"Rhetoric, Materiality, and Politics explores the relationship between rhetoric's materiality and the social world in the late modern political context. Taking as their point of departure a reprint of Michael Calvin McGee's 1982 call to reconceptualize rhetoric as the palpable +experience; of sociality, the authors in this volume grapple anew with the role of communication practices in contemporary collective life. Drawing upon the work of Michel Foucault, Jacques Lacan, and Jacques Derrida, these twelve original essays supplement, extend, and challenge McGee's position,

collectively advocating on behalf of a shift in theoretical and critical attention from rhetorical materialism to rhetoric's materiality." --Book Jacket.

The first organized, sanctioned American stock car race took place in 1908 on a road course around Briarcliff, New York—staged by one of America's early speed maven, William

Download Free Consumer Guide Automotive How Stuff Works

K. Vanderbilt, Jr. A veteran of the early Ormond-Daytona Beach speed trials, Vanderbilt brought the Grand Prize races to Savannah, Georgia, the same year. What began as a rich man's sport eventually became the working man's sport, finding a home in the South with the infusion of moonshiners and their souped-up cars. Based in large part on statements of drivers, car owners and others garnered from archived newspaper articles, this history details the development of stock car racing into a megasport, chronicling each season through 1974. It examines the National Association for Stock Car Automobile Racing's 1948 incorporation documents and how they differ from the agreements adopted at NASCAR's organization meeting two months earlier. The meeting's participants soon realized that their sport was actually owned by William H.G. "Bill" France, and its consequential growth turned his family into billionaires. The book traces the transition from dirt to asphalt to superspeedways, the painfully slow advance of safety measures and the shadowy economics of the sport.

Coke adds life. Just do it. Yo quiero Taco Bell. We live in a commercial age, awash in a sea of brand names, logos, and advertising jingles—not to mention commodities themselves. Are shoppers merely the unwitting stooges of the greedy producers who will stop at nothing to sell their wares? Are the producers' powers of persuasion so great that resistance is futile? James Twitchell counters this assumption of the used and abused consumer with a witty and unflinching look at commercial culture, starting from the simple observation that "we are powerfully attracted to the world of goods (after all, we don't call them 'bads')." He contends that far from being forced upon us against our better judgment, "consumerism is our better judgment." Why? Because increasingly, store-bought objects are what hold us together as a society, doing the work of "birth, patina, pews, coats of arms, house, and social rank"—previously done by religion and bloodline. We immediately understand the connotations of status and identity exemplified by the Nike swoosh, the Polo pony, the Guess? label, the DKNY logo. The commodity alone is not what we are after; rather, we actively and creatively want that logo and its signification—the social identity it bestows upon us. As Twitchell summarizes, "Tell me what you buy, and I will tell what you are and who you want to be." Using elements as disparate as the film *The Jerk*, French theorists, popular bumper stickers, and *Money* magazine to explore the nature and importance of advertising lingo, packaging, fashion, and "The Meaning of Self," Twitchell overturns one stodgy social myth after another. In the process he reveals the purchase and possession of things to be the self-identifying acts of modern life. Not only does the car you drive tell others who you are, it lets you know as well. The consumption of goods, according to Twitchell, provides us with tangible everyday comforts and with crucial inner security in a seemingly faithless age. That we may find our sense of

self through buying material objects is among the chief indictments of contemporary culture. Twitchell, however, sees the significance of shopping. "There are no false needs." We buy more than objects, we buy meaning. For many of us, especially in our youth, Things R Us.
