curricular elements that are addressed, intentionally or unintentionally, in developing all college courses and programs. By exploring the interaction of these elements in context they use the academic plan model to clarify the processes of course and program planning, enabling instructors and administrators to ask crucial questions about improving teaching and optimizing student learning. This revised edition continues to stress research-based educational practices. The new edition consolidates and focuses discussion of institutional and sociocultural factors that influence curricular decisions. All chapters have been updated with recent research findings relevant to curriculum leadership, accreditation, assessment,

and the influence of academic fields, while two new chapters focus directly on learning research and its implications for instructional practice. A new chapter drawn from research on organizational change provides practical guidance to assist faculty members and administrators who are engaged in extensive program improvements. Streamlined yet still comprehensive and detailed, this revised volume will continue to serve as an invaluable resource for individuals and groups whose work includes planning, designing, delivering, evaluating, and studying curricula in higher education. "This is an extraordinary book that offers not a particular curriculum or structure, but a comprehensive approach for thinking

about the curriculum, ensuring that important considerations are not overlooked in its revision or development, and increasing the likelihood that students will learn and develop in ways institutions hope they will. The book brings coherence and intention to what is typically an unstructured, haphazard, and only partially rational process guided more by beliefs than by empirically grounded, substantive information. Lattuca and Stark present their material in ways that are accessible and applicable across planning levels (course, program, department, and institution), local settings, and academic disciplines. It's an admirable and informative marriage of scholarship and practice, and an insightful guide to

When Pakistan was carved out of India in 1947 as a homeland for the Muslims of the subcontinent, it was envisioned as a secular state where non-Muslims would be granted freedom of religion and equal citizenship. However, the subsequent historical events led to a fast Islamization of nearly every part of public life and discrimination against the country's religious minorities, who today make up less than 4 per cent of the overall population. Based on extensive field work involving more than 100

non-structured qualitative interviews, this study explores the situation of the religious minorities and the dynamics of interfaith peacebuilding in the Islamic Republic of Pakistan. Primary focus was laid on the practice of interfaith dialogue, which - given the draconic blasphemy laws - differs from interfaith dialogue as conceived of in the West. Additionally, other peacebuilding measures, as offered by various non-governmental organizations, were taken into account, be they advocacy, promotion of human rights and unbiased education, or policy negotiation with the government. She tracks Ambedkar's emergence as a major political figure in the national movement, and shows how his scholarship and intelligence illuminated a political struggle beset by sectarianism and obscurantism. Roy breathes new life into Ambedkar's anti-caste utopia, and says that without a Dalit revolution, India will continue to be hobbled by systemic inequality.*
