

Coercive Control How Men Entrap Women In Personal Life Interpersonal Violence

***Coercive Control: The Entrapment of Women in Personal Life* Oxford University Press**

A devastating story of coercive control and domestic homicide. Why would an 'ordinary' father murder his family?

Leaving Dorian is a story about finding hope and embracing the unknown, as recounted by domestic violence survivor Linda Dynel. This fast paced, riveting memoir takes the reader with Ms. Dynel on every step of her journey; from hurriedly throwing her children's clothes into garbage bags and gathering the weapons that her husband had stockpiled to protect his family during the Apocalypse that he was sure was coming with the New Millennium, to moving back in with her equally as imbalanced mother, which at the time she believed to be her only reasonable means of escape. "My purpose in writing Leaving Dorian was primarily to educate. The questions that were asked of me when I finally escaped are the very same questions that are asked over and over again by loved ones, lawyers and co-workers of victims. "If it was so bad, why didn't you call the police? Why did you keep having children with him? How could you just let him push you around/yell at you/hit you like that? Why didn't you fight back? How could you let your children live like that? Why didn't you leave sooner?" My hope is that by bringing the reader into my violent marriage, as well as allowing the reader to examine my upbringing and the way in which I ended up meeting and eventually marrying "Dorian," I can help the reader to understand not only how abuse starts but also how it is successfully carried out against the victim. Domestic violence is perhaps the most misunderstood of all crimes that law enforcement and social service agencies deal with on a daily basis, as it's not about poor anger management skills, substance abuse or economic stressors. Domestic violence is about one person's belief that they are entitled to have complete control over another human being. It is my sincerest hope that Leaving Dorian will enable those in the mental health and counseling professions, as well as loved ones of victims, to gain an entirely new and fresh perspective on what a victim of domestic violence really grapples with every day. It is only through education and understanding that we will ever, as a society, put an end to the erroneous thought processes that allow domestic violence to continue to flourish."

This book offers a critical appreciation of the nature and impact of coercive control in interpersonal relationships. It examines what this concept means, who is impacted by the behaviours it captures, and how academics, policy-makers and policy advocates have responded to the increasing

recognition of the deleterious effects that coercive control has on especially women's lives. The books discussed the historical emergence of this concept, who its main proponents have been, and how its effects have been understood. It considers the role of coercive control in making sense of women's pathway into crime as well as their experiences of it as victims. Coercive control has been presented predominantly as a gendered process and consideration is given in this book to the efficacy of this assumption as well as the extent to which the concept makes sense for a wide constituency of marginalised women. In recent years, much energy has been given to efforts to criminalise coercive control and the concerns that these efforts generate are discussed in detail, alongside what the limitations to such initiatives might be. In conclusion the book situates the rising pre-occupation with coercive control within the broader concerns with policy transfer, ways of taking account of victim-survivor voices, alongside the importance of working towards more holistic policy responses to violence(s) against women. The book will be of particular interest to academics, policy-makers and practitioners working in criminal justice who wish to both understand the nature and extent of coercive control, as well the importance of appreciating the role of nuance in translating that understanding into practice.

Leaving Dorian

One of the most important books ever written on domestic violence, Coercive Control breaks through entrenched views of physical abuse that have ultimately failed to protect women. Evan Stark, founder of one of America's first battered women's shelters, shows how "domestic violence" is neither primarily domestic nor necessarily violent, but a pattern of controlling behaviors more akin to terrorism and hostage-taking. Drawing on court records, interviews, and FBI statistics, Stark details coercive strategies that men use to deny women their very personhood, from "beeper games" to food logs to micromanaging dress, speech, sexual activity, and work. Stark urges us to move beyond the injury model and focus on the real victimization that allows men to violate women's human rights with impunity. Provocative and brilliantly argued, Coercive Control reframes abuse as a liberty crime rather than a crime of assault and points the way to bringing "real" equality for women in line with their formal rights to personhood and citizenship, freedom and safety.

Domestic abuse is a national emergency: one in four Australian women has experienced violence from a man she was intimate with. But too often we ask the wrong question: why didn't she leave? We should be asking: why did he do it? Investigative journalist Jess Hill puts perpetrators – and

the systems that enable them – in the spotlight. See *What You Made Me Do* is a deep dive into the abuse so many women and children experience – abuse that is often reinforced by the justice system they trust to protect them. Critically, it shows that we can drastically reduce domestic violence – not in generations to come, but today. Combining forensic research with riveting storytelling, *See What You Made Me Do* radically rethinks how to confront the national crisis of fear and abuse in our homes. ‘A shattering book: clear-headed and meticulous, driving always at the truth’—Helen Garner ‘One Australian a week is dying as a result of domestic abuse. If that was terrorism, we’d have armed guards on every corner.’ —Jimmy Barnes ‘Confronting in its honesty this book challenges you to keep reading no matter how uncomfortable it is to face the profound rawness of people’s stories. Such a well written book and so well researched. *See What You Made Me Do* sheds new light on this complex issue that affects so many of us.’—Rosie Batty

This cutting-edge volume advances theories, methodologies and policy analyses relating to various forms of violence against women. Topics covered include: the nature, importance and variety of cultural contexts in which violence occurs, is reproduced and may be challenged or changed; the nature and variety of sexualized violence; and a range of theoretical perspectives on perpetrators of violence. Taking an interdisciplinary focus on issues that affect community and state responses, the book includes individual accounts, and incorporates themes related to authority, sexual proprietariness, asymmetry of violence, socialization, patterns and deviations of victims and offenders, and social and cultural contexts.

Abusive Endings offers a thorough analysis of the social-science literature on one of the most significant threats to the health and well-being of women today—abuse at the hands of their male partners. The authors provide a moving description of why and how men abuse women in myriad ways during and after a separation or divorce. The material is punctuated with the stories and voices of both perpetrators and survivors of abuse, as told to the authors over many years of fieldwork. Written in a highly readable fashion, this book will be a useful resource for researchers, practitioners, activists, and policy makers.

Abusive Endings

A Powerful Memoir of Coercive Control

Attachment, Representation, and Treatment

Written by a therapist who specializes in abusive men, this guide reveals how abusers interact with and manipulate children—and how mothers can help their children recover from the trauma of witnessing abuse. Can my partner abuse me and still be a good parent? Should I stay with my partner for my children's sake? How should I talk to my children about the abuse and help them heal? Am I a bad mother? Mothers in physically or emotionally abusive relationships ask themselves these questions every day. Whether it’s physical or “just” emotional abuse, whether it’s aimed at them or you, whether they see or hear it, your kids need you. This book, the first ever of its kind, shows mothers how to:

- **Protect children and help them heal emotionally**
- **Provide love, support, and positive role models, even in the midst of abuse**
- **Increase their chances of winning**

custody • Help their kids feel good about themselves “A must-read for every mother who has been abused...it offers the knowledge women need to protect their children and help them heal.”—William S. Pollack, Ph.D., author of the national bestseller Real Boys

Women, Violence and Social Change demonstrates how refuges and shelters stand as the core of the battered women's movement, providing a basis for pragmatic support, political action and radical renewal. From this base movements in Britain and the United States have challenged the police, courts and social services to provide greater assistance to women. The book provides important evidence on the way social movements can successfully challenge institutions of the State as well as salutary lessons on the nature of diverted and thwarted struggle. Throughout the book the Dobashes' years of researching violence against women is illustrated in the depth of their analysis. They maintain the tradition established in their first book, Violence Against Wives, which was widely acclaimed.

Oscar, physically and sexually abusive, stabbed his partner and two stepdaughters to death, buried the bodies, and fled the state with his two younger children. Paul, a respected investment banker, donned a Halloween mask and shot his wife and two children before turning the gun on himself. What drives individuals as different as Oscar and Paul to kill their families? Why does familicide appear to be on the rise? In Familicidal Hearts, award-winning author and sociologist Neil Websdale uncovers the stories behind 196 male and 15 female perpetrators of this shocking offense, situating their emotional styles on a continuum, from the livid coercive to the civil reputable. With highly detailed and riveting case studies, Websdale explores the pivotal roles of shame, rage, fear, anxiety, and depression in the lives and crimes of the killers. His analysis demonstrates how internal emotional conflict, against a backdrop of societal pressures, is at the root of familicide, challenging the widely accepted argument that murderers kill family members to assert power and control. Websdale contends instead that most perpetrators struggle with intense shame, many sensing that they failed to live up to the demands of modern gender prescriptions, as fathers and lovers, wives and mothers. What emerges is a compelling theory about the haunting effects of modern emotional struggles on perpetrators, controlling and upstanding alike. Captivatingly written and expertly researched, this provocative book weaves a gripping tale of modern-era "haunted hearts." Blending the social, the historical, and the emotional into a new way of making sense of a horrific crime, Familicidal Hearts is a provocative meditation on gender roles, social forces, and modern life itself.

A practical guide to coercive control and its relevance to different areas of law with a particular focus on family law, including the problems facing victims when utilising legislation, risk assessment, the link between coercive control and stalking, protective orders, legal aid, and how coercive control is relevant to family court proceedings.

Lighting for Digital Video and Television

See What You Made Me Do

“Selvaratnam very bravely and compellingly uses her personal experience to shine a light on the global crisis of violence against women. An important book for the women’s rights movement, *Assume Nothing* demonstrates that violence against women exists across race, class, economic status and education levels, and may be perpetrated by those we think of as allies! It dispels the myth that there are certain types of victims and perpetrators. It will help a lot of people, and particularly those who hesitate to identify as a victim/survivor for fear of losing their grounding both publicly and privately.”—Yasmeen Hassan, Global Executive Director, Equality Now

“This courageous and terrifying book charts the author’s descent into an abusive relationship and also her emergence from it in taut, seductive prose. Selvaratnam explains how—even as an educated, sophisticated, liberal feminist—she was enthralled by her lover’s fame and tolerated escalating personal violence. Her narrative is vivid and bracingly frank, a tour-de-force of self-revelation and, ultimately, of redemption.”—Andrew Solomon, National Book Award-winning author of *Far from the Tree* and *The Noonday Demon*

Award-winning filmmaker Tanya Selvaratnam bravely recounts the intimate abuse she suffered from former New York State Attorney General Eric Schneiderman, using her story as a prism to examine the domestic violence crisis plaguing America. When Tanya Selvaratnam met then New York State Attorney General Eric Schneiderman at the Democratic National Convention in July 2016, they seemed like the perfect match. Both were Harvard alumni; both studied Chinese; both were interested in spirituality and meditation, both were well-connected rising stars in their professions—Selvaratnam in entertainment and the art world; Schneiderman in law and politics. Behind closed doors, however, Tanya’s life was anything but ideal. Schneiderman became controlling, mean, and manipulative. He drank heavily and used sedatives. Sex turned violent, and he called Tanya—who was born in Sri Lanka and grew up in Southern California—his “brown slave.” He isolated and manipulated her, even threatening to kill her if she tried to leave. Twenty-five percent of women in America are victims of domestic abuse. Tanya never thought she would be a part of this statistic. Growing up, she witnessed her father physically and emotionally abuse her mother. Tanya knew the patterns and signs of domestic violence, and did not see herself as remotely vulnerable. Yet what seemed impossible was suddenly a terrifying reality: she was trapped in a violent relationship with one of the most powerful men in New York. Sensitive and nuanced, written with the gripping power of a dark psychological thriller, *Assume Nothing* details how Tanya’s relationship devolved into abuse, how she found the strength to leave—risking her career, reputation, and life—and how she reclaimed her freedom and her voice. In sharing her story, Tanya analyzes the insidious way women from all walks of life learn to accept abuse, and redefines what it means to be a victim of intimate violence.

A deeply researched account from an award-winning journalist that uncovers the ways in which abusers exert control in the darkest—and most intimate—ways imaginable. We fear dark alleys when in truth, home is the most dangerous place for a woman. Of the 87,000 women killed globally in 2017, more than a third (30,000) were killed by an intimate partner, and another 20,000 were killed by a family member. In the US, that rate is 2.5 women killed by their partner every day. These statistics tell us something that's almost impossible to grapple with: it's not the monster in the dark women should fear, but the men they fall in love with. In not only a searing

investigation, but a dissection of how that violence can be enabled and reinforced by the judicial system we trust to protect us, See *What You Made Me Do* carefully dismantles the flawed logic of victim-blaming and challenges everything you thought you knew about domestic and family violence.

If you think you're alone in fearing the rapist in your home - abused even while you love the perpetrator - here's a book that will open your eyes to what numerous other women are going through, and teach you about rights, boundaries and healing from the trauma caused by partner rape. A challenge to silence and social myths about What "real" rape is, with the aim of preventing it from continuing.

Eliminating violence against women globally is now seen as one of the major challenges of the twenty-first century. This book introduces a wide readership to the problem of violence against women and girls (VAWG) identified by social movements, researchers, and policymakers. It provides raw material, stories from around the world, macro data, and up-to-date knowledge on the various forms of VAWG. It highlights the intersections of VAWG with several other issues, and sets out the most promising policy and advocacy frameworks to end this violence.

Digital video students and enthusiasts must learn lighting fundamentals and techniques to enhance the visual quality of their work. Moreover, since lighting specifications for digital video differ significantly from those for analog video or film, professional videographers and cinematographers must learn how to adapt their lighting skills for this new digital medium to ensure that the final product meets broadcast standards. This complete course in digital video and television lighting begins with how the human eye and the camera process light and color, progresses through the basics of equipment and setups, and culminates with practical lessons on how to solve common problems. It features clear illustrations and real-world examples that demonstrate proper equipment use, safety issues, and staging techniques. Detailed diagrams, figures, and photos illustrate techniques that enable novices to complete basic lighting setups. This new edition also features a 16-page color insert and new chapters on interview setups and lighting for low budgets.

In *An Abusive State* puts forth a powerful argument: that the feminist campaign to stop sexual violence has entered into a problematic alliance with the neoliberal state. Kristin Bumiller chronicles the evolution of this alliance by examining the history of the anti-violence campaign, the production of cultural images about sexual violence, professional discourses on intimate violence, and the everyday

lives of battered women. She also scrutinizes the rhetoric of high-profile rape trials and the expansion of feminist concerns about sexual violence into the international human-rights arena. In the process, Bumiller reveals how the feminist fight against sexual violence has been shaped over recent decades by dramatic shifts in welfare policies, incarceration rates, and the surveillance role of social-service bureaucracies. Drawing on archival research, individual case studies, testimonies of rape victims, and interviews with battered women, Bumiller raises fundamental concerns about the construction of sexual violence as a social problem. She describes how placing the issue of sexual violence on the public agenda has polarized gender- and race-based interests. She contends that as the social welfare state has intensified regulation and control, the availability of services for battered women and rape victims has become increasingly linked to their status as victims and their ability to recognize their problems in medical and psychological terms. Bumiller suggests that to counteract these tendencies, sexual violence should primarily be addressed in the context of communities and in terms of its links to social disadvantage. In an Abusive State is an impassioned call for feminists to reflect on how the co-optation of their movement by the neoliberal state creates the potential to inadvertently harm impoverished women and support punitive and racially based crime control efforts.

When you are showered with attention, it can feel incredibly romantic and can blind you to hints of problems ahead. But what happens when attentiveness becomes domination? In some relationships, the desire to control leads to jealousy, threats, micromanaging--even physical violence. If you or someone you care about are trapped in a web of coercive control, this book provides answers, hope, and a way out. Lisa Aronson Fontes draws on both professional expertise and personal experience to help you:

- *Recognize controlling behaviors of all kinds. *Understand why this destructive pattern occurs.
- *Determine whether you are in danger and if your partner can change. *Protect yourself and your kids.
- *Find the support and resources you need. *Take action to improve or end your relationship. *Regain your freedom and independence.

One in three women and one in four men have experienced some form of physical violence by an intimate partner, according to the National Coalition Against Domestic Violence. *Interpersonal Aggression: Complexities of Domestic and Intimate Partner Abuse* is a practical guide that provides necessary information for anyone who knows or works with victims/survivors -- attorneys, law enforcement, social workers and therapists, family and friends concerned about loved ones, members of the judiciary and clergy-- basically any helping profession. Author CarolAnn Peterson takes the reader through the various aspects of a victim's encounters, the history of domestic abuse, the legal system and law enforcement, workplace domestic violence, religion, the intersection of the LGBTQ+ community and intimate partner abuse, domestic abuse in the military, how culture influences victims' decisions, batterers/abusers and intervention programs/counseling, and the impact of domestic violence on health

and mental health of victims and children. Dr. Peterson examines why victims stay and when they leave, what help is available, why abusers abuse, and what happens to the children, among other important topics. She offers comfort to anyone working with victims of domestic and intimate partner abuse -- no matter the role they play.

Coercive Control

The Impact of Domestic Violence and Substance Abuse in Custody and Divorce

Helen Walmsley-Johnson's first husband controlled her life, from the people she saw to what was in her bank account. He alienated her from friends and family and even their three daughters. Eventually he threw her out, and she painfully began to rebuild her life. Then, divorced and in her early forties, she met Franc. For ten years she would be in his thrall, even when he too was telling her what to wear, what to eat, even what to think. This is Helen's candid memoir of how she was trapped by a smiling abuser, not once but twice. It is a vital guide to recognizing, understanding and surviving this sinister form of abuse and its often terrible legacy - and an account of how one woman found the courage to walk away. Reassesses thirty years of domestic violence research and demonstrates three forms of partner violence, distinctive in their origins, effects, and treatments

You've forgiven a thousand times. You've bent over backwards to make your partner feel loved and accepted. But the only reward for your loyalty has been anger, indifference, infidelity, or abuse. Your spouse may even be ready to walk out the door. Do you feel like all is lost? Are you ready to give up? There IS still hope. Dr. James Dobson's "tough love" principles have proven to be uniquely valuable and effective. Unlike most approaches to marriage crisis, the strategy in this groundbreaking classic does not require the willing cooperation of both spouses. Love Must Be Tough offers the guidance that gives you the best chance of rekindling romance, renewing your relationship, and drawing your partner back into your arms.

Surveys reveal that domestic abuse is more commonplace among teenagers and young adults than older populations, yet surprisingly little is written about young men's involvement in it. Reporting on a three-year study based in the UK, this book explores young men's involvement in domestic abuse, whether as victims, perpetrators or witnesses to violent behaviors between adults. Original survey data, focus group material and in-depth biographical interviews are used to make the case for a more thoroughgoing engagement with the meanings young men come to attribute to violent behavior, include the tendency among

many to configure violence within families as "fights" that call for acts of male heroism. The book also highlights the dearth of services interventions for young men prone to domestic abuse, and the challenges of developing responsive practice in this area. Each section of the book highlights further online resources that those looking to conduct research in this area or apply its insights in practice can draw upon.

Power, Control and Domestic Abuse

The Entrapment of Women in Personal Life

Men who Murder Their Intimate Partners

This study of domestic homicide in America examines the lives and motivation of men who kill their intimate partners. Research into children and domestic violence in recent years has emphasized the importance of giving positive support to a non-abusive parent for effective child protection. But what exactly does positive support involve? Based on findings from six primary research studies carried out by the authors themselves, as well as other published research, this book reveals how undermining mothering - specifically, family courts and social work agencies blaming mothers for their own victimization - plays a key role in locking women into abusive relationships and exacerbating the damage done by domestic violence. It explores the principle message drawn from the research: that the needs of individual victims should inform risk assessment and safety planning by welfare practitioners. Case studies are used to explore key issues that should be considered during assessment and planning, such as the psychological impact on children of living in an abusive household; mother and child protection from an abusive partner during court proceedings; and child contact with an abusive parent. *Mothering Through Domestic Violence* is essential reading for practitioners working in the fields of family and child welfare, family courts and policy makers.

This text focuses on violent fathering and discusses research in the context of domestic violence. It examines fathers' perceptions of their domestic violence and its impact on children, their relationships with children and their parenting practices. It also recommends ways that policy and practice can be improved.

Domestic Violence as State Crime presents a provocative challenge to the way that domestic violence is understood and addressed. Underpinned by a radical feminist perspective, the central argument of this book is that domestic violence against women constitutes a patriarchal state crime. By analysing the international, collective, structural, and institutional dimensions of this harm, the author outlines a spectrum of state complicity ranging from passive bystander to active producer, participant, and perpetrator. The wide-ranging analysis in this book draws on data from comparable liberal-democratic contexts including Australia, the United States, and the United Kingdom, in order to comprehensively show how domestic violence state criminality functions in practice – even in the present and in supposedly progressive contexts. This analysis provides valuable insight into why this epidemic-scale crime is ever resistant to a diversity of contemporary interventions. Drawing its concepts into a cohesive whole, the book then posits an overarching feminist typological theory of domestic violence as state crime. It also considers how domestic violence might be addressed if we confront its state crime dimensions and adopt a more holistic and transformative approach to remedy, redress, prevention, and justice. An accessible and compelling read, *Domestic Violence as State Crime* offers an innovative

scholarly and activist contribution to the study of violence against women, feminism, criminology, and the broader critical study of law, politics, and society. It will appeal to anyone who is interested in thinking differently about domestic violence and the state.

Coercive Relationships

Overcoming Coercive Control in Your Intimate Relationship

Family Violence and the Criminal Law

A Feminist Framework for Challenge and Change

The Emotional Styles of 211 Killers

In Control

*The devastation of a controlling relationship has to be endured to be believed. From the constant fear of upsetting your spouse, the walking on eggshells in case you've done or said something wrong, or the relentless feeling of anxiety, a controlling partner will beat you down until you no longer recognize yourself. Coercive control will see an abuser dominate their victim's life; from the food they eat, the people they see, the places they can go and the things they can say. A controlling partner, through fear and intimidation, will seek to ensure their victim is subdued, to the point of accepting any and all abuse that's fired their way. By manipulation, gaslighting, lies, and hurtful insults, the abuser will make their victim a willing puppet on a string, ready to be utilized how the controlling spouse sees fit. Coercive control is seldom talked about in comparison to other forms of abuse, yet it's so commonplace in relationships. Plenty of victims of this type of behavior may not even be aware that's it's full-blown abuse. Many more see controlling behavior as their partner's way of showing they 'care'. In order to shed light on this topic, and reach out to those who need help in understanding and overcoming a controlling partner, I have created this book as their starting point. I was shackled to a malignant narcissist for many years of my life, being controlled and manipulated, day-in, day-out. As a proud survivor of abuse, I feel obligated to help others in their journey towards getting their power back and recovering from the cruel effects of an abusive relationship. This book will cover the following: - what coercive control is - the devastating effects of a controlling relationship - financial coercion - breaking the spell of abuse - coercive control after separating I use my own experiences, as well as those of the survivors I've connected with via *Escape the Narcissist*, to help piece together the things you need to know about this type of abusive relationship.*

Drawing on cases, Stark identifies the problems with our current approach to domestic violence, outlines the components of coercive control, and then uses this alternate framework to analyse the cases of battered women charged with criminal offenses directed at their abusers.

Battering by men is the most significant cause of injury to women in our society. It is also a major cause of child abuse, murder, substance abuse and female suicide attempts. This volume, the result of 15 years of research conducted by the authors - a social worker and physician respectively - explores the theoretical perspectives of this dramatic expression of male domination, together with health consequences for women and clinical interventions. The authors found that the traditional resources women turn to for help reinforce male domination: the medical, psychiatric and behavioural problems presented by battered women arise because male strategies of coercion, isolation and control converge with discriminatory structures.

This book addresses the issue of domestic violence against women, drawing on research findings, policy developments and current debates to contextualise its alarming prevalence and to propose informed ways of addressing, through training and practice, the needs of both victims and perpetrators in current social and related care provision.

Violent Fathering and the Risks to Children

Rethinking Violence against Women

A Story of Intimate Violence

The Need for Change

Real Rape, Real Pain

Coercive Control provides a beacon for survivors of partner abuse. Parker's nonjudgmental, empathic voice offers knowledge gleaned from years of experience. Survivors gain answers to frequently asked questions: • Am I being abused? • Why do they hurt me? • Why do I feel so crazy? • What can I change? • Why do they believe they should control us? • How do I recognize abuse of power? • How do I heal? Each chapter contains illustrative vignettes and suggestions for reflection to assist readers in discovering what they want. Coercive Relationships lifts the private shame survivors feel by connecting their abusers' actions to societal values and beliefs that permit all forms of violence.

Helping troubled parents to raise their children adequately is of crucial importance for parents, their children and society at large. Distressed parents have themselves often been endangered and, as a consequence, sometimes endanger their children either through maltreatment or through the effects of parental psychiatric disorder. Raising Parents explains how that happens and clusters parents in terms of the psychological processes that result in maladaptive childrearing. The book then delineates DMM Integrative Treatment in terms of assessment, formulation, and treatment. New formulations are offered for problems that have resisted treatment and cases demonstrate how the ideas can be applied in real treatment settings. The book closes with 10 suggestions for improving professionals' responses to troubled families and endangered children. This edition of Raising Parents introduces DMM Integrative Treatment and demonstrates how to use it with vulnerable families. DMM Integrative Treatment is an interpersonal process and this book will be essential reading for clinicians from all disciplines, including psychiatry and psychology, social work, nursing and all types of psychotherapy.

Traumatic Divorce and Separation integrates the conflicting mental health perspectives concerning trauma theory and the study of divorce, in what the author has termed "traumatic divorce" -- that is, divorce complicated by the high-risk factors of domestic violence, mental illness, and/or substance abuse. The text's interdisciplinary discussion examines issues of financial disparities for women following divorce, traumatic

symptoms in children and adults, and the legal controversies about the admissibility of psychological theories related to abuse. The author also addresses: domestic violence as a gendered crime against women; the need for a trauma-informed judicial response; and the need for a systemic judicial response that incorporates an understanding of domestic violence and child maltreatment to provide services and protections. The book is an invaluable resource for professionals and academics in social work, forensic psychology, law, and related mental health fields, as well as academics interested in gender based discrimination in the courts.
