confidence, as you will understand what positions to aim for and which to avoid. Starting with the basic mates and the simplest pawn endings, this book provides all the endgame knowledge that players need to take them through to club level and beyond. Muller carefully guides us step-by-step through a fascinating range of endgame tactics and manoeuvres, helping us understand the underlying logic. Throughout the book, many cunning endgame tricks are highlighted. You will have fun springing them on friends, family - or your opponents in serious tournaments. Chess Endgames for Kids makes learning chess endgames fun. But it is also a serious endgame course written by a leading endgame expert, and provides a firm basis for vital skills that will develop throughout your chess career. German grandmaster Karsten Muller is arguably the world's foremost writer on chess endgames. Whenever an interesting endgame occurs in a high-level game, the chess world knows that it will soon be dissected and explained by Muller. Whether writing for a low-level or high-level audience, his infectious zeal for the endgame shines through. His 'masterwork', Fundamental Chess Endings (co-authored with Frank Lamprecht, and also published by Gambit) is a modern endgame 'bible' and was studied intensively in his youth by current World Champion Magnus Carlsen.
