A Guide to Intra-state Wars

Regulatory Affairs in the Pharmaceutical Industry is a comprehensive reference that compiles all the information available pertaining to regulatory procedures currently followed by the pharmaceutical industry. Designed to impart advanced knowledge and skills required to learn the various concepts of regulatory affairs, the content covers new drugs, generic drugs and their development, regulatory filings in different countries, different phases of clinical trials, and the submission of regulatory documents like IND (Investigational New Drug), NDA (New Drug Application) and ANDA (Abbreviated New Drug Application). Chapters cover documentation in the pharmaceutical industry, generic drug development, code of Federal Regulation (CFR), the ANDA regulatory approval process, the process and documentation for US registration of foreign drugs, the regulation of combination products and medical devices, the CTD and ECTD formats, and much more. Updated reference on drug approval processes in key global markets Provides comprehensive coverage of concepts and regulatory affairs Presents a concise compilation of the regulatory requirements of different countries Introduces the fundamentals of manufacturing controls and their regulatory importance

This study presents options to fully unlock the world’s vast solar PV potential over the period until 2050. It builds on IRENA’s global roadmap to scale up renewables and meet climate goals.

Here is a definitive introduction to liberation theology through the life and work of its most significant proponent, Gustavo Gutierrez. Robert McAfee Brown draws extensively on Gutierrez’s own writings (some never published in English) and on personal conversations with him. Brown clearly and compellingly presents the basics of liberation theology and the differences between North American and Latin American theologies. The form of Gustavo Gutierrez is that of a drama. Brown’s initial “program notes” introduce and situate the “author,” the “actors,” the “critics.” He sets the stage with a history of church and state in Latin America and introduces its definitive figures, themes, and milestones. A collective biography of Gutierrez’s spiritual predecessors is followed by a biography of Gutierrez himself, which takes critical account of his works. Then we are ready, dramatically and theologically, to move to the first act: that of commitment to the poor. The second act, in two scenes, explores first liberation theology’s method of critical reflection on praxis and also its content: nothing less than the Word of God. Brown delves next into the controversies and criticisms Gutierrez faces, especially the challenges from authorities in Rome. Finally, in act three, readers discover that in this particular drama, they too are “on stage” and must take part by reflecting on what this drama really means for them.

*Homology Effects offers contributions from an international panel of researchers whose aim has been both to introduce newcomers to the field of homology effects, and to bring colleagues up to date. Topic coverage includes dosage compensation, X-inactivation, paramutation, homology-dependent gene silencing, transvection, pairing-sensitive silencing, nuclear organization of chromosomes, DNA repair, quelling, RIP, RNAi and antisense biology, homology effects in ciliates, prion biology, and a discourse on the evolution of gene duplications. Advances in Genetics presents an eclectic mix of articles of use to all human and molecular geneticists. They are written and edited by recognized leaders in the field and make this an essential series of books for anyone in the genetics field. Homology, the examination of similarity due to shared common ancestry, encompasses a fascinating class of phenomena in mammals, plants, insects, ciliates, nematodes, fungi, and bacteria. Homology effects concern processes that recognize homology at the level of DNA and/or RNA, as well as at the level of protein. Their collective history begins at the turn of the century and includes some of the most puzzling and extraordinary observations in biology. The volume covers phenomena that have often been considered unusual, exceptional to the rule, and "out of the ordinary" and, therefore, not for general study. However, it is now becoming clear that taken together, these phenomena represent a class of regulatory mechanisms that are widespread, as well as exceptionally powerful. The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.*

*This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2020 and 2021. Produced by the Department of Economic and Social Affairs, the five United Nations regional commissions, the United Nations Conference on Trade and Development, with contributions from the UN World Tourism Organization and other intergovernmental agencies.*

Written with undergraduate and postgraduate students in mind, this second edition provides new perspectives on the meaning of marketing. Delineating the basic principles of Relationship Marketing (RM) and Customer Relationship Management (CRM), this reference offers guidelines for planning and implementing CRM strategy. It argues that companies should move away from marketing to anonymous masses and toward developing and managing relationships with identifiable customers and stakeholders.

The effectiveness of sanctions cannot purely be measured by the way they change the behaviour of their intended target. The degree to which sanctions constrain a rogue state’s behaviour and the signals they send to future targets should also be prime considerations. In this thought provoking book Francesco Giuelli measures the true effectiveness of EU sanctions against a range of states including Belarus, Zimbabwe, Moldova, Uzbekistan, the USA and China. He demonstrates that focussing purely on behavioural change is limiting, especially when considering the actions and motivations of an international organisation, and develops a process to evaluate the direct and indirect impact of EU sanctions. Giuelli demonstrates the many different ways sanctions have been used by the EU to produce positive direct and indirect results and provides a multi-level framework to assess the success of sanctions in the future.

Swahili Grammar and Workbook provides a practical and comprehensive companion to Swahili grammar, filling in gaps left by other textbooks. Presenting the essentials of Swahili grammar in a highly accessible fashion, it reduces complex language topics to helpful rules and mnemonic aids, enabling maximum grammar retention and accurate usage. Grammar points are followed by multiple examples and exercises, allowing students to consolidate and practice their learning. No prior knowledge of linguistic terminology is required. Key features include: Twenty five language notes covering key topics such as: personal pronouns; the Swahili noun class system; special class combinations; the imperative, the subjunctive, and the conditional moods; the use of comparatives; the use of monosyllabic verbs; the passive form and various other forms of verb extensions; the relative clause Clear, detailed and jargon-free grammatical explanations supported by an assortment of helpful diagrams, charts and tables and many relevant and up-to-date examples A wide range of communication-oriented exercises to reinforce learning and develop students’ ability to use Swahili actively Audio files to support pronunciation practice, clearly linked to relevant sections of the book and available for free download at http://www.routledge.com/books/details/9781138808263/ Four appendices, Swahili-English and English-Swahili vocabulary lists, a bibliography and an index presented at the back of the book for easy access to information.

Written by a highly experienced instructor, Swahili Grammar and Workbook will be an essential resource for all students and teachers of Swahili. It is suitable for use both as a companion reference text in language courses and as a standalone text in independent grammar classes.

Aquaponics is the integration of aquaculture and soilless culture in a closed production system. This manual details aquaponics for small-scale production—predominantly for home use. It is divided into nine chapters and seven annexes, with each chapter dedicated to an individual module of aquaponics. The target audience for this manual is agriculture extension agents, regional fisheries officers, non-governmental organizations, community organizers, government ministers, companies and singles worldwide. The intention is to bring a general understanding of aquaponics to people who previously may have only known about one aspect.

Exploring Education for Digital Librarians provides a refreshing perspective on the discipline and profession of Library and Information Science (LIS), with a focus on preparing students for careers as librarians who can deal with present and future digital information environments. A re-examination of the knowledge base of the field, combined with a proposed theoretical structure for LIS, provide the basis for this work, which also examines competencies for practice as well as some of the international changes in the nature of higher education. The authors finally suggest a model that could be used internationally to educate librarians for their new roles and social responsibilities in a digitised, networked world. The twelve chapters of this book cover key issues in education for digital librarians, including: the necessity of regenerating the profession; current contexts; previous research on education for digital librarians; understanding the dimensions of the discipline and profession of librarianship; and the distinctions between them; the social purpose of librarianship as a profession and the theoretical framework which supports the practice of the profession; a brief analysis of curriculum design, pedagogies and teaching methods, and a glimpse of the proactive and important future role of librarianship in society. Considers the ubiquitous misunderstanding that technology can replace libraries and librarians Provides a theoretical view of the field which can contribute awareness of dimensions of the dilemmas which the discipline/profession currently faces Presents a broad international perspective which provides a basis for a new model for LIS education

This book explains what actuaries are, what they do, and where they do it. It describes the ideas, techniques, and skills involved in the day-to-day work of actuaries. This second edition has been updated to reflect the rise of social networking and the internet, the progress toward a global knowledge-based economy, and the global expansion of the actuarial field that has occurred since the first edition. -from publisher description

What is innovation and how should it be measured? Understanding the scale of innovation activities, the characteristics of innovative firms and the internal and systemic factors that can influence innovation is a prerequisite for the pursuit and analysis of policies aimed at fostering innovation.

Catholic High School Entrance Exams is a comprehensive guide that provides expert advice, practical tips, and a lot of practice, giving eighth graders the study tools and reassurance they need to achieve a high score on their Catholic high school entrance exam. Included in Catholic High School Entrance Exams: \* 6 full-length practice tests—2 for each exam commonly administered—the Cooperative Entrance Examination (COOP), the High School Placement Test (HSPT), and Test for Admission into Catholic High Schools (TACHS) \* Plus 3 diagnostic quizzes: 1 for each exam, with targeted feedback \* Targeted review of key concepts and material found on tests with practice quizzes \* Up-to-date test information \* For Parents: tips to help your child maintain realistic expectations while studying for the exam Catholic High School Entrance Exams provides students the essentials they need to improve their scores—guaranteed. Kaplan’s Higher Score guarantee provides security that no other test prep guide on the market can match.

Over the past two decades, the fields of linguistic anthropology and sociolinguistics have complicated traditional understandings of the relationship between language and identity. But while research traditions that explore the linguistic complexities of gender and sexuality have long been established, the study of race as a linguistic issue has only emerged recently. The Oxford Handbook of Language and Race positions issues of race as central to language-based scholarship. In twenty-one chapters divided into four sections-Foundations and Formations; Coloniality and Migration; Embodiment and Intersectionality; and Racism and Representations-authors at the forefront of this rapidly expanding field present state-of-the-art research and establish future directions of research. Covering a range of sites from around the world, the handbook offers theoretical, reflexive takes on language and race, the larger histories and systems that influence these concepts, the bodies that enact and experience them, and the expressions and outcomes that emerge as a result. As the study of language and race continues to take on a growing importance across anthropology, communication studies, cultural studies, education, linguistics, literature, psychology, ethnic studies, sociology, and the academy as a whole, this volume represents a timely, much-needed effort to focus these fields on both the central role that language plays in racialization and on the enduring relevance of race and racism.

An Introduction to Liberation Theology

The Chartered Secretary

**Sourcing data and analyses from the rigorous Correlates of War Project, A Guide to Intra-state Wars describes how civil war is defined and categorized and presents data and descriptions for nearly 300 civil wars waged from 1816 to 2014. Analyzing trends over time and regions, this work is the definitive source for understanding the phenomenon of civil war, bringing together an explanation of the theoretical premises driving the Correlates of War Project, along with revisions to categories of, and actors in, civil wars that have been made over the years, and data from the Nations, States and Entities civil war dataset. Features: Provides detailed case studies of nearly 300 civil wars from 1816 to 2014. Combines the systematic study of war with analyses of trends over time and regions. Includes discussion of the different types of actors in international relations and presents data from the Nations, States, and Entities dataset. Considers data describing non-state participants (rebels) in civil wars.**
