If you complain of brain fog to a medical professional, you're likely to be told that it isn't a recognised condition. But if you mention brain fog to your friends, they'll know exactly what you mean: fuzzy thinking, trouble concentrating, a sense of grasping for the right word, feeling like your brain is somehow slowed down. In truth, brain fog is not a diagnosis in

itself, but a sign that things aren't right in your body. In *Beating Brain Fog*, neuroscientist Dr Sabina Brennan guides us through the science to show how our brains work, and why we might experience confusion and anxiety. She offers tools to help you identify your own cognitive profile, determining the causes of your specific symptoms, and explains the simple strategies that can help you feel like yourself again. With brain fog now identified as one of the long-term effects of Covid-19, there has never been a more timely moment to tackle your symptoms, with Dr Brennan's

Jay Shetty, social media superstar and host of the #1 podcast On Purpose, distills the timeless wisdom he learned as a monk into practical steps anyone can take every day to live a less anxious, more meaningful life.

When you think like a monk, you'll understand:

- How to overcome negativity
- How to stop overthinking
- Why comparison kills love
- How to use your fear
- Why you can't find happiness by looking for it
- How to learn from everyone you meet

become one of three things—a  
doctor, a lawyer, or a failure. His  
family was convinced he had  
chosen option three: instead of  
attending his college graduation  
ceremony, he headed to India to  
become a monk, to meditate  
every day for four to eight hours,  
and devote his life to helping  
others. After three years, one of  
his teachers told him that he  
would have more impact on the  
world if he left the monk's path to  
share his experience and

wisdom with others. Heavily in debt, and with no recognizable skills on his resume, he moved back home in north London with his parents. Shetty reconnected with old school friends—many working for some of the world's largest corporations—who were experiencing tremendous stress, pressure, and unhappiness, and they invited Shetty to coach them on well-being, purpose, and mindfulness. Since then, Shetty has become one of the world's most popular influencers. In 2017, he was named in the Forbes magazine 30-under-30 for being a game-changer in the world of media. In 2018, he had

Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But**

**overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the “prediction paradox”: The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies**

He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They**
