China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

This study makes northeast Asia the focus of analysis on how the nuclear crisis in 2002-2006 affected strategic thinking.

While all those in the Six-Party Talks are included, the author explores in particular debates about the standoff in four countries on the front lines (South Korea, China, Japan, and

China's rise to global economic and strategic eminence, with the potential for achieving pre-eminence in the greater-Asian region, is one of the defining characteristics of the post-Cold War period. This work offers a basic understanding of the military-strategic basis and trajectory of a rising China, provides background, and outlines current and future issues concerning China's rise in strategic-military influence. The next decade may witness China's assertion of military or strategic pressure on Japan, the Korean Peninsula, India, the South China Sea, the Taiwan Strait, Central Asia, or even on behalf of future allies in Africa and Latin America. While conflict is not a foregone conclusion, as indicated by China's increasing participation in many benign international organizations, it is a

fact that China's leadership will pursue its interests as it sees them, which may not always coincide with those of the United States, its friends, and allies. Until now, no single volume has existed that provides an authoritative, comprehensive, and concise description of China's evolving geo-strategy or of how China is transforming its military to carry out this strategy. Fisher examines how China's People's Liberation Army (PLA) remains critical to the existence of the Chinese Communist government and looks at China's political and military actions designed to protect its expanded strategic interests in both the Asia-Pacific and Central to Near-Asian regions. Using open sources, including over a decade of unique interview sources, Fisher documents China's efforts to build a larger nuclear force that may soon be protected by missile defenses, modern

high technology systems for space, air, and naval forces, and how China is now beginning to assemble naval, air, and ground forces for future power projection missions. His work also examines how the United States and other governments simultaneously seek greater engagement with China on strategic concerns, while hedging against its rising power. Although China faces both internal and external constraints on its rise to global eminence, it cannot be denied that China's government is pursuing a far-reaching strategic agenda. At a time when Chinese policy makers appear to be rethinking China's historically close alliance relationship with North Korea, this volume gathers a diverse collection of original essays by some of China's leading experts on North Korea and China's North Korea policy.

development of the region in the context of a US "Pivot to Asia." The four countries on the northern fringe of Asia went their separate ways after the end of the Cold War, but strengthening Sino-Russian relations and what may be the looming endgame in North Korea's strategy of threats and isolation are signs that we now need to think about this area also through its connections. Looking back to what existed in an earlier incarnation of the Northern Tier and focusing on Chinese and Russian views of North Korea, we are able to explore the implications of increasingly close Sino-Russian relations. The book will be of

great value to scholars, policymakers, and all passionate about exploring what's next for Russia and China's relationship.

The behind-the-scenes story of the rise and reign of the world's strangest and most elusive tyrant, Kim Jong Un, by the journalist with the best connections and insights into the bizarrely dangerous world of North Korea. Since his birth in 1984, Kim Jong Un has been swaddled in myth and propaganda, from the plainly silly -- he could supposedly drive a car at the age of three -- to the grimly bloody stories of family members who perished at his command. Anna Fifield

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

reconstructs Kim's past and present with exclusive access to sources near him and brings her unique understanding to explain the dynastic mission of the Kim family in North Korea. The archaic notion of despotic family rule matches the almost medieval hardship the country has suffered under the Kims. Few people thought that a young, untested, unhealthy, Swiss-educated basketball fanatic could hold together a country that should have fallen apart years ago. But Kim Jong Un has not just survived, he has thrived, abetted by the approval of Donald Trump and diplomacy's weirdest bromance. Skeptical yet

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China

International Relations And Comparisons In Northeast Asia

Insightful, Fifield creates a captivating portrait of the oddest and most secretive political regime in the world -- one that is isolated yet internationally relevant, bankrupt yet in possession of nuclear weapons -- and its ruler, the self-proclaimed Beloved and Respected Leader, Kim Jong Un. In the 21st century, with China's rise and the United States(U.S.)' relative decline, the U.S.-China relationship together with strategic environment in Northeast Asia is changing. China is expanding its influence from Northeast Asia to Southeast Asia and Central Asia. As a result, China is forming a new type of 'check and

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China

International Relations And Comparisons In Northeast Asia

balance,' and 'cooperation and conflict' with the U.S. in Southeast Asia and Russia in Central Asia. Such changes in China's foreign relations policy and strategy as well as the strategic environment in Northeast Asia will have a higher possibility of influencing the unification on the Korean Peninsula. Therefore, it is necessary to precisely analyze the international situation surrounding the Korean Peninsula and to examine China's foreign relations with countries in Northeast Asia, Central Asia and Southeast Asia. This research provides the analysis of China's external relations policy in these three regions to understand the

International circumstances surrounding the Korean Peninsula. The research aims to form the basis for the future unification diplomatic strategy. The first part of this book explains China's major diplomatic relationships towards four East Asian countries: Japan, Russia, North Korea, and Taiwan. This chapter particularly provides a keen analysis of developments of each relationship and discusses how China initiates its diplomatic strategy and embodies its four major diplomatic relationships. Next part analyzes China's aggressive foreign policy in Central Asia. This part suggests that China's active policies

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

towards Central Asian countries during the past decade is due to the increased importance of the region to China for the following aspects: national security, geopolitical location, energy and market. Considering the aforementioned factors, China's enhanced influence in the region and intensified relations with the neighboring countries are mainly examined. The last part explores Southeast Asia's foreign policy in the context of the rise of the G2 rivalry, focusing on Cambodia, Vietnam, and Myanmar. This part emphasizes the importance of Southeast Asia for the U.S. and China from a geopolitical perspective. Then, it

This book explores China's approach to the nuclear programs in Pakistan, Iran, and North Korea. A major power with access to nuclear technology, China has a significant impact on international nuclear weapons proliferation, but its attitude towards the spread of the bomb has been inconsistent. China's mixed record raises a broader question: why, when and how do states support potential nuclear proliferators? This book

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China

International Relations And Comparisons In Northeast Asia

develops a framework for analyzing such questions, by putting forth three factors that are likely to determine a state's policy: (1) the risk of changes in the nuclear status or military doctrines of competitors; (2) the recipient's status and strategic value; and (3) the extent of pressure from third parties to halt nuclear assistance. It then demonstrates how these factors help explain China's policies towards Pakistan, Iran, and North Korea. Overall, the book finds that China has been a selective and strategic supporter of nuclear proliferators. While nuclear proliferation is a security challenge to China in some settings, in others, it wants to help its friends build the bomb. This book will be of much interest to students of international security, nuclear proliferation, Chinese

North Korea is perilously close to developing strategic nuclear weapons capable of hitting the United States and its East Asian allies. Since their first nuclear test in 2006, North Korea has struggled to perfect the required delivery systems. Kim Jong-un's regime now appears to be close, however. Sung Chull Kim, Michael D. Cohen, and the volume contributors contend that the time to prevent North Korea from achieving this capability is virtually over; scholars and policymakers must turn their attention to how to deter a nuclear North Korea. The United States, South Korea, and Japan must also come

**to terms with the fact that North Korea will be able to deter them with its nuclear arsenal. How will the erratic Kim Jong-un behave when North Korea develops the capability to hit medium- and long-range targets with nuclear weapons? How will and should the United States, South Korea, Japan, and China respond, and what will this mean for regional stability in the short term and long term? The international group of authors in this volume address these questions and offer a timely analysis of the consequences of an operational North Korean nuclear capability for international security. A Debate on Engagement Strategies

Chinese Perspectives Towards the Korean Peninsula in the Aftermath of North Korea's Fourth Nuclear Test

Pyongyang's adventurism during 2010 such as the Yeoncheon shelling has further complicated the already strained Sino-DPRK relations, despite closer interaction between the two countries. The biggest challenge to Beijing was to shake the foundation of China's DPRK policy, defined as maintaining the status

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

quo by crisis aversion, with the emphasis on ad hoc guidance for immediate crisis management. Chinese analysts criticized Beijing's lack of an effective overarching strategy toward Pyongyang. Clearly its current approach of accommodation vis-à-vis Kim Jong-Il may not be sustainable. This principle not only symbolizes Beijing's buffer zone mentality concerning the North's regime survival but also its difficulty in finding any feasible substitute. Beijing does see the high costs of continued support for an

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

unpredictable neighbor. North Korea's actions in 2010, arguably in response to the South's increasingly hard-line attitude against Pyongyang, translated North/South confrontation into unnecessary Sino-US tension, much to Beijing's anger. China's 'neutrality' made it look the odd man out in Northeast Asia. But its biggest dilemma is that the fallout of a sudden collapse of the DPRK may be worse to its overall security environment than the propping up of Kim Jong-Il. Therefore, it has to stick to its current DPRK

The Korea Institute for National Unification (KINU) is working on a four-year project (2010-2013) on the subject of Korean unification. The objective of this project is to propose a grand plan for Korean unification. The Unification Forum series is one of the tasks of this project. Last year the purpose of the forums was to review the positions of neighboring countries on Korean unification. The result of the forums has been compiled into a book titled Korean Unification and the

Against the backdrop of China's mounting influence and North Korea's growing nuclear capability and expanding missile arsenal, South Korea faces a set of strategic choices that will shape its economic prospects and national security. In *South Korea at the Crossroads*, Scott A. Snyder examines the trajectory of fifty years of South Korean foreign policy and offers predictions—and a prescription—for the future. Pairing a historical perspective with a shrewd understanding of today's political landscape, Snyder contends that South Korea's best strategy remains investing in a robust alliance with the United States. Snyder begins with South Korea's effort in the 1960s to offset the risk of abandonment by

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

the United States during the Vietnam War and the subsequent crisis in the alliance during the 1970s. A series of shifts in South Korean foreign relations followed: the "Nordpolitik" engagement with the Soviet Union and China at the end of the Cold War; Kim Dae Jung's "Sunshine Policy," designed to bring North Korea into the international community; "trustpolitik," which sought to foster diplomacy with North Korea and Japan; and changes in South Korea's relationship with the United States. Despite its rise as a leader in international financial, development, and climate-change forums, South Korea will likely still require the commitment of the United States to guarantee its security. Although China is

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

a tempting option, Snyder argues that only the United States is both credible and capable in this role. South Korea remains vulnerable relative to other regional powers in northeast Asia despite its rising profile as a middle power, and it must balance the contradiction of desirable autonomy and necessary alliance.

Two important papers by the U.S. Army's Strategic Studies Institute provide unique insights into the problems posed by North Korea: Criminal Sovereignty: Understanding North Korea's Illicit International Activities, and Understanding the North Korea Problem: Why it has Become the "Land of Lousy Options". Topics covered include: Kim Jong-il slush funds, Macao,

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

Principle of Juche, Office #39, Drug Trafficking, Counterfeit Currency and Cigarettes, Taepo Dong missile, nuclear weapons, regional interests (China, Japan, Russia, South Korea). The "Land of Lousy Options": This monograph is intended to draw attention to the challenges faced by the United States in developing a coordinated strategy for dealing with North Korea. Despite the many decades of direct U.S. involvement on the Korean Peninsula, we continue to have little understanding of the North Korean culture or of events inside North Korea. We also do not have a long-term coordinated strategy for North Korea. Over the past decade, the United States has focused much of its

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

attention on the Middle East and the War on Terror, and seems to only focus on North Korea in response to crises when they arise on the peninsula. The author provides a timely analysis and thoughtful insights into the significant challenges faced by the United States in developing a strategy for North Korea. He examines the complex history of U.S. policy toward North Korea over the past decade that has left the United States in a position of having no real strategy and virtually no influence over North Korea. Criminal Sovereignty: The authors of this monograph have exposed a key piece of the puzzle which helps to provide a better understanding of North Korea's surreptitious international behavior. For

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

years, North Korea's military provocations have been obvious to the world, however, much of its decisionmaking is shrouded in secrecy, particularly that of a wide-range of clandestine activities. This monograph is unique in the way that it sheds light on the illicit activities of the regime, and how those illegal activities are used to support its military programs and the government itself. From drug trafficking to counterfeiting, from money laundering to cigarette smuggling, North Korea's Central Committee Bureau 39 is an active participant in the criminal economy of the region with tentacles extending well beyond Asia. The authors discuss how these activities have negative strategic

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

consequences for a number of stakeholders and nations throughout the region while describing how such activities provide critical funding streams for military programs and regime supporters. In addition to the two North Korean documents, this unique collection of American military documents provides a special view of recent Chinese military and policy developments.

Victor D. Cha and David C. Kang's Nuclear North Korea was first published in 2003 amid the outbreak of a lasting crisis over the North Korean nuclear program. It promptly became a landmark of an ongoing debate in academic and policy circles about whether to engage or contain North Korea. Fifteen years later, as North Korea tests intercontinental ballistic missiles and the U.S. president angrily refers to Kim Jong-un as "Rocket Man," Nuclear North Korea remains an essential guide to the difficult choices we face. Coming from different perspectives—Kang believes the threat posed by Pyongyang has been inflated and endorses a more

open approach, while Cha is more skeptical and advocates harsher measures, though both believe that some form of engagement is necessary—the authors together present authoritative analysis of one of the world’s thorniest challenges. They refute a number of misconceptions and challenge the faulty thinking that surrounds the discussion of North Korea, particularly the idea that North Korea is an irrational actor. Cha and Kang look at the implications of a nuclear North Korea, assess recent and current approaches to sanctions and engagement, and provide a functional framework for constructive policy. With a new chapter on the way

The relationship between China and North Korea surely ranks as one of world's strangest. While on the surface, it might not seem surprising to have a formal military alliance between two communist neighbors that has endured more than 4 decades. After all, their armed forces fought shoulder-to-shoulder in the Korean War 50 years ago. However, Beijing's ties to Pyongyang have weakened considerably over time, and China now has much better and stronger relations with the free market democracy of South Korea than it does with the totalitarian, centrally planned economy of North Korea. In many ways Pyongyang has become a Cold War relic, strategic liability, and monumental headache for Beijing. Nevertheless, the China-North Korea alliance remains formally in effect, and

Beijing continues to provide vital supplies of food and fuel to the brutal and repressive Pyongyang regime.

On the Korean peninsula, there exist two sovereign states—the Republic of Korea (ROK or South Korea) and the Democratic People's Republic of Korea (DPRK or North Korea)—both of whom hold separate membership at the United Nations. This book discusses the construction of "one Korea" and highlights the potential benefits of unification for the Koreans and the international community. Arguing that Korean unification is intrinsically international in nature, the authors outline how the process and outcome would impact upon the policies of the four major powers—the U.S., China, Russia, and Japan. In addition, the authors highlight the possible far-reaching

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

repercussions of unification on the political and economic dynamics of Northeast Asia. Making a case for the two Koreas and interested powers to plan and orchestrate their acts for sustained peace and gradual unification on the Korean peninsula, this book examines the Korean question and the related issue of peace building in Northeast Asia from a global perspective. It will be of interest to students and scholars researching politics and international relations.

This book re-visits the history of the Korean War of 1950-1953 from a Chinese perspective, examining Chinese strategy and exploring why China sent three million troops to Korea, in Mao's words, to "defend the homeland and safeguard the country"—giving rise to what became the war's common name

Read Book China And North Korea Strategic And Policy Perspectives From A Changing China International Relations And Comparisons In Northeast Asia

in China. It also looks into the relatively neglected historical factors which have redefined China's security concerns and strategic culture. Using newly available sources from China and the former Soviet Union, the book considers how interactive the parameters of defense changes were in a foreign war against Western powers, how flexible Chinese strategy was in the context of its intervention, and how expansive its strategic cultural repertoire was at the crucial moment to "defend the country." Providing a re-examination of China's military decisions and strategy evolution, this text narrates the story of successive generations of Chinese leaders and provides a key insight into security issues in China and Northeast Asia today. Reordering Chinese Priorities on the Korean Peninsula

authors suggest an alternative strategy for promoting peace and security in the Korean peninsula different from the ones contemplated or implemented by Washington in recent years.

To understand China's foreign policy in the 1990s and the true attitude of Beijing towards the military presence of the United States in Northeast Asia, one must examine China's perception of the alliance between the United States and the Republic of Korea (ROK). Public statements aside, the People's Republic of China (PRC) has shifted its traditional position and has tacitly accepted, even welcomed, the continuation of the U.S.-ROK alliance. Beijing views the institutionalized presence of the Americans in Northeast Asia as a

stabilizing force, serving China's interest of maintaining the favorable status quo in the region. However, continued acceptance is not guaranteed; developments in the Sino-American relationship and the course of reunification of the Korean Peninsula will affect attitudes in the future. In order to discuss China's perception of the U.S. Korean alliance, let us first examine China's general post-Cold War security policy, especially regarding Northeast Asia. As the century ends, Beijing, increasingly preoccupied with its own domestic agenda, has adopted a more conservative attitude (nearterm) in Northeast Asia. In the post-Cold War era, international competition has shifted from the political and military to the economic arena. In this new mileau, Beijing displays

a changed, even ambivalent, attitude towards the United States' political and military presence in Northeast Asia. American ground forces in Japan and South Korea and U.S. naval presence in the Western Pacific have now generally disappeared from China's list of complaints. Indeed, the United States is frequently regarded as a stabilizing force in the region, although Beijing watches carefully Washington's "hegemonic" moves. The future of the political division on the Korean Peninsula is naturally of key importance to China's perception of the U.S.-ROK alliance. One can hardly observe much eagerness on China's part for a rapid reunification of Korea, although Beijing is somewhat sincere in supporting the idea of letting the Koreans themselves

control the reunification process. To Beijing, a stable, peaceful and (hopefully) friendly, but perhaps divided, Korean Peninsula is more desirable than rapid reunification or a de-nuclearization of North Korea. Finally, as a result of China's overall security considerations, Beijing now appears to have quietly accepted the U.S.-ROK alliance as a part of the favorable status quo in Northeast Asia. Continued tacit acceptance, however, is not guaranteed. From the Chinese perspective, there seems to be an inherent conflict between a united Korea and a strong Korean- American alliance; if a united Korea maintains an alliance with the United States, Beijing may have to make a sharp policy shift. The key variables affecting China's perception of

the U.S.-ROK alliance in the future, therefore, seem to be the overall Sino-American relationship and the development of the inter-Korean relationship.

Developing a new approach to exploring security relations between China and North Korea, this timely book examines China's contradictory statements and actions through the lens of developmental peace. It highlights the differences between their close relationship on the one hand, and China's votes in favour of sanctions against North Korea on the other, examining the background to this and its importance.
