Unstoppable is a word defined as "difficult or impossible to preclude or stop." As a human quality, it is something that we associate with people such as sports superstars, those who do whatever it takes to inspire others and lead teams to the greatest of victories. Sometimes, an idea or person can become unstoppable. Unstoppable, like Charles Lindbergh crossing the Atlantic in a solo flight when no one had thought it was possible, or track star Roger Bannister breaking the four-minute mile barrier. Not everyone can be an explorer or a great athlete, but anyone can be unstoppable in their chosen endeavors in life. If you are willing to possess an unwavering determination to succeed and a consistent willingness to learn and evolve, you can become unstoppable and triumph too. This book is about a personal struggle, one in which the author awoke from a coma after a terrible accident and faced a life of permanent paralysis. A long battle of driven determination resulted in Yannik Raz and becoming a self-made millionaire after migrating from his native Israel to the United States. Through careers as a musician, a Starbucks barista, a salesman, a real estate whiz, a professional poker player and a hard money lender, Yannik learned reliable principles and the skills necessary for success. Unstoppable covers many topics including controlling your life, making the best decisions, creating new opportunities, properly assessing signals, expertly negotiating, and succeeding by staying true across the media landscape. You'll learn about integrity in business, asset diversification, and many other life tips that thousands of people learn from Yannik on a daily basis. It is time to become fearless and lead a powerful life. With Yannik's new book Unstoppable, you can do just that.

Humorist Jerry Zezina has always had an empty head. Now that his two daughters have flown the coop, he and his wife have an empty nest. The girls aren't completely out of the house, of course, because a lot of their stuff is still there. Written with warmth and hilarity, "The Empty Nest Chronicles" is sure to appeal to parents who miss their kids but now have a chance to rediscover each other, to recall what life was like BC (Before Children), and to ask the eternal empty-nest question: Are we having fun yet? Praise for "The Empty Nest Chronicles" * "The Empty Nest Chronicles" is brimming with laughs." -- Bill Geist, "CBS News Sunday Morning" correspondent "Reading 'The Empty Nest Chronicles' is like having a hilarious conversation with the nicest guy you'll ever meet. Self-deprecating, gentle, and really funny." -- W. Bruce Cameron, New York Times bestselling author of "8 Simple Rules for Dating My Teenage Daughter," "A Dog's Purpose," and "A Dog's Journey" Les journées de cuivres anciens (Early Brass Days), the Historic Brass Society conference at the Cité de la Musique in Paris, attracted performers, scholars, educators, and students of early brass from various parts of Europe and the United States. Brass Scholarship in Review provides a record of the scholarly side of the conference, including reports on roundtable discussions as well as individual papers from leading authorities on early brass. Articles cover a wide range of interests, from the historical to the technical, from the Renaissance to the twentieth century. There are articles on such diverse topics as early hunting horn signals, trumpeters in Renaissance Parma, early recordings, and trumpet acoustics, and the characteristics of metals used in early instrument manufacture. The volume is particularly rich in nineteenth-century topics, including ground-breaking work on Adolph Sax as leader of the banda of the Paris Opéra and recent discoveries relating to the Gautrot firm of instrument makers.

Rapid growth of geodetic information provided by the Global Positioning System (GPS) and stringent requirements for a precise geoid in ocean areas for ocean circulation models have spurred interest in geoid studies. As a result, the International Geoid Commission was formed to provide a focus for this important geoid research. Determination of the Geoid: Present and Future is the result of the first meeting of the Commission, held at the Istituto di Topografia, Fotogrammetria e Geofisica at the Politecnico di Milano, June 1990. Six major topics are presented: Global Geopotential Models: Present and Future; Role of Topography in Geoid Computations; the Geoid and the Global Positioning System; the State of Computation of National or Regional Geoids; Software and Data Improvements for Geoid Computations; and Recent Developments in the GEOMED (Determination of the Geoid in the Mediterranean) Project.

Constraint programming aims at supporting a wide range of complex applications, which are often modeled naturally in terms of constraints. Early work, in the 1960s and 1970s, made use of constraints in computer graphics, user interfaces, and artificial intelligence. Such work introduced a declarative component in otherwise-procedural systems to reduce the development effort.

In the last decade, due to factors of ICT infrastructural and broadband maturation, rising levels of educational attainment and computer literacy, and diversification strategies, e-learning has exploded in the Middle East and North Africa (MENA) region. However, significant barriers remain in the region's e-learning development: lack of research on outcomes and effectiveness, paucity of Arabic language learning objects, monopolies and high cost of telecommunications, cultural taboos, accreditation, censorship, and teacher training. This unique volume is the first comprehensive effort to describe the history, development, and current state of e-learning in each of the 20 MENA countries from Algeria to Yemen. Each entry is expertly written by a specialist who is acutely familiar with the state of e-learning in their respective country, and concludes with a bibliography of key reports, peer-reviewed books and articles, and web resources. E-Learning in the Middle East and North Africa (MENA) proves itself as a vital compendium for a wide readership that includes academics and students, transnational program directors, international education experts, MENA government departments, commercial vendors and investors, and ICT development and regulatory agencies involved in e-learning in the Middle East.

In The Implosion of Capitalism world-renowned political economist Samir Amin connects the key events of our times - financial crisis, Eurozone implosion, the emerging BRIC nations and the rise of political Islam - identifying them as symptoms of a profound systemic crisis.In light of these major crises and tensions, Amin updates and modifies the classical definitions of social classes, political parties, social movements and ideology. In doing so he exposes the reality of monopoly capitalism in its contemporary global form.In a bravura conclusion, Amin argues that the current capitalist system is not viable and that implosion is unavoidable. The Implosion of Capitalism makes clear the stark choices facing humanity - and the urgent need for a more humane global order.
