

## Community Garden Project Proposal Thurgood Marshall College

Race and Real Estate brings together new work by architects, sociologists, legal scholars, and literary critics that qualifies and complicates traditional narratives of race, property, and citizenship in the United States. Rather than simply rehearsing the standard account of how blacks were historically excluded from homeownership, the authors of these essays explore how the raced history of property affects understandings of home and citizenship. While the narrative of race and real estate in America has usually been relayed in terms of institutional subjugation, dispossession, and forced segregation, the essays collected in this volume acknowledge the validity of these histories while presenting new perspectives on this story. Explores the long legacy of school segregation in the United States, showing how the famous Brown decision broke the back of legalized Jim Crow, which was quickly replaced by another form of segregation.

The fascinating, forgotten story of the 1970s attempt to build a city dedicated to racial equality in the heart of "Klan Country" In 1969, with America's cities in turmoil and racial tensions high, civil rights leader Floyd McKissick announced an audacious plan: he would build a new city in rural North Carolina, open to all but intended primarily to benefit Black people. Named Soul City, the community secured funding from the Nixon administration, planning help from Harvard and the University of North Carolina, and endorsements from the New York Times and the Today show. Before long, the brand-new settlement - built on a former slave plantation - had roads, houses, a health care center, and an industrial plant. By the year 2000, projections said, Soul City would have fifty thousand residents. But the utopian vision was not to be. The race-baiting Jesse Helms, newly elected as senator from North Carolina, swore to stop government spending on the project. Meanwhile, the liberal Raleigh News & Observer mistakenly claimed fraud and corruption in the construction effort. Battered from the left and the right, Soul City was shut down after just a decade. Today, it is a ghost town - and its industrial plant, erected to promote Black economic freedom, has been converted into a prison. In a gripping, poignant narrative, acclaimed author Thomas Healy resurrects this forgotten saga of race, capitalism, and the struggle for equality. Was it an impossible dream from the beginning? Or a brilliant idea thwarted by prejudice and ignorance? And how might America be different today if Soul City had been allowed to succeed?

Describes the Justice's early life in a segregated Baltimore, his work as a civil rights attorney, his record on the bench, and his retirement

Activist Architecture is an edited volume bringing together some of the most creative minds working in the world of community design and socially engaged practice. It asserts that community design centers and other socially engaged practices expand the influence built environmental professions have on culture and society. These practices work under the premise that designers should expand their clientele, where they work, and the types of projects they engage. This does not mean that design centers exclude people who typically build or hire an architect, urban designer, landscape architect, or planner. Design centers include more people, more programs, and more geographies in the process. They are advocates for people who are typically left out of design and place-making decisions. Design centers widen the undertaking beyond some people to include all (or more) people. While looking back over the past 50+ years, Activist Architecture positions the philosophy and practice of community design centers for today and tomorrow. The editors of Activist Architecture put together both a "why-to" and "how-to" guide for establishing and operating a community design center.

Lesser Feasts and Fasts has not been updated since 2006. This new edition, adopted at the 79th General Convention (resolution A065), fills that need. Biographies and collects associated with those included within the volume have been updated; a deliberate effort has been made to more closely balance the men and women represented within its pages.

How do language and thought connect to things in the world? John Hawthorne and David Manley offer an original and ambitious treatment of the semantic phenomenon of reference and the cognitive phenomenon of singular thought, leading to a new unified account of definite and indefinite descriptions, names, and demonstratives.

With intelligence, insight, and humor, Odette Harper Hines describes her life—a life that reversed the pattern of the Great Migration by beginning in prosperity in the urban North and moving into the small-town South. Recorded by Judith Rollins over eight years, this intimate narrative is an unusual collaboration between two African American women who represent two generations of civil rights activists. Born in New York into a comfortable family, Hines' activism began in the Abyssinian Baptist Church in her teens and continued throughout her life as she witnessed the Great Depression in Harlem, worked on the WPA Writers Project, became publicity director of the NAACP, and volunteered for the Red Cross in Europe during WWII. When she moved to Louisiana in 1946, she continued to challenge racial injustice and risked her life to house civil rights workers in the early 1960s (Rollins, among them). She later started and directed the Headstart Program in her parish. Throughout this narrative, Hines describes her relationships with such figures as Mary McLeod Bethune, Adam Clayton Powell, Walter White, Thurgood Marshall, Ella Baker, Marcus Garvey, Claude McKay, Ralph Ellison, and many others. Yet Hines' memoir is not only about her public life. She courageously reveals her personal life and private pain. Twenty-eight photographs—

mostly from Hines' family album—accentuate this oral history that is, as Rollins states in her Introduction, "a complex and textured portrait of an extraordinary twentieth century American woman." Author note: Judith Rollins is Associate Professor of Africana Studies and Sociology at Wellesley College, and the author of *Between Women: Domesticity and Their Employers* (Temple).

Continuous Productive Urban Landscapes

From Bauhaus to Our House

***An account of the struggles of a Supreme Court justice both on and off the bench and his fight for racial equality***

***This book on urban design extends and develops the widely accepted 'compact city' solution. It provides a design proposal for a new kind of sustainable urban landscape: Urban Agriculture. By growing food within an urban rather than exclusively rural environment, urban agriculture would reduce the need for industrialized production, packaging and transportation of foodstuffs to the city dwelling consumers. The revolutionary and innovative concepts put forth in this book have potential to shape the future of our cities quality of life within them. Urban design is shown in practice through international case studies and the arguments presented are supported by quantified economic, environmental and social justifications.***

***#1 NEW YORK TIMES BESTSELLER • A dramatic expansion of a groundbreaking work of journalism, *The 1619 Project: A New Origin Story* offers a profoundly revealing vision of the American past and present. ONE OF THE BEST BOOKS OF THE YEAR: *The Washington Post*, *NPR*, *Esquire*, *Marie Claire*, *Electric Lit*, *Ms. magazine*, *Kirkus Reviews*, *Booklist****  
***In late August 1619, a ship arrived in the British colony of Virginia bearing a cargo of twenty to thirty enslaved people from Africa. Their arrival led to the barbaric and unprecedented system of American chattel slavery that would last for the next 250 years. This is sometimes referred to as the country's original sin, but it is more than that: It is the source of so much that still defines the United States. The *New York Times Magazine's* award-winning "1619 Project" issue reframed our understanding of American history by placing slavery and its continuing legacy at the center of our national narrative. This new book substantially expands on that work, weaving together eighteen essays that explore the legacy of slavery in present-day America with thirty-six poems and works of fiction that illuminate key moments of oppression, struggle, and resistance. The essays show how the inheritance of 1619 reaches into every part of contemporary American society, from politics, music, diet, traffic, and citizenship to capitalism, religion, and our democracy itself. This is a book that speaks directly to our current moment, contextualizing the systems of race and caste within which we operate today. It reveals long-glossed-over truths around our nation's founding and construction—and the way that the legacy of slavery did not end with emancipation, but continues to shape contemporary American life. ***Following on *Making Civil Rights Law*, which covered Thurgood Marshall's career from 1936-1961, this book focuses on Marshall's career on the Supreme Court from 1961-1991, where he was first Afro-American Justice. The first book on Justice Thurgood Marshall's years on the Supreme Court based on a comprehensive review of the Supreme Court papers of Justices Marshall and William J. Brennan, this work describes Marshall's special approach to constitutional law in areas ranging from civil rights and the death penalty to abortion and poverty. It also describes the Supreme Court's operations during Marshall's tenure, the relations among the justices, and the particular roles played by Chief Justice Warren Burger, Justice Brennan, and Justice Antonin Scalia. The book locates the Supreme Court's actions from 1967 to 1991 in a broader historical and political context, explaining how Marshall's liberalism became increasingly isolated on a Court influenced by nation's drift in a more conservative direction.***

Simple Justice is the definitive history of the landmark case *Brown v. Board of Education* and the epic struggle for racial equality in this country. Combining intensive research with original interviews with surviving participants, Richard Kluger provides the fullest possible view of the human and legal drama in the years before 1954, the cumulative assaults on the white power

structure that defended segregation, and the step-by-step establishment of a team of inspired black lawyers that could successfully challenge the law. Now, on the fiftieth anniversary of the unanimous Supreme Court decision that ended legal segregation, Kluger has updated his work with a new final chapter covering events and issues that have arisen since the book was first published, including developments in civil rights and recent cases involving affirmative action, which rose directly out of *Brown v. Board of Education*.

Honoring the fiftieth anniversary of *Brown v. Board of Education*, a leading civil rights advocate and author of the historic Supreme Court brief recounts the triumphs, tragedies, setbacks, and continuing challenges of the civil rights movement.

Conquer the Soil profiles 45 hidden figures of horticulture—the Black men and women whose accomplished careers in the plant world are little known or

untold. Among them are Wormley Hughes, an enslaved African-American who was head gardener at Monticello and dug Jefferson's grave; Annie Vann Reid, an ex-teacher turned entrepreneur in South Carolina who owned a five-acre greenhouse and nursery in the 1940s that sold millions of plants and seeds; and David August Williston, a graduate of Cornell University and the first African-American landscape architect, a student of Liberty Hyde Bailey, and the designer of the Tuskegee University campus. The lively text is enriched by illustrations of each individual, making this a beautiful package. In *Conquer the Soil*, Abra Lee—a rising star in the plant world—gives these women and men the spotlight they deserve and enriches our collective understanding of the history of horticulture.

After critiquing—and infuriating—the art world with *The Painted Word*, award-winning author Tom Wolfe shared his less than favorable thoughts about modern architecture in *From Bauhaus to Our Haus*. In this examination of the strange saga of twentieth century architecture, Wolfe takes such European architects as Ludwig Mies van der Rohe, Le Corbusier, and Bauhaus art school founder Walter Gropius to task for their glass and steel box designed buildings that have influenced—and infected—America's cities.

Shortlisted for the Financial Times and McKinsey Best Book of the Year Award in 2011 “A masterpiece.” —Steven D. Levitt, coauthor of *Freakonomics* “Bursting with insights.” —The New York Times Book Review A pioneering urban economist presents a myth-shattering look at the majesty and greatness of cities America is an urban nation, yet cities get a bad rap: they're dirty, poor, unhealthy, environmentally unfriendly . . . or are they? In this revelatory book, Edward Glaeser, a leading urban economist, declares that cities are actually the healthiest, greenest, and richest (in both cultural and economic terms) places to live. He travels through history and around the globe to reveal the hidden workings of cities and how they bring out the best in humankind. Using intrepid reportage, keen analysis, and cogent argument, Glaeser makes an urgent, eloquent case for the city's importance and splendor, offering inspiring proof that the city is humanity's greatest creation and our best hope for the future.

Locking Up Our Own

From 19th-century public baths to today's private backyard havens, swimming pools have been a provocative symbol of American life. In this social and cultural history of swimming pools in the U.S., Wiltse relates how, over the years, pools have served as asylums for the urban poor, leisure resorts for the masses, and private clubs for middle-class suburbanites. As sites of race riots, shrinking swimsuits, and conspicuous leisure, swimming pools reflect the tensions and transformations that have given rise to modern America.

From 1976, when the United States Supreme Court upheld the constitutionality of the death penalty in *Gregg v. Georgia*, until their retirements in the early 1990s, Justices William Brennan and Thurgood Marshall doggedly voted against capital punishment in over 2,500 cases. The Justices typically began their opinions by reiterating they were adhering to their views that "the death penalty is in all cases cruel and unusual punishment prohibited by the Eighth and Fourteenth Amendments." While most of the dissents upheld without elaboration their conviction that capital punishment was unconstitutional, some explained in detail why, even assuming the death penalty might be constitutional, its application in the case before the Court was not. In this well-researched and copiously documented work, Michael Mello provides a comprehensive analysis of the legal, historical, and philosophical underpinnings of the Justices' relentless dissents against capital punishment. Mello begins with biographical sketches of Brennan and Marshall, examining how two men from divergent legal backgrounds came to share an unswerving stance against the death penalty. He then considers the historical, theoretical, and jurisprudential legitimacy of Supreme Court dissents in general, and sustained dissents in particular.

The eighth edition of this best selling text has been thoroughly revised to include expanded material on the slave resistance, the recent history of African Americans in the United States, more on the history of women, and popular culture. The text has also been redesigned with new charts, maps, photographs, paintings, illustrations, and color inserts and an extensive package has been assembled, using technology and other multimedia to bring history to life. Written by distinguished and award-winning authors, retaining the same features that have made it the most popular text on African American History ever, and with fresh and appealing new features, *From Slavery to Freedom* remains the most revered, respected, honored text on the market.

"A classic. . . . [It] will make an extraordinary contribution to the improvement of race relations and the understanding of race and the American legal process."--Judge A. Leon Higginbotham, Jr., from the Foreword Charles Hamilton Houston (1895-1950) left an indelible mark on American law and society. A brilliant lawyer and educator, he laid much of the legal foundation for the landmark civil rights decisions of the 1950s and 1960s. Many of the lawyers who won the greatest advances for civil rights in the courts, Justice Thurgood Marshall among them, were trained by Houston in his capacity as dean of the Howard University Law School. Politically Houston realized that blacks needed to develop their racial identity and also to recognize the class dimension inherent in their struggle for full civil rights as Americans. Genna Rae McNeil is thorough and passionate in her treatment of Houston, evoking a rich family tradition as well as the courage, genius, and tenacity of a man largely responsible for the acts of "simple justice" that changed the course of American life.

**EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.**

**In recent years, America's criminal justice system has become the subject of an increasingly urgent debate. Critics have assailed the rise of mass incarceration, emphasizing its disproportionate impact on people of color. As James Forman, Jr., points out, however, the war on crime that began in the 1970s was supported by many African American leaders in the nation's urban centers. In *Locking Up Our Own*, he seeks to understand why. Forman shows us that the first substantial cohort of black mayors, judges, and police chiefs took office amid a surge in crime and drug addiction. Many prominent black officials, including Washington, D.C. mayor Marion Barry and federal prosecutor Eric Holder, feared that the gains of the civil rights movement were being undermined by lawlessness—and thus embraced tough-on-crime measures, including longer sentences and aggressive police tactics. In the face of skyrocketing murder rates and the proliferation of open-air drug markets, they believed they had no choice. But the policies they adopted would have devastating consequences for residents of poor black neighborhoods. A former D.C. public defender, Forman tells riveting stories of politicians, community activists, police officers, defendants, and crime victims. He writes with compassion about individuals trapped in terrible dilemmas—from the men and women he represented in court to officials struggling to respond to a public safety emergency. *Locking Up Our Own* enriches our understanding of why our society became so punitive and offers important lessons to anyone concerned about the future of race and the criminal justice system in this country.**

This remarkable book reproduces more than one hundred photographs taken by R. C. Hickman, a professional photographer whose work provides a fascinating visual record of life in Dallas's black community during the three decades following World War II. After the war, he returned to Dallas and joined the staff of the Dallas Star Post. He also worked as a freelance photographer for Jet magazine, for several newspapers in the East, and for the NAACP. His work led him to photograph notables such as Martin Luther King Jr., Thurgood Marshall, Ella Fitzgerald, Joe Louis, and others when they visited Dallas.

Going beyond current scholarship on the "media city" and the "smart city," Shannon Mattern argues that our global cities have been mediated and intelligent for millennia. *Deep Mapping the Media City* advocates for urban media archaeology, a multisensory approach to investigating the material history of networked cities. Mattern explores the material assemblages and infrastructures that have shaped the media city by taking archaeology literally—using techniques like excavation and mapping to discover the modern city's roots in time. *Forerunners: Ideas First* is a thought-in-process

series of breakthrough digital publications. Written between fresh ideas and finished books, Forerunners draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in scholarship.

Engaging students in community change has far-reaching benefits that not only support but also extend beyond academic achievement. Students who participate in such efforts become better connected to their schools and communities while learning and practicing the principles of democratic citizenship. Students with a high degree of school connectedness are less likely to make risky choices. In 1998, ASCD and The Robert Wood Johnson Foundation joined together to support school-community partnerships that used public health as a focus for student learning and community involvement. This book describes the lessons learned from the projects and provides insight into how schools and community public health agencies can work together to improve student achievement, behavior, and health. Using examples from diverse communities, the author discusses the intersections between education and public health, keys to successful projects, and ways to connect to the curriculum.

Winner of the 2015 RIBA President's Award for Outstanding University Located Research This book is the long awaited sequel to "Continuous Productive Urban Landscapes: Designing Urban Agriculture for Sustainable Cities". "Second Nature Urban Agriculture" updates and extends the authors' concept for introducing productive urban landscapes, including urban agriculture, into cities as essential elements of sustainable urban infrastructure. It reviews recent research and projects on the subject and presents concrete actions aimed at making urban agriculture happen. As pioneering thinkers in this area, the authors bring a unique overview to contemporary developments and have the experience to judge opportunities and challenges facing those who wish to create more equitable, resilient, desirable and beautiful cities.
