Describes the internal structure of the 8086 and 8088 microprocessors, explains the fundamentals of programming them, and discusses their use with the IBM Personal Computer

"I'd rather have one or two of his whiplashing essays in my hands than almost any tome of philosophy". -- Thomas Moore

Would life be better without alcohol? It's the nagging question more and more of us are finding harder to ignore, whether we have a "problem" with alcohol or not. After all, we yoga. We green juice. We meditate. We self-care. And yet, come the end of a long work day, the start of a weekend, an awkward social situation, we drink. One glass of wine turns into two turns into a bottle. In the face of how we care for ourselves otherwise, it's hard to avoid how alcohol really makes us feel... terrible. How different would our lives be if we stopped drinking on autopilot? If we stopped drinking altogether? Really different, it turns out. Really better. Frank, funny, and always judgment free, Sober Curious is a bold guide to choosing to live hangover-free, from Ruby Warrington, one of the leading voices of the new sobriety movement. Drawing on research, expert interviews, and personal narrative, Sober Curious is a radical take down of the myths that keep so many of us drinking. Inspiring, timely, and blame free, Sober Curious is both conversation starter and handbook—essential reading that empowers readers to transform their relationship with alcohol, so we can lead our most fulfilling lives.

A delightfully delicious story about the festival of Eid and a whole lot more. Eid-al-Fitr is here! It's time to celebrate! But what is Eid all about? Join Ilyas & Duck in this fantastically delightful, award-winning story, as they explore the fun and excitement of Eid while learning about the charitable nature of it all. Eid has never been so much fun! Ages 4+

This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Table of Contents Introduction Section One: Windows Configuration Chapter 1: AlwaysInstallElevated Section Two: Domain Controller Chapter 2: Zerologon Section Three: Windows Service Chapter 3: Service - Insecure File Permission Chapter 4: Service - Unquoted Path Chapter 5: Service - Bin Path Chapter 6: Service - Registry Chapter 7: Service - DLL Hijacking Section Four: Scheduled Tasks Chapter 8: Scheduled Tasks Section Five: Windows Registry Chapter 9:

**Autorun Chapter 10: Startup Applications Section Six: Windows Kernel Chapter 11: Kernel - EternalBlue Chapter 12: Kernel - MS15-051 Chapter 13: Kernel - MS14-058 Section Seven: Potato Exploits Chapter 14: Juicy Potato Chapter 15: Rogue Potato Section Eight: Password Mining Chapter 16: Password Mining - Memory Chapter 17: Password Mining - Registry Chapter 18: Password Mining - SiteList Chapter 19: Password Mining - Unattended Chapter 20: Password Mining - Web.config Section Nine: UAC Bypass Chapter 21: User Account Control Bypass For more information, please visit <http://www.howtopassoscp.com/>.
A comprehensive narrative history of the Australian computer industry, from the earliest analogue machines through to the present day.**

Longarm fires up Hell's Half Acre! After U.S. Deputy Marshal Custis Long blasts a killer to hell in an epic gunfight, he seeks respite in Hell's Half Acre. Notorious beyond its size, Fort Worth's "Acre" features bullet-riddled corpses and scores of barely dressed women, drunks, gamblers, tinhorns, outlaws, cowboys and tradesmen. What better place for a marshal to vacation? But, sooner than later, the bad guys in Hell's Half Acre need reminding that there's no rest for the wicked—or for the lawman known as Longarm who blows them to blazes.

This book provides the first comprehensive picture of lifelong learning and the radical changes needed if it is to become the cultural norm. Clearly written and readily accessible, the book identifies the shifts in attitude and behaviour which are needed to establish a lifelong learning culture. Looking ahead over the next quarter of a century, Jim Smith and Andrew Spurling show how government and learning providers must fundamentally reassess their use of time, space and

finance. But, more than that, they also offer a practical, comprehensive and robust strategy for lifelong learning. Through trenchant analysis based on research commissioned by The Lifelong Learning Foundation, this book shows ways of confronting difficult choices and realizing the aim of comprehensive lifelong learning.

Covers receipts and expenditures of appropriations and other funds.

Ilyas understands the importance of giving Zakat. But Duck is too concerned about parting with his money. Will Ilyas succeed in convincing Duck why giving money to the poor and needy is necessary? Will Duck understand how giving Zakat also benefits him and the community? Take a trip with Ilyas & Duck to a land, Once Upon a Time, as the dynamic duo share an amazing tale of giving and receiving, community and compassion, understanding and friendship. Giving Zakat is good indeed!

This book provides an accessible introduction to the SPARK programming language. Updated 'classic' that covers all of the new features of SPARK, including Object Oriented Programming. The only book on the market that covers this important and robust programming language. CD-ROM contains the main SPARK tools and additional manuals giving all the information needed to use SPARK in practice. Technology: The SPARK language is aimed at writing reliable software that combines simplicity and rigour within a practical framework. Because of this, many safety-critical, high integrity systems are developed using SPARK. User Level: Intermediate Audience: Software engineers, programmers, technical leaders, software managers. Engineering companies in fields such as avionics, railroads, medical instrumentation and automobiles. Academics giving MSc courses in Safety Critical Systems Engineering, System Safety Engineering, Software Engineering. Author Biography: John Barnes is a veteran of the computing industry. In 1977 he designed and implemented the RTL/2 programming language and was an original member of the ADA programming language design team. He was founder and MD of Alslys Ltd from 1985 to 1991. Currently self employed, John is the author of 'Programming in ADA' which has sold 150000 copies and been translated into 6 languages.

Ilyas & Duck search for Allah is an adorable storybook for kids about a boy's quest to find God. "Where is God?" is a question that any parent teaching their kids will one day have to answer. This book helps parents answer that question while conveying the profound mystery of it all in a fun way. In this story, likable Ilyas pairs up with Duck to ask the one question over and over in different scenarios. With

Component-Based Software Engineering

9th International Symposium, CBSE 2006, Västerås, Sweden, June 29 - July 1, 2006, Proceedings

System Design Guide

This book constitutes the thoroughly refereed post-proceedings of the Second International Workshop on Power-Aware Computer Systems, PACS 2002, held in Cambridge, MA, USA, in February 2002. The 13 revised full papers presented were carefully selected for inclusion in the book during two rounds of reviewing and revision. The papers are organized in topical sections on power-aware architecture and microarchitecture, power-aware real-time systems, power modeling and monitoring, and power-aware operating systems and compilers.

This is the refereed proceedings of the 9th International Symposium on Component-Based Software Engineering, CBSE 2006, held in Västerås, Sweden in June/July 2006. The 22 revised full papers and 9 revised short papers presented cover issues concerned with the development of software-intensive systems from reusable parts, the development of reusable parts, and system maintenance and improvement by means of component replacement and customization.

These essays by contributors from disciplines ranging from economics to psychology present the most significant advances in strategic choice theory. In three parts the book addresses many-player, few-player and one-player situations.
