

## Civil Air Patrol Billy Mitchell Study Guide

Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries.

The USAir Force human capital management (HCM) system is not easily defined or mapped. It affects virtually every part of the Air Force because workforce policies, procedures, and processes impact all offices and organizations that include Airmen and responsibilities and relationships change regularly. To ensure the readiness of Airmen to fulfill the mission of the Air Force, strategic approaches are developed and issued through guidance and actions of the Office of the Deputy Chief of Staff for Manpower, Personnel and Services and the Office of the Assistant Secretary of the Air Force for Manpower and Reserve Affairs. Strengthening US Air Force Human Capital Management assesses and strengthens the various U.S. Air Force initiatives and programs working to improve person-job match and human capital management in coordinated support of optimal mission capability. This report considers the opportunities and challenges associated with related interests and needs across the USAF HCM system as a whole, and makes recommendations to inform improvements to USAF personnel selection and classification and other critical system components across career trajectories. Strengthening US Air Force Human Capital Management offers the Air Force a strategic approach, across a connected HCM system, to develop 21st century human capital capabilities essential for the success of 21st century Airmen.

Fighting the Flying Circus

A Flight Plan for 2020-2030

Aerospace power in the twenty-first century a basic primer

This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations, but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

This book, A Higher PLane: Redefining Your Civil Air Patrol Squadron, was designed to help you redefine your squadron through evaluating where it is now, deciding where you want it to be, determining how to get there, and making it the best squadron it can be. The authors have spent many years making CAP squadrons better. Here they share their secrets with you. All profits are donated to CAP programs.

American Airpower Comes of Age–General Henry H. “Hap” Arnold’s World War II Diaries Vol. II [Illustrated Edition]

Recruiter Journal

*Dr. Shane Somers is a 28 year old physicist and engineer who develops a new form of telecommunications based on Albert Einstein's theory of Quantum Entanglement. His new invention makes the fastest internet connection look like the Pony Express by comparison and could be worth hundreds of billions of dollars if brought to market. Meanwhile, China's top secret agent is determined to acquire the technology for Mr. Chu, the ruthless owner of Chu Industries, a network of over-sized factories in China known for their disregard of the environment and inhumane treatment of its employees.Magnus Gunnarsson, Shane's long time best friend and former high school rival, pays Shane a visit after not seeing him for several years. Magnus informs him that he now works for TAG, an organization that doesn't officially exist, but has the mission of countering international corporate espionage while also acquiring new forms of technology for the United States in the name of national security.It is now up to Shane and Magnus, reunited best friends, to track down China's super spy and reclaim the technology before it's too late. But the infamous spy has a few tricks up his sleeve that neither of them see coming. Despite the odds stacked against them, they must succeed... America's economy and global dominance hang in the balance.*

*Includes the Aerial Warfare in Europe During World War II illustrations pack with over 180 maps, plans, and photos. Gen Henry H. "Hap." Arnold, US Army Air Forces (AAF) Chief of Staff during World War II, maintained diaries for his several journeys to various meetings and conferences throughout the conflict. Volume 1 introduces Hap Arnold, the setting for five of his journeys, the diaries he kept, and evaluations of those journeys and their consequences. General Arnold's travels brought him into strategy meetings and personal conversations with virtually all leaders of Allied forces as well as many AAF troops around the world. He recorded his impressions, feelings, and expectations in his diaries. Maj Gen John W. Huston, USAF, retired, has captured the essence of Henry H. Hap Arnold—the man, the officer, the AAF chief, and his mission. Volume 2 encompasses General Arnold's final seven journeys and the diaries he kept therein.*

Defending Air Bases in an Age of Insurgency

*Billy Frank Jr. was an early participant in the fight for tribal fishing rights during the 1960s. Roughed up, belittled, and handcuffed on the riverbank, he emerged as one of the most influential Northwest Indians in modern history. His efforts helped bring about the 1974 ruling by Federal Judge George H. Boldt affirming Northwest tribal fishing rights and allocating half the harvestable catch to them. Today, he continues to support Indian country and people by working to protect salmon and restore the environment. Where the Salmon Run tells the life story of Billy Frank Jr., from his father's influential tales, through the difficult and contentious days of the Fish Wars, to today. Based on extensive interviews with Billy, his family, close advisors, as well as political allies and former foes, and the holdings of Washington State's cultural institutions, we learn about the man behind the legend, and the people who helped him along the way.*

*"Military historian and Civil Air Patrol (CAP) member Frank A. Blazich Jr. collects oral and written histories of the CAP's short-lived--but influential--coastal air patrol operations of World War II and expands it in a scholarly monograph that cements the legacy of this vital civil-military cooperative effort"--*

"An Honorable Place in American Air Power" Civil Air Patrol Coastal Patrol Operations, 1942-1943

U.S. Air Services

*A powerful rogue faction that was formed during the days of the Tiananmen Square demonstrations, the Shadows of Fire, has infiltrated the Chinese military. Their intent is to take over the leadership of China and make it the supreme global superpower. In a bold move the faction leader, Colonel Kim, decides he must take on the United States first in order to establish his ultimate power. He devises a plan to assassinate the Chinese President as he is on his way to visit the President of the United States in Washington DC. He is confident that he can make the assassination appear to be the work of the U.S. Air Force escort pilots. The assassination will set the stage for the faction to move forward with their plan of a Pearl Harbor style attack on Hawaii and to draw the United States into war -- a war they are confident they will win. After the assassination, the President, CIA and defense unites of the United States are put in the awkward position of proving they had nothing to do with the murder -- not an easy task since the Hawaii Air Guard was responsible for ensuring the safety of the Chinese President's transport on its final approach to Hawaii when it crashed into the ocean, and the F-15 pilots were the last ones to see anyone alive on the aircraft. During the investigation, U.S. intelligence sources discover some unusual Chinese military activity and first hear of the Shadows of Fire. Intelligence sources also learn that this faction has an aircraft carrier loaded with fighter planes sailing across the Pacific Ocean under the control of Colonel Kim. The discovery of a Chinese submarine off a beach at Midway is even more disconcerting. The Chinese are obviously moving forward with their plan to attack Hawaiian soil in retaliation even though the U.S. government has found proof the assassination was a set-up.The United States calls upon all branches of the services to defend the nation with the Hawaii Air National Guard taking the lead role. They bring an air craft carrier unit in for support, in addition to extra aircraft from U.S. mainland bases to ensure they are well protected and can defend themselves on the ground, by sea and in the air. All of the members of the services are ready for the task and well trained to defend their nation should it actually come down to that. Captain Keoni Rodriguez, Lieutenant Samuel Jacobs and others head into battle knowing the ensuing air-to-air combat sequences are not training drills. They are surprised at the tenacity and determination of the Chinese forces, and encounter serious opposition in the ensuing battles.This novel is similar to Tom Clancy's Red Storm Rising or Mack Maloney's Wingman series. It is a fast-paced military thriller with a lot of action, drama, suspense and even a little humor and romance throughout this well rounded story that is not just for military enthusiasts. Survivors of the Pearl Harbor attack will be honored, and all readers will be caught up in the characters as they become as familiar as good friends. It illustrates how the U.S. service members give back measure for measure every hour of training the U.S. military has given them. They aren't just doing their job; they are defending the nation they love.*

*In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh “Boom” Trenchard of Great Britain and William “Billy” Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet’s central vision—that command of the air is all important in modern warfare—has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.*

The Battle of Attu, which took place from 11-30 May 1943, was a battle fought between forces of the United States, aided by Canadian reconnaissance and fighter-bomber support, and the Empire of Japan on Attu Island off the coast of the Territory of Alaska as part of the Aleutian Islands Campaign during the American Theater and the Pacific Theater and was the only land battle of World War II fought on incorporated territory of the United States. It is also the only land battle in which Japanese and American forces fought in Arctic conditions. The more than two-week battle ended when most of the Japanese defenders were killed in brutal hand-to-hand combat after a final banzai charge broke through American lines. Candy Strother DeVore Mitchell, Ophelia DeVore Mitchell's niece, shares stories of rap and hip hop's most infamous icons in her Faces of Rap Mothers book series. Foreword is by Mr. Jeffrey Collins, a notable music industry giant. Through a minimalist aperture, a series of Contributors join Candy sharing intimate details of their life within the rap and hip hop culture, from the 60's onward. Their trysts, and histories, provide readers alternative retrospectives. Rising from shadows of the megalith performers these women love, readers are given an all stage pass with backstory access, from the cousins, nieces, mothers, sisters and/or wives of rap and hip hop's most luminous legends. Familial journeys, which may inure the strongest women, share how these ladies have thrived amidst elements of soul.\_\_\_\_\_Visit: https://www.facesofrapmothers.com to learn more.Also, look for the "Rap Mothers Save The Day" Children's Series titles, by Candy Strother DeVore Mitchell at https://www.facesofrapmothers and/or https://www.domaink.com.

The Life and Legacy of Bill Frank Jr.

Flying Magazine

A Higher Plane: Redefining Your Civil Air Patrol Squadron

The American Family

Author Frank Blazich has spent years researching and compiling disparate records of Civil Air Patrol's short-lived—but influential--coastal patrol operations of World War II, which he synthesizes into the first scholarly monograph that cements the legacy of this unique and vital wartime civil-military cooperative effort.This volume relates the proud history of an important organization, the Civil Air Patrol (CAP), and its efforts to use civilian-owned aircraft and volunteer pilots to help combat the U-boat menace that threatened America's shores in World War II. Though that story is not well known, it has been chronicled previously, but not with Frank Blazich's attention to detail and important corrections to CAP's effectiveness during the war. CAP's substantial accomplishments will be familiar to members of that fine organization that does much to inculcate a spirit of "aimedness," as Billy Mitchell called it, among today's youth and motivate them towards careers in both civil and military aviation. But Blazich has gone far beyond a statistical recounting of sorties and hours flown, of the long tedious hours of patrol, and the sheer terror of engine failure far out at sea or an airfield closed in by weather as the fuel gauge approaches empty. Instead, he uses the successful mobilization of civilian "experts" (and they certainly knew more about aviation than many members of the general population) to come to their nation's aid in a time of crisis. By doing so, he reminds future commanders and planners to consider the use of civil resources and highlights issues that are likely to emerge in mobilizing these important assets, from the legal status of noncombatants to the importance of logistical support and sustainment.The potential uses of civilian aviation experts in future crises are limited only by the imagination. The Civil Air Patrol, as currently organized and equipped, could easily provide reconnaissance and light logistical support in the event of war. CAP aircraft, manned and unmanned, fixed-wing or rotary, could be used to in real time verify or dispel "deep fakes" of events, helping combat the information warfare our adversaries are becoming so adept at. These same platforms could provide vital reconnaissance during natural disasters, from delivering life-saving medical supplies to relieving much more expensive and already heavily tasked military assets from the burdens of searching for survivors or compiling imagery of damage. As climate change threatens our globe, CAP orbits equipped with thermal sensors could help monitor forests for wildfires during critical periods so they can be extinguished before they become life-threatening infernos. And aircraft could assist in securing the nation's porous borders, whether on land or at sea. Similarly, civilian cyber specialists could lend their expertise in times of cyberattack to help defend the nation's vital economic and communications infrastructure.Thus Frank Blazich's work is not only an excellent history of events over 75 years ago, but it is also a blueprint for leveraging all aspects of our national power in times of crisis. It will certainly appeal to the membership of the Civil Air Patrol, who will find inspiration from the sacrifices of a previous generation of Airmen, 68 of whom gave their lives in their nation's defense. But it will also help inform current and future commanders, planners, and civilian leaders on the capabilities of this remarkable organization and provide suggestions for the incorporation of civil assets to support future military and disaster relief operations, whether in air, space, or cyberspace.

I believe that the Family Safety Net Act could be to raising kids in America what the Civil Rights Movement is to minorities. The legislation will mandate that every fit parent have equal access to their kids—automatic joint custody, co-parenting is insufficient—with the best interests of the child at the heart of the legislation, regardless of the status of the relationship of the parents, with primary custody initially granted to the mother. No more fathers begging to see their kids. It's time. The key is fit. The adults must have the capacity to parent free of drug abuse, emotional abuse, and physical abuse and to establish a home that is free of such maltreatment. It is time. In addition, since America is about enterprise—working to support self and family and fulfilling dreams within the legal framework of this country—the parents and our educational institutions must model that behavior so every student steps into adulthood with a plan to support themselves, for the only way we will triumph over this nebulous future is to launch with the genuine love and support of as many friends and family we can muster together and to have the confidence from preparation to work and/or pursue dreams. I am for kids.
