Collects Ultimate Spider-Man (2000) #1/2 & #28-39. Collecting the groundbreaking third year of ULTIMATE SPIDER-MAN in one colossal collection! Spider-Man beat Kraven. He defeated Dr. Octopus. He even survived a serious scrap with an artificially enhanced Green Goblin. As it turns out, though, his worst enemy is a simple crook in a Spider-Man suit. That's all it takes to ruin Spider-Man's reputation, suddenly painting Peter Parker's alter ego as Public Enemy No. 1...and changing his life forever. Then: Spider-Man's ultimate villain gets the Ultimate treatment! After reuniting with his childhood friend Eddie Brock, Peter discovers a secret about their fathers' pasts...a black liquid that can transform into a protoplasmic bodysuit, curing any illness and enhancing the wearer's strength and abilities. But when Peter tries to continue his father's work, he accidentally becomes encased in the murky liquid and becomes nearly unstoppable...but at a terrible price.

What did it mean to be a man in colonial Latin America? More specifically, what did indigenous and Iberian groups think of men who had sexual relations with other men? Providing comprehensive analyses of how male homosexualities were represented in areas under Portuguese and Spanish control, Infamous Desire is the first book-length attempt to answer such questions. In a study that will be indispensable for anyone studying sexuality and gender in colonial Latin America, an esteemed group of contributors view sodomy through the lens of desire and power, relating male homosexual behavior to broader gender systems that defined masculinity and femininity.

Norms of Word Association contains a heterogeneous collection of word association norms. This book brings together nine sets of association norms that were collected independently at different times during a 15-year period. Each chapter is a self-contained unit. The order in which the norms are presented is arbitrary, although an attempt is made to group together norms that seem to belong together. The 1952 Minnesota norms are presented first, due to "age" and in recognition of the fact that a number of the norms that follow are direct outgrowths of this work. The next three norms in this collection are responses to the Russell-Jenkins stimuli obtained from subjects representing different linguistic communities. A summary of association norms collected from British and Australian subjects are reported along with association norms from German and French college students and French workmen. Four sets of norms that are not directly related to the 1952 Minnesota collection are included. The text will be of interest to historians and researchers in the field of verbal learning and verbal behavior.

Torque Technical Tips books are a must for Range Rover Classic enthusiasts. There are two volumes in this series, which totals over 700 pages of expert technical tips for Land Rover's Range Rover Classic - spanning from 1977 to 1992 and have been collated from "Torque", the club magazine of one of the oldest Range Rover Clubs around - the Range Rover Club of Australia, Victoria Branch. Volume 1 has 373 pages and takes tips and articles dated between 1977 and 1986., Contributions come from a mix of Land Rover mechanics and club enthusiasts and include: how these wonderful cars work; getting home if you break down in the middle of nowhere (we call it bush-mechanics, in Australia); modifications; off-road driving and recovery techniques; and many more. The wealth of knowledge from the club that was formed in 1977 is immense; it's still going strong and still has some of the original members.

For the preconquest Maya, sexuality was a part of ritual discourse and performance, and all sex acts were understood in terms of their power to create, maintain, and destroy society. As postconquest Maya adapted to life under colonial rule, they neither fully abandoned these views nor completely adopted the formulation of sexuality prescribed by Spanish Catholicism. Instead, they evolved hybridized notions of sexual desire, represented in the figure of the Virgin Mary as a sexual goddess, whose sex acts embodied both creative and destructive components. This highly innovative book decodes the process through which this colonization of Yucatan Maya sexual desire occurred. Pete Sigal frames the discussion around a series of texts, including the Books of Chilam Balam and the Ritual of the Bacabs, that were written by seventeenth and eighteenth century Maya nobles to elucidate the history, religion, and philosophy of the Yucatecan Maya communities. Drawing on the insights of philology, discourse analysis, and deconstruction, he analyzes the sexual fantasies, fears, and desires that are presented, often unintentionally, in the "margins" of these texts and shows how they illuminate issues of colonialism, power, ritual, and gender.

The third book in the bestselling Dan 'Spider' Shepherd series. Even deadlier than terrorists . . . are the men trying to stop them. People-smuggling, counterfeit currency and attempted murder. It's all in a day's work for undercover cop Dan 'Spider' Shepherd. But what starts as a run-of-the mill investigation quickly turns into a matter of life and death when he uncovers a terrorist cell on a mission of death and destruction. The target: hundreds of passengers on a cross-channel train deep below the English Channel.

With the clock ticking and the explosives primed, Shepherd and his colleagues have to decide just how far they are prepared to go to save innocent lives. And they realise that to avoid catastrophe, they have to be even more merciless than the terrorists.

"This text explores mankind's origins, as considered and examined in light of nature, with particular emphasis on the following parts and assertions: I. That according to the light of nature and natural reason, the visible world was not eternal, but had a beginning; II. That if there could be any imaginable doubt thereof, yet by the necessary evidence of natural light it does appear that mankind had a beginning, and that the successive generations of men were in their original form; III. That this truth is evident by demonstrative reason and arguments; IV. That there are moral evidences of the truth of this assertion, which are herein particularly expanded and examined; V. That those great philosophers that asserted this origination of mankind, both ancient and modern, that rendered it by hypothesis different from that of Moses, were mistaken--here the hypotheses of Aristotle, Plato, and others are examined, and the absurdity and impossibility of their theories are detected; VI. That the current author's theory explaining the creation of man and of the world, in general, abstractly considered without relation to the divine inspiration of the writer, is according to reason, and preferable to the sentiments of other philosophers; and VII. That the author has concluded the whole of this work with certain corollaries and deductions, necessarily flowing from the things thus asserted, as well touching the existence, the wisdom, power, and providence of Almighty God, as touching both the duty and happiness of mankind"--Foreword.

This book is one of twelve books of the Black Children Speak series. The books are compiled from the interviews taken from slaves by the interviewers of the Federal Writers Project of the Works Progress Administration (WPA) in 1936/1938. Most of the ex-slaves giving the interviews were children during slavery and gave interviews of their experiences and insights about living on plantations. The ex-slaves answered questions on all aspects of the plantations in seventeen states of the United States before the Civil War. African-Americans were freed from slavery after the Civil War in 1865. The series is dedicated to all people.
