Being a life coach is a fulfilling way to make money doing what you love, while making a difference! But, the truth is that not all life coaches are successful. Some never learn the skills they need to create a thriving business, and others get stuck because they're only able to reach a certain level of success, and income, by meeting one-on-one with clients. There is only so much time in a day, some of which is spent on marketing and other business-related-stuff. Once a coach fills their schedule with clients, they reach the ceiling of their growth. Their only option is to raise their rates, but this isn't always easy or even appropriate, depending on the population they serve. The good news is that there is a way to serve more people and increase revenue at the same time. The secret to creating a successful life coaching business is offering group life coaching programs. Think about it, much of what you do with each client is exactly the same. If you say the same thing 10 times to 10 different people, why not say it to all of them at once? If you develop a program out of your coaching process, you can walk a group of people through the same coaching activities and steps, together. By creating a group coaching business, you can: 1) reach more people in less time, 2) offer an easy-to-sell low-cost option, 3) upsell your favorite clients to one-on-one coaching, 4) create a more predictable schedule and income, and 5) increase your per-hour revenue ($\$50 \times 10$ is greater than $\$150 \times 1$). In this book, you will find the exact blueprint that thousands of our life coaching students have used to create their own group life coaching programs. You'll learn everything you need to: 1) turn the process you use with your clients into a complete group coaching curriculum, 2) learn professional

communication and facilitation skills so you can effectively manage and lead your group, and 3) structure your offer, set your price, and create marketing campaigns that fill your groups.

The first reference to bring scientifically proven approaches to the practice of personal and executive coaching The Evidence Based Coaching Handbook applies recent behavioral science research to executive and personal coaching, bringing multiple disciplines to bear on why and how coaching works. A groundbreaking resource for this burgeoning profession, this text presents several different coaching approaches along with the empirical and theoretical knowledge base supporting each. Recognizing the special character of coaching-that the coaching process is non-medical, collaborative, and highly contextual-the authors lay out an evidence-based coaching model that allows practitioners to integrate their own expertise and the needs of their individual clients with the best current knowledge. This gives coaches the ability to better understand and optimize their own coaching interventions, while not having to conform to a single, rigidly defined practice standard. The Evidence Based Coaching Handbook looks at various approaches and applies each to the same two case studies, demonstrating through this practical comparison the methods, assumptions, and concepts at work in the different approaches. The coverage includes: An overview: a contextual model of coaching approaches Systems and complexity theory The behavioral perspective The humanistic perspective Cognitive coaching Adult development theory An integrative, goal-focused approach Psychoanalytically informed coaching Positive psychology An adult learning approach An adventure-based framework Culture and coaching

deepen your relationships with the people who matter most, or break free from unproductive patterns, working with a coach can help you create the future you've always wanted. That being said, coaching isn't magic. All too often, people have the desire to improve but fail to achieve the exponential growth they deserve. It isn't because their goals are unattainable or that they aren't getting the right support from their coach; it's due to a lack of basic understanding in how to get the most out of coaching. Simple tips and tricks can make a world of difference. Over the past decade, highly sought coaches Karen Davis and Alex Mill have partnered with a wide range of clients, from successful entrepreneurs and Fortune 100 executives to individuals simply looking for more peace and balance in a hectic world. They've seen people surpass all of their goals and expectations while others took longer than they should have to make any real progress. In this book, Davis and Mill present a straightforward guide to ensure that you get the highest possible ROI from your one-on-one coaching relationship. You'll learn to drive the most value from your sessions, easily carve out time to take action, and effectively assess your progress and course correct-if needed. This book will shift your perception of coaching, enabling you to attain greater personal fulfillment and immediate life-changing results.

Author Simon Dolan extends the concepts presented in the best-selling *Managing by Values*, adding many innovations including a step-by-step methodology for diagnosing value congruence and tools for conducting real value reengineering (value alignment). Dolan argues that when people understand their values

(regardless of how and why they have emerged), and analyze their relative importance and consequences, they can see more clearly how these values affect their daily lives.

Extensive research shows that realignment of values ensures better congruence with goals and objectives resulting in deeper inner satisfaction, which positively affects overall well-being, state of mind, performance, and general happiness. This is what the author calls success in the life of business and the business of life. How to be a Master Coach

From a founding member of the coaching movement comes a detailed guide to mastering one of a coach's toughest skills: thoughtfully reflecting clients' words and expressions back to them so they see themselves and their world through new eyes. "Coaches rely far too much on asking open-ended questions," says Marcia Reynolds. But questions only seek answers—inquiry provides insight. When, instead of just questions, clients hear their thoughts, opinions, and beliefs spoken by someone else, it prompts them to critically consider how their thinking affects their goals. Reynolds cites the latest brain science to show why reflective inquiry works and provides techniques, tips, and structures for creating breakthrough conversations. This book will free coaches from the cult of asking the magical question by offering five essential practices of reflective inquiry: focus on the person, not the problem; summarize what is heard and expressed; identify underlying beliefs and assumptions; unwrap the desired outcome; and articulate insights and commitments.

Using these practices, combined with a respectful and caring presence, helps create a space where clients feel safe, seen, and valued for who they are. Coaches become change agents who actively recharge the human spirit. And clients naturally dive deeper and develop personalized solutions that may surprise even the coach.

Life coaching is not therapy, but many of the qualities that therapists possess, naturally lend themselves to a life coaching approach. This is a guide to turning your natural people-helping skills into a profitable life coaching business. It appeals to therapists and counsellors used to conducting therapeutic interventions.

Coaching for Life is an autobiographic journey into the mind and heart of a remarkable man. In his own well-chosen words Coach Annacone describes his life as player, coach and the friend of many who love and work in the field of tennis. This exceptional story is full of anecdotes and exciting passages of dynamic play and deep concentration from Pete Sampras and Roger Federer, to name only two of the many intimate portraits revealed here. In the words of Paul Annacone: "Coaching for Life is not about the sport of tennis as much as it is a process-oriented journey based on the

called “the most important coach in America,” subject of the national bestseller *Season of Life*, Joe Ehrmann, describes his coaching philosophy and explains how sports can transform lives at every level of play, from the earliest years to professional sports. Coaches have a tremendous platform, says Joe Ehrmann, a former Syracuse University All-American and NFL star. Perhaps second only to parents, coaches can impact young people as no one else can. But most coaches fail to do the teaching, mentoring, even life-saving intervention that their platform provides. Too many are transactional coaches; they focus solely on winning and meeting their personal needs. Some coaches, however, use their platform. They teach the Xs and Os, but also teach the Ys of life. They help young people grow into responsible adults; they leave a lasting legacy. These are the transformational coaches. These coaches change lives, and they also change society by helping to develop healthy men and women. *InSideOut Coaching* explains how to become a transformational coach. Coaches first have to “go inside” and articulate their reasons for coaching. Only those who have taken the *InSideOut* journey can become transformational. Joe Ehrmann provides examples of coaches in his life who took this journey and taught him how to find something bigger than himself in sports. He describes his own *InSideOut* experience, starting with the death of his beloved brother, which helped him understand how sports could transcend the playing field. He gives coaches the information and the tools they need to become transformational. Joe Ehrmann has taken his message

about the extraordinary power of sports all over the country. It has been warmly endorsed by NFL head coaches, athletic directors at major universities, high school head coaches, even business groups and community organizations. Now any parent-coach or school or community coach can read Ehrmann's message and learn how to make sports a life-changing experience.

Step-by-step details for gathering information, conducting the intake, establishing goals and objectives, and working through all stages of coaching are included, along with helpful forms and a detailed list of additional resources. It is vital that coaches have the ability to recognise mental health problems in their clients, enabling them to make an informed decision about whether coaching is appropriate. A Guide to Coaching and Mental Health provides an indispensable introduction to the assessment of psychological issues in the context of coaching. Divided into three sections, the book covers all the legal, ethical and practical considerations. Section one, Working on the Boundary, starts by exploring the distinction between normal and abnormal behaviour. In section two, What's Being Said, the authors introduce fictional case studies, which cover a range of possible mental health issues from mild depression and anxiety, through to psychoses and potentially life threatening problems. Section three, Categories of Mental Illness, guides the reader through the definition and management of the more common mental health problems. This accessible and jargon-free guide to identifying mental illness will prove invaluable for coaches and other related professionals, whatever their level of experience.
