***Advanced Financial  
Accounting: Instructor's  
resource manual***

The tenth edition of Accounting (Hoggett et al.) provides an introductory but comprehensive description of the purpose, practice and process of contemporary international financial and management accounting in an Australian context. With the increased emphasis on the globalisation of business, the material is ideal for the study of introductory accounting in a broad international context. The tenth edition builds on the strengths of previous editions with a strong focus on the decision-

making role of accounting, as well as on a student's acquisition of generic skills such as communication, analytical, problem solving, critical thinking and judgement skills. The technical skills required in the application of accounting concepts still remain a core objective of the new edition. Intermediate Accounting, 3e, by Spiceland/Sepe/Tomassini will gain support in traditional and technology-driven accounting departments, especially those looking for a more concise, decision-making text that reinforces challenging concepts via CD-ROM. The revision of this text is based around a

"Learning System." The revision of this "Learning System" was built on improving the clarity of the chapters, emphasizing more decision-making in order to prepare students for the changes taking place on the CPA exam, acknowledging the diversity of students and their learning styles by creating supplemental materials to assure the success of every student, and creating a consistent text and supplemental package for both students and instructor's giving us the best possible intermediate text on the market. Returning to the Third edition is the award winning "Coach" CD-

ROM. The Coach CD-ROM is a multimedia product integrating audio and video clips, animated illustrations, cases, and alternative reading material that helps students comprehend some of the more difficult topics associated with intermediate accounting. Designed specifically for the Spiceland text, instructors and students will find these learning tools placed strategically throughout the text. This is the most comprehensive Learning System in Intermediate Accounting. At only 1120 pages (300 pages less than the average intermediate accounting text), Spiceland/S/T has not

sacrificed content for pages.

Instead, the authors have created a very flexible text with a student friendly writing style that focuses on explaining not just how to apply a procedure, but why it's applied.

Give your students a solid foundation in core accounting concepts while helping learners develop a true appreciation for why accounting is important to business and a prosperous society.

Warren/Reeve/Duchac ' s  
FINANCIAL AND  
MANAGERIAL ACCOUNTING,  
14E clearly demonstrates how  
accounting is much more than  
simply data and black and white

rules. Instead, students see how accounting provides key information used to make critical business decisions. A new chapter schema provides context for how each chapter 's content fits into the big picture. The book focuses on why accounting is important and consistently reinforces connections to the big picture by connecting journal entries to the accounting equation. Fresh organization progresses from the simplest to the more complex topics with reorganized and fully integrated coverage of the new Revenue Recognition standard, reorganized coverage of adjustments, and reorganized

managerial accounting chapters

Accounting 9th edition continues the strong reputation established by this leading Australian text as the most comprehensive book for students studying introductory accounting in undergraduate or postgraduate programs. The full-colour design and improved pedagogy provides students with a reader-friendly text to enhance their understanding of concepts and make their study more enjoyable. The text builds on the thorough and reliable explanation of the accounting process through the Business Knowledge

chapter vignettes that apply the principles to practice. Previous editions were renowned for the number of exercises and problems, and the new edition builds on this superior teaching feature. The end-of-chapter activities are designed to encourage student confidence through the development of skills in decision making, critical thinking, ethical thinking, analysis and communication.

The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to

strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two- semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.

Are you looking for an engaging, decision-focussed approach to financial reporting that encourages students to

develop their interpretative skills? Building on the success of the first edition, this textbook takes a 'how, why, what' approach to financial accounting, interwoven in each chapter. From chapter one, students understand how financial information is prepared and presented, why it is prepared and presented in this way, and what the resulting financial information means for users. Designed for students taking a step beyond their introductory financial accounting training, the textbook equips them with all the key tools they will require when they enter professional practice. Reflective of the latest International Financial Reporting Standards (IFRS) and International Accounting Standards (IAS), this textbook delivers concise, clear

explanations of all the key issues in accounting standards that students need to know. Content maps to professional accounting body syllabi, making this the perfect choice for accounting courses which offer exemptions. Chapters are rich with 3 types of examples to enhance understanding: - Illustrative examples of real-world situations; - Worked examples demonstrating the calculation of figures required for financial statements; - Extracts from company annual reports demonstrate how the theory relates to financial reporting in practice. More engaging, more balanced, and more applied than other offerings, this is exactly the textbook your financial reporting students need! An extensive Online Resource Centre

While there is growing interest in

IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples

instead of solely U.S. dollars.
