This Yearbook aims to contribute to a greater awareness of the functions and activities of the organs of the Inter-American system for the protection of human rights.

Although the Church's adaptation to a pluralistic society was far from smooth, that it happened at all is remarkable, given the historic opposition of a majority of clergy and laity to liberalism, democracy, and intellectual freedom."--BOOK JACKET.

This book examines the process of dismantling the democratic institutions and protections in Venezuela under the Hugo Chávez regime. The actions of the Chávez government have influenced similar processes and undemocratic manoeuvrings in Ecuador, Bolivia, and Honduras. Since the election of Hugo Chávez as president of Venezuela in 1998, a sinister form of nationalistic authoritarianism has arisen at the expense of long-established democratic standards. During the past decade, the 1999 Venezuelan Constitution has been systematically attacked by all branches of the Chávez government, particularly by the Supreme Tribunal of Justice,

which has legitimized the Chávez-ordered constitutional violations. The Chávez regime has purposely defrauded the Constitution and severely restricted representative government, all in the name of a supposedly participatory democracy controlled by a popularly supported central government. This volume illustrates how an authoritarian, nondemocratic government has been established in Venezuela.

This ground-breaking collection of essays outlines and explains the unique development of Latin American jurisprudence. It introduces the idea of the *Ius Constitutionale Commune en América Latina* (ICCAL), an original Latin American path of transformative constitutionalism, to an Anglophone audience for the first time. It charts the key developments that have transformed the region and assesses the success of the

constitutional projects that followed a period of authoritarian regimes in Latin America. Coined by scholars who have been documenting, conceptualizing, and comparing the development of Latin American public law for more than a decade, the term ICCAL encompasses themes that cross national borders and legal fields, taking in constitutional law, administrative law, general public international law, regional integration law, human rights, and investment law. Not only does this volume map the legal landscape, it also suggests measures to improve society via due legal process and a rights-based, supranational and regionally rooted constitutionalism. The editors contend that with the strengthening of democracy, the rule of law, and human rights, common problems such as the exclusion of wide sectors of the population from having a say in government, as well as corruption, hyper-presidentialism, and the weak normativity of the law can be combatted more effectively in future. The existence of interactions between different but overlapping legal systems has always presented challenges to black letter law. This is particularly true of the relationship between international law and domestic law and the relationship between federal law and the laws of individual federation members. Moreover some organisations have

created their own supranational constitutional systems: the United Nations Charter is the best known, and is often referred to as the 'World Constitution', but the European Court of Justice in Luxembourg views the European Treaties as a 'Constitutional Charter' for Europe, while the European Court of Human Rights has defined the European Convention on Human Rights as a constitutional instrument of 'European public order'. It is in the dynamic relationship between domestic constitutional laws, EU law, the ECHR and the UN Charter that the most persistent difficulties arise. In this context 'interordinal instability' not only provokes strong academic interest, but also affects what has been called 'governance' or 'global government' and undermines both legal certainty and individual fundamental rights. Different solutions - constitutionalist and pluralist - have been explored, but none of them has received global acceptance. In this book Luis Gordillo analyses the interordinal instabilities which arise at the European level, focusing on three main strands of case law and their implications: Solange, Bosphorus and Kadi. To solve the difficulties caused by this instability Gordillo proposes a form of soft constitutionalism, which he calls 'interordinal constitutionalism', as a means to bring order and stability to global legal governance. Transformative Constitutionalism in Latin America

Encompassing a number of human rights, such as the right to environmental protection, the right to humanitarian aid, and the right to democratic governance, this collection focuses on issues and areas that were not originally mentioned or foreseen in the Declaration but that have since developed into salient topics. These developing rights are considered in the light of contemporary national and international law, as well as against the wider picture and the contexts in which human rights may have effect. Moreover, the topics covered take in a wide range of research fields, including law, politics and criminology. Emerging Areas of Human Rights in the 21st Century is aimed primarily at undergraduate and postgraduate students, and scholars interested in international law, human rights and politics.

This two-volume book, published open access, brings together leading scholars of constitutional law from twenty-nine European countries to revisit the role of national constitutions at a time when decision-making has increasingly shifted to the European and transnational level. It offers important insights into three areas. First, it explores how constitutions reflect the transfer of powers from domestic to European and global institutions. Secondly, it revisits substantive constitutional values, such as the protection of constitutional rights, the rule of law, democratic participation and constitutional review, along with constitutional court judgments that tackle the protection of these rights and values in the

transnational context, e.g. with regard to the Data Retention Directive, the European Arrest Warrant, the ESM Treaty, and EU and IMF austerity measures. The responsiveness of the ECJ regarding the above rights and values, along with the standard of protection, is also assessed. Thirdly, challenges in the context of global governance in relation to judicial review, democratic control and accountability are examined. On a broader level, the contributors were also invited to reflect on what has increasingly been described as the erosion or 'twilight' of constitutionalism, or a shift to a thin version of the rule of law, democracy and judicial review in the context of Europeanisation and globalisation processes. The national reports are complemented by a separately published comparative study, which identifies a number of broader trends and challenges that are shared across several Member States and warrant wider discussion. The research for this publication and the comparative study were carried out within the framework of the ERC-funded project 'The Role and Future of National Constitutions in European and Global Governance'. The book is aimed at scholars, researchers, judges and legal advisors working on the interface between national constitutional law and EU and transnational law. The extradition cases are also of interest to scholars and practitioners in the field of criminal law. Anneli Albi is Professor of European Law at the University of Kent, United Kingdom. A Study in Liberal Nation-building

Confesion de Fe Westminster (1647)

State Formation in Nineteenth-century Latin America

This book provides a critical introduction to the principles and institutions that make up the Spanish Constitution, which was enacted in 1978. It first explains the process of transition from Franco's dictatorship to democracy, in order to understand the historical circumstances under which the Constitution was framed. After offering a theory to justify the authority of the Constitution over ordinary laws, the book proceeds to explain the basic principles of the Spanish political regime, as well as the structure of its complex legal system. Later chapters focus on various institutions, such as the Crown, Parliament and the Government. A specific chapter is devoted to the territorial distribution of power between

the State, the regions and local government. The last two chapters deal with the constitutional role of courts, and the protection of fundamental rights. The book includes some reflections on the challenges that lie ahead and the constitutional reforms that may need to be considered in the future.

Since the turn of the century, South American governments and regional organisations have adopted the world's most open discourse on migration and citizenship. At a time when restrictive choices were becoming increasingly predominant around the world, South American policymakers presented their discourse as being both an innovative and exceptional 'new paradigm' and part of a morally superior, avant-garde path in policymaking. This book provides a critical examination of the South American legal framework through a historical and comparative analysis. Diego Acosta uses this analysis to assess whether the laws are truly innovative and exceptional, as well as evaluating their feasibility, strengths and weaknesses. By analysing the legal construction of the national and the foreigner in ten South American countries during the last two centuries, he demonstrates how different citizenship and migration laws have functioned, as well as showing why states have opted for certain regulation choices, and the consequence of these choices for state- and nation-building in the continent. An invaluable insight for anyone interested in global migration and citizenship discussions.

During the last fifteen years Latin American governments reformed their constitutions to recognize indigenous rights. The contributors to this book argue that these changes post fundamental challenges to accepted notions of democracy, citizenship and development in the region. Using case studies from Mexico, Guatemala, Bolivia and Peru, they analyze the

ways in which new legal frameworks have been implemented, appropriated and contested within a wider context of accelerating economic and legal globalization, highlighting the key implications for social policy, human rights and social justice.

Looking at the Latin American liberal project during the century of postindependence, this collection of original essays draws attention to an underappreciated dilemma confronting liberals: idealistic visions and fiscal

restraints. Liberals, Politics, and Power focuses on the inventiveness of nineteenth-century Latin Americans who applied liberal ideology to the founding and maintenance of new states. The impact of liberalism in Latin America, the contributors show, is best understood against the larger backdrop of struggles that pitted regional demands against the pressures of foreign finance, a powerful church against a decentralized state, and aristocratic desire to retain privilege against rising demands for social mobility. Moving beyond the traditional historiographical division between Eurocentric and dependency theories, the essays attempt to account for a uniquely Latin American liberal ideology and politics by exploring the political dynamics of such countries as Mexico, Colombia, Argentina, and Peru. Contributors discuss liberal efforts to build a viable legal order through elections and to implement a means of public finance that could fund the states' operations. Essays that span the entire century address issues such as the emergence of caudillos, the role of artisans, and popular participation in elections in light of fiscal, and other, impediments to progress. In their introduction, Vincent C. Peloso and Barbara A. Tenenbaum provide a hemispheric overview of liberalism that illustrates its similarities across Latin America. By exploring the liberal constitutional and economic order lying beneath apparently dictatorial states, this

pathbreaking volume underlines the importance of fiscal policy in the fashioning of state power. Liberals, Politics, and Power serves not only as a guide to the liberal principles and practices that governed state formation in nineteenth-century Latin America but also as a means to evaluate the complex relationship between ideas and practical politics.

This book examines the most recent trends in the constitutional and legal regulations in all Latin American countries regarding the amparo proceeding. It analyzes the regulations of the seventeen amparo statutes in force in Latin America, as well as the regulation on the amparo guarantee established in Article 25 of the American Convention of Human Rights.

organizar y tutelar la salud p?blica a trav?s de medidas preventivas y de las prestaciones de servicios necesarios. En su art?culo 41, de indudable conexi?n tem?tica con el art?culo comentado, la Constituci?n establece que los poderes p?blicos mantendr?n un r?gimen p?blico de Seguridad Social para todos los ciudadanos, que garantice la asistencia y prestaciones sociales suficientes ante situaciones de necesidad. A su vez, el art?culo 41 de la Ley General de la Seguridad Social incluye dentro de la acci?n protectora del ?mbito de la Seguridad Social "la asistencia sanitaria en los casos de maternidad, de enfermedad profesional y de accidente, sean o no de trabajo". En fin, el t?tulo VIII del texto constitucional dise?a una organizaci?n territorial del Estado que posibilita la asunci?n por parte de las Comunidades Aut?nomas de competencias en materia de sanidad (art. 148.1.21.?), reservando para aqu?l la sanidad exterior, la regulaci?n de las bases y la coordinaci?n general de la sanidad y la legislaci?n sobre productos farmac?uticos (art. 149.1.16.?). Al amparo de las previsiones constitucionales y de los respectivos Estatutos de Autonom?a, las Comunidades Aut?nomas han asumido paulatinamente competencias en materia de sanidad. Este proceso se complet? con un modelo estable de financiaci?n, a trav?s de la aprobaci?n de la Ley 21/2001, de 27 de diciembre, por la que se regulan las medidas financieras administrativas del nuevo sistema de financiaci?n de las Comunidades Aut?nomas de Espa?a, de las Ciudades con Estatuto de Autonom?a, aunque a estos efectos tambi?n se debe considerar las modificaciones introducidas en dicho sistema de financiaci?n por las Leyes 22 y 23 de 2009, la org?nica complementaria 3/2009 y, m?s recientemente, por la Ley
