This book shows how phenomenology of the social sciences differs from positivistic approaches, and presents Schutz's theory of relevances -- a key feature of his own phenomenology of the social world. It begins with Schutz's appraisal of how Husserl influenced him, and continues with exchanges between Schutz and Eric Voegelin, Felix Kaufmann, Aron Gurwitsch, and Talcott Parsons. This book presents, for the first time, Schutz's incisive criticisms of T.S. Eliot's theory of culture.

It's a new generation of de Wolfe Pack cubs, carrying on the tradition of their illustrious grandfather. Thomas "Tor" de Wolfe has his hands full with battling enemies as he secures a border castle for Edward I. Chaos is the name of the game! Tor married, and lost, his wife at a young age. Because his wife was an orphan, he inherited her two sisters when they wed and when she died, they became his responsibility. Unfortunately, the two spinster sisters view Tor as their property. When Tor meets the worldly Isalyn de Featherstone, he is smitten. Isalyn, however, is not. Tor is big and handsome, but lives too much of a provincial life. She wants big cities, excitement, money, and no baggage of a dead wife. Isalyn's father, however, feels differently - and Isalyn finds herself betrothed to the gentle de Wolfe giant. The spinsters have a new target. Let the battles begin! Enter a world of medieval mayhem, adventure, but most of all, of an overwhelming passion that soon consumes both Tor and Isalyn. Add an ambitious and jilted suitor into the mix, and it could mean the end for everything they have worked so hard to build. But a strong love is worth fighting for, and no love is stronger than that of a de Wolfe. Part of the World of de Wolfe Pack series de Wolfe Pack Generations subseries

'A biography as sensuously satisfying as a fine French meal. Colette surely would have approved it as much for its aesthetic appeal as for its rare insight and scholarship.' Robyn Davidson Colette's France is the remarkable life story of an extraordinary woman, who was known simply as 'Colette'. This lavishly illustrated biography of the French writer, who was as famous for her novels as for her often controversial life, follows her journey through the landscapes of France where she lived and loved - from a childhood in Burgundy and coming of age in the Belle Époque Paris, to Provence and St Tropez. Jane Gilmour recounts the varied lives of a sensual, artistic, rebellious woman who lived life on her own terms, from prodigious writer and journalist, risqué performer, lover and seducer, businesswoman, baroness, mother, and finally, grand old lady of letters. Dr Jane Gilmour is an Australian with a personal passion and extensive knowledge of Colette and her life. Jane lived in France for many years where she studied the writer at the Sorbonne and completed her thesis on the writer there. Jane has continued her passion for her subject frequently returning to France to write this book and to visit the regions where Colette lived, loved and worked.

Collaboration and networking have recently come to the fore as major school improvement strategies in a number of countries. A variety of initiatives, from government and other agencies, have encouraged collaboration and led to a lot of practical activity in this area. However, at present there are no texts in education that explore collaboration and networking from both a theoretical and practical perspective. In this book, we aim to provide a theoretical background to educational collaboration, drawing on research and theory in policy studies, psychology and sociology, leading ultimately to a typology of networks. This theoretical base will be tested in the discussion of a number of case studies referring to specific initiatives such as the Federations programme, multi-agency collaboration and Networked Learning Communities. Lessons for practice will be drawn and presented in terms of factors internal and external to the school. The key issue of network leadership will be addressed here as well.

Essential Art Deco captures the essence of the style which swept across the globe in the 1920s and 1930s, altering the skyline of cities from Shanghai to Rio, and adding an exotic vibrant edge to everything from cinema and fashion to ocean lines and automobiles. Beautifully illustrated throughout, the book explores the extraordinary visual language of the style. Skilful juxtaposition of source material and iconic Deco pieces shows how designers borrowed from the exotic cultures of Ancient Egypt. Meso-America, the oriental East and Africa and from the man-made world of skyscrapers and machines, developing in the process a new and highly distinctive iconography. Images inspired by the natural world of plants and animals, sunbursts and fountains, contrast with the geometric forms of avant-garde painting and design, culminating eventually in the symbolic idiom of streamlining. Deeply eclectic and highly decorative, Art Deco was all about fantasy, fun and glamour - themes that are celebrated in this attractive book and which still strike a popular chord today.

Anthropological archaeology and other disciplines concerned with the formation of early complex societies are undergoing a theoretical shift stemming from the realization that the social evolution of complex societies was more varied and complex than imagined. Given the need theory, the book proposes that anthropologists look to political science, especially the rational choice theory of collective action. Collective action theorists propose that state formation results from the strategic behavior of rational and self-interested actors who make up the elite and those outside the official structure of the state. The theory proposes that the form taken by a state will depend on the "bargaining power", of rulers and taxpayers. Where taxpayers have more resources with which to bargain, it is predicted that rulers will concede be agree to restrictions on their power. The authors subject collective action theory to a methodologically rigorous evaluation using systematic cross-cultural analysis based on a world-wide sample of societies. The results presented here indicate strong support for most elements results, in particular those pertaining to the control of ruler behavior, suggest the possibility that there are contexts in which collective action may play out in ways not anticipated by the theory. While this type of theoretical modeling is commonly seen in political science research in its approach from an anthropological and archaeological viewpoint.

A riveting Vietnam War story--and one of the most dramatic in aviation history--told by a New York Times bestselling author and a prominent aviation historian Every war has its "bridge"--Old North Bridge at Concord, Burnside's Bridge at Antietam, the railway bridge over Burma's River Kwai, the bridge over Germany's Rhine River at Remagen, and the bridges over Korea's Toko Ri. In Vietnam it was the bridge at Thanh Hoa, called Dragon's Jaw. For seven long years hundreds of young US airmen flew sortie after sortie against North Vietnam's formidable and strategically important bridge, dodging a heavy concentration of anti-aircraft fire and enemy MiG planes. Many American airmen were shot down, killed, or captured and taken to the infamous "Hanoi Hilton" POW camp. But after each air attack, when the smoke cleared and the debris settled, the bridge stubbornly remained standing. For the North Vietnamese it became a symbol of their invincibility; for US war planners an obsession; for US airmen a testament to American mettle and valor. Using after-action reports, official records, and interviews with surviving pilots, as well as untapped Vietnamese sources, Dragon's Jaw chronicles American efforts to destroy the bridge, strike by bloody strike, putting readers into the cockpits, under fire. The story of the Dragon's Jaw is a story rich in bravery, courage, audacity, and

This is the first book of its kind to consider at length Coleridge's relationship to his near contemporary, Friedrich Schiller. Contrary to received opinion, the author shows that Schiller's notion of 'aesthetic education' was indeed valuable to Coleridge at an early stage in his career and that it helped to shape much of his work - from his theory of imagination and his notion of the clerisy to his views on women and his account of historical change. Combining close readings with historical research, this book challenges readers to rethink the radical potential of idealist aesthetics.

This new volume demonstrates the extent and diversity of Coleridge's writings on the sublime. It highlights the development of his aesthetic of transcendence from an initial emphasis on the infinite progressiveness of humanity, through a fascination with landscape as half-revealing the infinite forces underlying it, and with literature as producing a similar feeling of the inexpressible, to an increasing emphasis on contemplating the ineffable nature of God, as well as the transcendent power of Reason or spiritual insight.

To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.
