Nicaraguans and the Formation of National Identities in Costa Rica

Het negerjongetje Cocori ontmoet een blank meisje op een schip, dat aan de kust ligt. Hij belooft haar een aap, waarop zij hem een roos geeft. Als hij na veel moeite een aap heeft gevonden, is het schip weggevaaren en zijn roos verwelkt. Cocori vraagt bedroefd aan iedereen waarom zijn roos zo kort leefde, terwijl andere planten en dieren zo lang leven. Hij trekt het oerwoud in om dit ook aan een gevaarlijke krokodil en aan de slang te vragen. Niemand kan hem echter met zijn probleem helpen, totdat een zanger met een wijsheid komt: "De roos heeft in haar korte leven meer schoonheid en vreugde uitgestraald dan menig plant en dier die lang leven". Thuis ziet Cocori, dat de stengel van zijn roos worteltjes heeft gekregen en dat er een nieuwe knop is aangegroeid.

FARMERS OR FORESTERS The use of trees in the sylvopastoral systems of the Atlantic Zone of Costa Rica

During the last two decades, a decline in public investment has undermined some of the national values and institutions of Costa Rica. The resulting sense of dislocation and loss is usually projected onto Nicaraguan "immigrants." Threatening Others: Nicaraguans and the Formation of National Identities in Costa Rica explores the representation of the Nicaraguan "other" in the Costa Rican imagery. It also seeks to address more generally why the sense of national belonging constitutes a crucial identification in contemporary societies. Interdisciplinary and based on extensive fieldwork, it looks critically at the "exceptionalism" that Costa Ricans take for granted and view as a part of their national identity. Carlos Sandoval-García argues that Nicaraguan immigrants, once perceived as a "communist threat," are now victims of an invigorated, racialized politics in which the Nicaraguan nationality has become an offense in itself. Threatening Others is a deeply searching book that will interest scholars and students in Latin American studies and politics, cultural studies, and ethnic studies.

Children's Narrative from Central America and the Caribbean

Outstanding contributors include Pierre Macherey, Charles Wolfe, Alex Callinicos and Judith Revel

In her analysis of some of the most interesting and important children's literature from Central America and the Caribbean, Ann González uses postcolonial narrative theory to expose and decode what marginalized peoples say when they tell stories to their children—and how the interpretations children give these stories today differ from the ways they have read them in the past. González reads against the grain, deconstructing and critiquing dominant discourses to reveal consistent narrative patterns throughout the region that have helped children maneuver in a world dominated by powerful figures—from parents to agents of social control, political repression, and global takeover. Many of these stories are in some way lessons in resistance and survival in a world where "the toughest kid on the block," often an outsider, demands that a group of children "play or pay," on his terms. González demonstrates that where traditional strategies have proposed the model of the "trickster" or the "paradoxically astute fool," to mock the pretensions of the would-be oppressor, new trends indicate that the region's children—and those who write for them—show increasing interest in playing the game on their own terms, getting to know the Other, embracing difference, and redefining their identity and role within the new global culture. Resistance and Survival emphasizes the hope underlying this contemporary children's literature for a world in which all voices can be heard and valued—the hope of an authentic happy ending.

Children's Narrative from Central America and the Caribbean

The Philosophy of Antonio Negri

Blood on Their Hands

A few short years after HIV first entered the world blood supply in the late 1970s and early 1980s, over half the hemophiliacs in the United States were infected with the virus. But this was far more than just an unforeseeable public health disaster. Negligent doctors, government regulators, and Big Pharma all had a hand in this devastating epidemic. Blood on Their Hands is an inspiring, firsthand account of the legal battles fought on behalf of hemophiliacs who were unwittingly infected with tainted blood. As part of the team behind the key class action litigation filed by the infected, young New Jersey lawyer Eric Weinberg was faced with a daunting task: to prove the negligence of a powerful, well-connected global industry worth billions. Weinberg and journalist Donna Shaw tell the dramatic story of how idealistic attorneys and their heroic, mortally-ill clients fought to achieve justice and prevent further infections. A stunning exposé of one of the American medical system's most shameful debacles, Blood on Their Hands is a rousing reminder that, through perseverance, the victims of corporate greed can sometimes achieve great victory.

The chapters in this book were developed from some of the lectures presented at a symposium at the XX International Congress of Entomology held in Florence, Italy in August 1996. The purpose of the symposium was to discuss the impact of evolving modern agricultural landscapes on the insect species, of both economic and ecological importance, that utilize that habitat. Agricultural policy, to some extent, influences the choices that farmers make and thereby the shape of the agricultural landscape. In order to move toward more sustainable agro ecosystems future policy makers will have to consider the history of land use, consumer demands for both environmentally sound and affordable products, and the conservation of biological diversity. I would hope the information contained in this book will help stimulate discussion about the consequences of policy decisions on our agricultural landscapes and their insect inhabitants. I thank all the speakers from the symposium and in particular those that have been able to contribute chapters to this book. There have been many delays, most due to circumstances beyond anyone's control. I would like to express my appreciation to Gloria Verhey and Patrick Dumont for taking care of the book in these final months.
