How Improvisation Created Language and Changed the World

An enthralling story of a poor and gawky kid who mysteriously becomes the world's greatest goalkeeper – a seamless blend of magic realism and exhilarating soccer action. "And you found it, this thing you were looking for?" It was darker now, and the city below Faustino's office was a jazzy dance of neon signs and traffic. The big man went to the window and looked down at it all, spreading his large hands on the glass. "No," he said. "It found me." When Paul Faustino of LA NACION flips on his tape recorder for an exclusive interview with El Gato – the phenomenal goalkeeper who single-handedly brought his team the World Cup – the seasoned reporter quickly learns that this will be no ordinary story. Instead, the legendary El Gato ("The Cat") quietly narrates a spellbinding tale that begins in a mythic corner of the South American rain forest, where a ghostly but very real mentor, the Keeper, emerges to teach the gangly boy the most thrilling secrets of the game. Combining vivid imagery and heart-stopping action, this evocative, strikingly ethereal novel about loyalty, passion, and magic will haunt readers, regardless of their love for soccer, long after the story is ended.

Forget the language instinct—this is the story of how we make up language as we go Language is perhaps humanity’s most astonishing capacity—and one that remains poorly understood. In The Language Game, cognitive scientists Morten H. Christiansen and Nick Chater show us where generations of scientists seeking the rules of language got it wrong. Language isn’t about hardwired grammars but about near-total freedom.

something like a game of charades, with the only requirement being a desire to understand and be understood. From this new vantage point, Christiansen and Chater find compelling solutions to major mysteries like the origins of languages and how language learning is possible, and to long-running debates such as whether having two words for ‘blue’ changes what we see. In the end, they show that the only real constraint on communication is our imagination.

In the middle of the night, the gargoyles that adorn the walls of a museum come to life and frighten the night watchman.
