The images in this textbook are in grayscale. There is a color version available - search for ISBN 9781680922370. Psychology is designed to meet scope and sequence requirements for the single-semester introduction to psychology course. The book offers a comprehensive treatment of core concepts, grounded in both classic studies and current and emerging research. The text also includes coverage of the DSM-5 in examinations of psychological disorders. Psychology incorporates discussions that reflect the diversity within the discipline, as well as the diversity of cultures and communities across the globe.

We live in a time of unprecedented planetary ecocrisis, one that poses the serious and ongoing threat of mass extinction. Drawing upon a range of theoretical influences, this book offers the foundations of a philosophy of ecopedagogy for the global north. In so doing, it poses challenges to today's dominant ecoliteracy paradigms and programs, such as education for sustainable development, while theorizing the needed reconstruction of critical pedagogy itself in light of our presently disastrous ecological conditions.

*Reservoir Stimulation Third edition Michael J. Economides University of Houston, USA Kenneth G. Nolte Schlumberger Technology Corporation, USA More than 13 years ago, the first edition of Reservoir Stimulation was published. The second edition followed in 1989 and contained substantial additions, updates and two new chapters. Planning for the third edition began in October 1994 in response to the demand for an updated version of the book. This new edition has been completely rewritten to reflect the changing technologies in the industry and contains 20 chapters written by 44 authors. It continues to provide an overview of reservoir stimulation from an all-encompassing engineering standpoint, an overview currently unavailable elsewhere. Reservoir Stimulation sets forth a rationalisation of stimulation using reservoir engineering concepts, and addresses topics such as formation characterisation, hydraulic fracturing and matrix acidizing. Formation damage, which refers to a loss in reservoir productivity, is also examined comprehensively. This extensive reference work remains essential reading for petroleum industry professionals involved in the important activities of reservoir evaluation, development and management, who require invaluable skills in the application of the techniques described for the successful exploitation of oil and gas reservoirs. Contributors to this volume are among the most recognized authorities in their individual technologies. The editors are grateful for their participation and thank clients, academic institutions and other organizations for supporting the completion of this text.*

Philippe Bénilan was a most original and charismatic mathematician who had a deep and decisive impact on the theory of Nonlinear Evolution Equations. Dedicated to him, Nonlinear Evolution Equations and Related Topics contains research papers written by highly distinguished mathematicians. They are all related to Philippe Benilan's work and reflect the present state of this most active field. The contributions

cover a wide range of nonlinear and linear equations.

Vols. for 1970-71 includes manufacturers' catalogs.

Official Monthly Publication of the Petroleum Branch, American Institute of Mining and Metallurgical Engineers

**The Harvard Law Review, April 2015, is offered in a digital edition. Contents include the annual Developments in the Law survey of a particular area of legal concern; this year's topic is Policing. Other contents include: • Article, "Consent Procedures and American Federalism," by Bridget Fahey • Essay, "Anticipatory Remedies for Takings," by Thomas W. Merrill • Book Review, "How a 'Lawless' China Made Modern America: An Epic Told in Orientalism," by Carol G.S. Tan Specific subjects studied in Developments in the Law—Policing are: Policing and Profit, Policing Students, Policing Immigrant Communities, and Considering Police Body Cameras. In addition, the issue features student commentary on Recent Cases, including such subjects as: the business judgment rule and mergers; whistleblowing under Dodd-Frank and extraterritoriality; senate redistricting in New York; postmortem rights of publicity; standing and overlap of various tests used; informing one who pleads No Contest of collateral consequences; exceptions to New York marriage license requirement for out-of-state marriages; exclusionary rule for violations of Posse Comitatus restrictions; and extending federal forced labor statute to conduct criminalized under state law. Finally, the issue features several summaries of Recent Publications. The Harvard Law Review is a student-run organization whose primary purpose is to publish a journal of legal scholarship. The Review comes out monthly from November through June and has roughly 2500 pages per volume. The organization is formally independent of the Harvard Law School. Student editors make all editorial and organizational decisions. This issue of the Review is Apr. 2015, the 6th issue of academic year 2014-2015 (Volume 128). The digital edition features active Contents, linked notes, and proper ebook and Bluebook formatting.**

**Car bombing, suicide bombing, abduction, smuggling, homicide, and hijacking are all profoundly criminal acts. In Terrorism as Crime Mark S. Hamm presents an understanding of terrorism from a criminological point of view, arguing that the most successful way to understand, detect, prosecute and deter these acts is to use conventional criminal investigation methods. Whether in Oklahoma City or London, Terrorism as Crime demonstrates that criminal activity is the lifeblood of terrorist groups and that there are simple common denominators at work that can remove the mystery surrounding many of these terrorist groups. Once understood the vulnerabilities of these organizations can be exposed. This important volume focuses in on six case studies of crimes committed by jihad and domestic right wing groups, including biographies of more than two dozen terrorists along with descriptions of their organizations, strategies, and terrorist plots. Terrorism as Crime offers an original and significant framework for explaining international and domestic terrorism, as well as how future acts might be detected or exposed.**

**The only one-stop resource of every medical supplier licensed to sell products in the US. This edition offers immediate access to over 13,000 companies-and more than 65,000 products - in two information-packed volumes. This comprehensive resource saves hours of time and trouble when searching for medical equipment and supplies and the manufacturers who provide them. Volume 1: The Product Directory, provides essential information for purchasing or specifying medical supplies for every medical device, supply, and diagnostic available in the US. Listings provide FDA codes & Federal Procurement Eligibility, Contact information for every manufacturer of the product along with Prices and Product Specifications. Volume 2: Supplier Profiles, offers the most complete and important data about Suppliers, Manufacturers and Distributors. Company Profiles detail the number of employees, ownership, method of distribution, sales volume, net income, key executives, detailed contact information, the medical products the company supplies, plus the medical specialties they cover. Four indexes provide immediate access to this wealth of information: Keyword Index, Trade Name Index, Supplier Geographical Index and OEM (Original Equipment Manufacturer) Index. Medical Device Register is the only one-stop source for locating suppliers and products; looking for new manufacturers or hard-to-find medical devices; comparing products and companies; knowing who's selling what and who to buy from cost effectively. This directory has become the standard in its field and will be a welcome addition to the reference collection of any medical library, large public library, university library, along with the collections that serve the medical community.**

**This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.**

*In the past decade, CRRT has moved from a niche therapy within specific specialty centers to the standard of care for management of critically ill patients with acute renal failure. Continuous Renal Replacement Therapy provides concise, evidence-based, to-the-point bedside guidance about this treatment modality, offering quick reference answers to clinicians' questions about treatments and situations encountered in daily practice. Organized into sections on Theory; Practice; Special Situations; and Organizational Issues, Continuous Renal Replacement Therapy provides a complete view of CRRT theory and practice. Generous tables summarize and highlight key points, and key studies and trials are listed in each chapter.*

*Until now, anyone conducting industrial combustion tests had to either rely on old methods, go scurrying through the literature to find proven applicable methodologies, or hire top-shelf consultants such as those that work for cutting-edge companies like John Zink. Manufacturers can no longer take industrial combustion for granted. Air and noise po*
