

## Common Core Pacing Guide For 6th Grade

Balancing Mathematics Instruction is a guide providing an effective strategy for schools or districts to change math instruction in preparation for the Common Core State Standards. These practices emphasize a student-centered classroom environment that promotes four instructional areas to “balance” out textbook- and standards-driven teaching: computational strength, number sense, problem solving, and conceptual understanding. The accompanying DVD is an integral visual resource illustrating the practices in action in actual classrooms. Writing instruction expert Warren Combs presents a step-by-step plan for teaching writing workshops that are aligned to the Common Core State Standards. The book is filled with practical mini-lessons, strategies, and tools for every stage of the writing process, from prewriting through publication. Scripting is provided, to show teachers how to model each strategy for students. In addition, Dr. Combs shows how teachers can use the following elements: The concepts Voice, Pictures, and Flow, to help students understand the essential elements of writing The words Invite, Model, Write, Look, and Learn, to model effective writing for students and have them learn from your example Revision strategies such as Jot and Blend, Combining Sentences, Writing Leads, and Writing Closes Peer revision using Peer-Assisted Learning Systems (PALS) Student self-assessment rubrics The book also includes scoring guides and pacing guides, to help teachers implement writing workshops more easily. As Dr. Combs demonstrates, you can give workshops more structure while still making writing come alive for your students.

Eureka Math is a comprehensive, content-rich PreK–12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide, Grade 3 provides an overview of all of the Grade 3 modules, including Properties of Multiplication and Division and Solving Problems with Units of 2, 5 and 10; Place Value and Problem Solving with Units of Measure; Multiplication and Division with Units of 0, 1, 6–9, and Multiples of 10; Multiplication and Area; Fractions as Numbers on the Number Line; and Collecting and Displaying Data.

Card deck contains a set of durable, laminated cards. They can be used with the Everyday Mathematics card deck activity books or the Everyday Mathematics Games kit. The two-sided card deck is used throughout Everyday Mathematics. On one side, the cards show a number deck with 4 cards for each of the numbers 0 through 10, and 1 card for numbers 11 through 20. Numbers are printed in blue or black to easily represent positive and negative integers. The reverse sides of number cards 1-10 show fractions represented in a variety of ways.

**The first books to present specific guidance for teaching the Common Core State Standards Forty-three states plus the District of Columbia and the U.S. Virgin Islands have signed on to adopt the Common Core State Standards (CCSS). The need for curriculum guides to assist teachers in helping students meet these standards has become imperative. Created by teachers, for teachers, the research-based curriculum maps in this book present a comprehensive, coherent sequence of thematic units for teaching the skills outlined in the CCSS for English language arts in Grades K-5. The maps address every standard in the CCSS, yet are flexible and adaptable to accommodate diverse teaching styles. Each grade is broken down into six units that include focus standards, suggested works, sample activities and assessments, lesson plans, and more Teachers can use the maps to plan their year and craft their own more detailed lesson plans Any teacher, school, or district that chooses to follow the Common Core maps can be confident that they are adhering to the standards.**

**In So What Do They Really Know? Cris Tovani explores the complex issue of monitoring, assessing, and grading students' thinking and performance with fairness and fidelity. Like all teachers, Cris struggles to balance her student-centered instruction with school system mandates. Her recommendations are realistic and practical; she understands that what isn't manageable isn't sustainable. Cris describes the systems and structure she uses in her own classroom and shows teachers how to use assessments to monitor student growth and provide targeted feedback that enables students to master content goals. She also shares ways to bring students into the assessment cycle so they can monitor their own learning, maximizing motivation and engagement. So What Do They Really Know? includes a wealth of information: Lessons from Cris's classroom Templates showing how teachers can use the workshop model to assess and differentiate instruction Student work, including samples from linguistically diverse learners, struggling readers, and college-bound seniors Anchor charts of student thinking Ideas on how to give feedback Guidelines that explain how conferring is different from monitoring Suggestions for assessing learning and differentiating instruction during conferences Advice for managing ongoing assessment Cris's willingness to share her own struggles continues to be a hallmark of her work. Teachers will recognize their own students and the challenges they face as they join Cris on the journey to figure out how to raise student achievement.**

**In Writers Are Readers, the mutually supportive roles of reading and writing are made visible through the idea of "flipsides;" how a reader's insights can be turned around to provide insights into his own writing, and vice versa. Lester and Reba's trademark engaging style is woven throughout chapters full of sample lessons, student writing samples, and recommended texts for maximizing the flipped concept across the year. "Leading the student to understand what he did as a reader can become a lens that brings into focus what the writer had to do before a reader ever saw the page," they write. Discover fresh new ways to turn reading strategies into writing opportunities that your students will be excited about and deeply understand.**

Historically, teachers have exercised considerable autonomy in the day-to-day learning that occurs in their classrooms. Now, it is growing increasingly rare for a teacher to experience this type of professional freedom. In response to high-stakes testing, national and state academic content standards, and most recently the common core standards, pacing guides are one of the more recent devices schools are using to implement and monitor curriculum. The purpose of this research project is to investigate teacher opinion toward these pacing guides. An online survey called the Pacing Guide Survey was delivered to secondary regular and special education teachers in core subject areas of mathematics, science, social studies, and language arts. The teachers were asked about whether or not they use pacing guides, their attitude and comfort level in using pacing guides, as well as:

Information concerning the population of their high school, such as demographics, enrollment, and single or multiple high schools;

Building level factors, such as professional development initiatives, methods of curriculum monitoring, and pacing guide development and revisions processes; teacher factors, such as years teaching, years using pacing guides, confidence in content area, and educational background. Administrators were also interviewed to form a complete picture of pacing guide development and implementation in the secondary education environment. Quantitative data were analyzed using bivariate Spearman's rank order correlation and qualitative data were analyzed using a combination of thematic data analysis and quasi-

statistical methods. Recommendations based on the data collected are:

Teachers should be provided with the flexibility to address student needs in the classroom. Teacher input into pacing guide development, implementation, and revision process is necessary to ensure that student needs are addressed. Team autonomy is key and teacher teams need to be provided with the necessary support structure to provide meaningful learning experiences for their students.
