discusses the impact of the 2007-2009 financial market meltdown on finance today and clearly connects topics to students' personal finance decisions. Students see how concepts influence both immediate and long-term common financial decisions. Students learn to use spreadsheets for financial decisions and financial problem solving. The book's modular format allows you to present concepts in the order that best suits your course. The book begins by discussing principles of financial systems and business organizations, then addresses valuation concepts and corporate decision making and concludes with investment fundamentals.
