A completely revised, redesigned and updated edition of the number one guide to home wiring and lighting, now in handy paperback format. Contains comprehensive and up-to-date information on the new electrical regulations.

Wiring and Lighting provides a comprehensive guide to DIY wiring around the home. It sets out the regulations and legal requirements surrounding electrical installation work, giving clear guidelines that will enable the reader to understand what electrical work they are able to carry out, and what the testing and certification requirements are once the work is completed. Through step-by-step diagrams and photos, the book covers wiring for a wide range of tasks by examining the components of electrical systems and installations, including: different types of circuits; types of cables and cable installation under floors and through joists; isolating, earthing and bonding; accessory boxes and fixings; voltage bands; detailed advice on safety such as manual handling, working at height and electrical shock risk. Finally, schedules for inspection, testing and certification, and relevant sections of the Building Regulations are covered. Wiring and Lighting is fully updated in line with the 18th edition wiring regulations.

*Here is a description of "More Than A Game" in the words of the protagonist, Carter Mason: I know what I look like: a stereotype; a fatherless black kid pinning his hopes on a football scholarship. But I've got the skills and the smarts to back it up. One night, and an innocent dance with a white girl, and my whole world and all my dreams start to unravel. The killing begins. People are looking at me. And the circle of people I can trust is getting smaller by the day. I can feel the net closing in. I have to find the killer before he finds me. I have to play the best football of my life. I have to stay alive long enough to get a ticket out of hell.*

Collins Handy DIY

Provides an extensive home repair guide for both interior and exterior home repairs, including installing windows, laying floors, and building fences.

Could it be magic...? Chemical experiments are not only essential for teaching chemistry, they also fascinate the audience. This book is an excellent source of inspiration for every 'magic show' and classroom demonstration. In a very playful manner, the experiments described here open up the manifold, colourful, and sometimes ear-splitting world of chemistry. Ranging from unusual (but useful) properties of matter to the illustration of the greenhouse effect, this masterful chemist's 'cookbook' is highly suitable for preparing demonstrations in front of larger audiences. Building a bridge between science and the arts, every experiment is introduced by inspiring citations from prose and poetry, which makes reading and experimenting equally enjoyable. The remarkable achievement of Herbert Roesky's and Klaus M ockel's book is the linkage it achieves between the world of the human spirit, expressed in literature and historical continuity, and the art of chemical demonstration. One expects Goethe to move freely in the pages of 'Chemical Curiosities', but Whitman, Nietzsche, Thomas Mann, Salvador Dalí, Montaigne and the Prophet Jeremiah!... The chemical and literary strands of this book are so ably intertwined.' Roald Hoffmann

***Non-fiction Biography / history Ireland - War of Independence/Civil War Description: An in-depth study of the death of Michael Collins, hero of the 1916 Easter Rising, and leader of Ireland's War of Independence. This book offers a startling new perspective on one of history's most notorious unsolved mysteries: his fatal shooting in 1922, while Commander-in-Chief of newly-independent Ireland. Its controversial reconstruction of events at the Beaulieu mBath may be shocking to some: yet demonstrably fits the known facts and eyewitness accounts. This is the first book on this famous "cold case" in decades; carrying on where John Feehan's landmark edition of 1991 left off. It presents the most complete overview of the evidence ever published; as well as an itemized catalogue of the various witnesses' mutual contradictions and corroborations."***

*Hey kids, do you want to know how to make all-stars for your baseball league? Or parents, do you feel like the coaches keep passing your child up? Well no more! Or coaches, want drills and ways to motivate your players to get better? Coach Andy Collins is going to tell you everything he knows from his 35 years of youth and adult coaching and watching what works and what doesn't work. It's chock-full of ideas in 86 pages. He'll cover: " How your league chooses all-stars " What all-star selectors are really looking for " 7 tried and true methods of getting better at baseball " But more importantly, little known ways to get the people picking the team to notice you " And how to beat the "politics" that seem to get in the way Year after year kids sit in the stands crying after the all-star teams are announced and they weren't one of the players that were chosen. At the same time the students I've trained do make these same all-star teams. It was then I realized I had the information that the kids in the stands and their parents and coaches were looking for. Wherever there are kids around the world that play youth baseball, there are kids that long to make the league's all-star team. Every year it's the same, kids that desperately want to have their name called out (or see it announced on the list) don't make it, and a little bit of them is hurting deep inside; and they don't know why they were not picked. Little did they know that they could have fairly accurately predicted their chances almost from day one of when the season starts. And if they knew what you're about the find out, they could improve enough in skill in the eyes of the all-star selectors as to be a better player or even make the all-star team. The good news is that in this book, there is a way to learn how to make the all-star team for the next upcoming season; and if not then, the following year (if you're willing to listen and follow the advice I give). While I have written this for parents and coaches to learn how this process works and how they can help these youngsters achieve their dreams, this is mostly a book written for the kid who wants to make all-stars, not a book for the parent who wants their kid to make all-stars (there is a difference). And it will be in that voice that this book will be written.*

Are morals always relative? Are private actions—among consenting adults—always beyond the law? Or are there some behaviors which so weaken a society that common beliefs about right and wrong must be enforced to protect the common good? In opposing the decriminalization of private acts of homosexuality in Britain, Patrick Devlin maintained that not only is it reasonable to allow popular morality to influence lawmaking, it is imperative: "... For a society is not something that is kept together physically; it is held by the invisible bonds of common thought." Some sidestep this controversial issue by asserting that the law should not be used to enforce any morality. Others invoke John Stuart Mill's doctrine that the only purpose for laws governing any member of society is to prevent harm to others, chiefly physical harm. But, Devlin argued, while breaches of shared morality do not cause harm to other individuals in the way that murder and assault do, they do harm society by undermining its moral structure. Patrick Devlin (1905-1992) studied history and law at Cambridge University and became a successful lawyer.

In the tradition of his bestselling CURTIN and CHIFLEY, David Day's exhaustive biography of one of our most fascinating prime ministers. Paul Keating was one of the most significant political figures of the late twentieth century, firstly as treasurer for eight years and then Prime Minister for five years. Although he has spent all of his adult life in the public eye, Keating has eschewed the idea of publishing his memoirs and has discouraged biographers from writing about his life. Undaunted, best-selling biographer David Day has taken on the task of giving Keating the biography that he deserves. Based on extensive research in libraries and archives, interviews with Keating's former colleagues and associates, and walking the tracks of Keating's life, Day has painted the first complete portrait of Paul Keating, covering both the public and private man.

One of a series of step-by-step instructional DIY guides. This book covers wiring and lighting, from changing a fuse to rewiring a house.
