The Mobil Travel Guide star ratings are a 45-year-old consumer advocacy concept originally developed following the introduction of the interstate highway system. The goal of the Guide is not to identify and rate every property in the country, but to recommend only the best in each category, ones that we would send our customers to. We look at the stars from a consumer's point of view, rating lodgings and restaurants across North America from the perspective of the "average traveler." The Guides feature new enhanced descriptions for 2004. Listings include lodgings, restaurants, attractions, and events in established travel destinations, as well as cities and towns on the way to established travel destinations. Our new easy-to-use format makes the Guides even more indispensable to travelers. Each regional guide is organized alphabetically by state, with introductory information about the state followed by city listings in alphabetical order. For each city, the guide lists sites and attractions, lodgings, and then restaurants. One of the features that sets the Mobil Travel Guide apart from its competitors is its proprietary Mobil star rating system. Forty-five plus years of publishing experience and the oldest non-biased rating system in North America make the Mobil Travel Guide series a must-have for travelers wanting up-to-date ratings of hotels and restaurants.

This book considers how largely accepted 'legal truths' about drugs and addiction are made and sustained through practices of lawyering. Lawyers play a vital and largely underappreciated role in constituting legal certainties about substances and 'addiction', including links between alcohol and other drugs, and phenomena such as family violence. Such practices exacerbate, sustain and stabilise 'addicted' realities, with a range of implications - many of them seemingly unjust - for people who use alcohol and other drugs. This book explores these issues, drawing upon data collected for a major international study on alcohol and other drugs in the law, including interviews with lawyers, magistrates and judges; analyses of case law; and legislation. Focussing on an array of legal practices, including processes of law-making, human rights deliberations, advocacy and negotiation strategies, and the sentencing of offenders, and buttressed by overarching analyses of the ethics and politics of such practices, the book looks at how alcohol and other drug 'addiction' emerges and is concretised through the everyday work lawyers and decision makers do. Foregrounding 'practices', the book also shows that law is more fragile than we might assume. It concludes by presenting a blueprint for how lawyers can rethink their advocacy practices in light of this fragility and the opportunities it presents for remaking law and the subjects and objects shaped by it. This ground-breaking book will be of interest not only to those studying and working within the field of alcohol and drug addiction but also to lawyers and judges practising in this area and to scholars in a range of disciplines, including law, science and technology studies, sociology, gender studies and cultural studies

"My father comes into focus for me on a Liars' Club afternoon. He sits at a wobbly card table weighed down by a bottle. Even now the scene seems so real to me that I can't but write it in the present tense." Mary Karr grew up in a swampy East Texas refinery town in a volatile and defiantly loving family. In this funny, devastating, haunting memoir and with a raw and often painful honesty, she looks back at life with a painter mother, seven times married, whose outlaw spirit could tip over into psychosis, and a hard-drinking, fist-swinging father who liked nothing better than to spin tales with his cronies at the Liars' Club.

Drugs, Clubs and Young People

Provides information on hotels, restaurants, driving and walking tours, shopping and sightseeing, and nighttime entertainment.

In this volume, contributors employ sociological and public health perspectives to offer insights into behaviours common at raves and nightclubs. This volume provides theoretical observations on illicit club drug use and supply, helping to challenge current orthodoxies on the role of drugs in young peoples' lives. Drawing material from the USA, UK and Hong Kong, the volume allows the demystification of stereotypical presentations surrounding young people who attend clubs and/or use club drugs. This work provides a badly needed and objective analysis of youthfulness, a foundation from which future sociological and public studies on young people, clubs and drugs - as well as young people themselves - can be built. Armed only with turntables, a mixer and a pile of records, hip-hop DJs and turntable musicians have changed the face of music. However, hip-hop has long been recognised as an influential popular culture both culturally and sociologically, hip-hop music is rarely taken seriously as a genre. Hip-Hop Turntablism, Creativity and Collaboration values hip-hop music as worthy of musicological attention and offers a new approach to the study, focusing on the music itself and providing a new framework to examine not only the musical product, but also the creative processes which it was created. Based on ten years of research among turntablist communities, this is the first book to explore the creative and collaborative processes of groups of DJs working together as hip-hop turntable teams. Focusing on a variety of subjects - from the history of turntable experimentation and the development of innovative sound manipulation techniques, to turntable team formation, collective creation and team routines - Sophy Smith examines how turntable teams have developed new ways of composing music, and defines characteristics in both the process and the final artistic product. Relevant to anyone interested in turntable music or innovative music generally, this book offers a new turntable notation system and methodology for the analysis of turntable compositions, covering aspects such as material, manipulation techniques and structure as well as the roles of individual musicians.

A long-overdue paean to the predominant musical form of the 70s and a thoughtful exploration of the culture that spawned it Disco may be the most universally derided musical form to come about in the past forty years. Yet, like its pop cultural peers punk and hip hop, it was born of a period of profound social and economic upheaval. In Turn the Beat Around, critic and journalist Peter Shapiro traces the history of disco music and culture. From the outset, disco was essentially a shotgun marriage between a newly out and proud gay sexuality and the first generation of post-civil rights African Americans, all to the serenade of the recently developed synthesizer. Shapiro maps out these converging influences, as well as disco's cultural antecedents in Europe, looks at the history of DJing, explores the mainstream disco craze at its apex, and details the long shadow cast by disco's performers and devotees on today's musical landscape. One part cultural study, one part urban history, and one part glitter-pop confection, Turn the Beat Around is the most comprehensive study of the Me Generation to date.

The most complete guide to every artist and album that has ever charted in the UK Album chart, with details on over 14,800 albums and biographies on every one of the 3,180 acts that have appeared since the chart first started in 1958. From a Top Ten in 1958, the album chart has grown in both size and stature over the years. Increased to a Top Twenty in 1960, the chart grew to a Top 30 by 1966, a Top 40 later that year, a Top 50 in 1971, a Top 75 in 1978 and a Top 100 in 1981. By 1989, when compilation albums and soundtracks were a major factor in the chart, a decision was taken to produce two charts; a Top 75 artist chart and a Top 20 compilation chart. Every single entry on all these charts is included in Collins Complete UK Hit Albums. 3,180 acts have registered just over 11,300 hit albums; also listed are the approximately 3,500 soundtracks and compilation albums that have also hit the charts. Hit Singles: a brief biography of each of the 3,180 or so artists who have had hit albums, details of BPI awards, Platinum Europe awards and RIAA Diamond awards and details of BRIT, Grammy awards and US Number Ones. Just as with the single chart, the album chart is not without its peculiarities and so you will learn of the album that took nearly four years to hit the number one spot, the album by Sigur Ros that had no title as opposed to that by Fiona Apple which registered the longest title (all 89 words), the artists whose chart career consists of a single week at position 100 as opposed to Fleetwood Mac's Rumours which has spent 477 weeks on the chart, including one week at number one. The days of the image brands are over, and 'new marketing' has gone mainstream. The world's biggest companies are pursuing a post-advertising strategy, moving away from advertising and investing in leading edge alternatives. In the vanguard of the revolution has been John Grant, co-founder of the legendary agency St. Luke's and author of The New Marketing Manifesto, whose radical thinking has informed a generation. Now Grant is set to stun the industry again. In The Brand Innovation Manifesto, he redefines the nature of brands, showing why old models and scales no longer work and revealing that the key to success today is impacting people's lifestyles (think Starbucks, iPod and eBay). At the heart of the book is the concept of the 'brand molecule' to which new cultural ideas can be

constantly added to keep pace with change. Cataloguing 32 classes of idea, Grant presents a practical approach to mixing and matching them within your own market to develop new brand ideas - and new ideas for existing brands.
