Contemporary  
Business Reports  
5E, International  
Kuiper

Edition guides readers step--by--step through the process of creating business reports such as a feasibility studies, business plans, employee manuals, and more. Starting with writing fundamentals, readers work through the processes of planning and conducting research,

communicate the information contained in their reports.

Research scientists play a pivotal role in society. Their passion for science will drive them forward, leading to new discoveries that will ultimately make the world a better place. Unfortunately, as the professional

environment becomes more and more competitive, research scientists today cannot just rely on technical knowledge to carve successful careers. Besides technical skills, they will need to acquire other skills, such as how to communicate their science to the outside world. A Survival

Guide for Research Scientists is a one-stop-shop that will help you to develop those core skills not often taught at school or university. The book has been written by an author with more than 20 years of scientific research experience (across different scientific disciplines). She has not only been a

research scientist but also a writer, a consultant, a sole-trader and a project manager. A Survival Guide for Research Scientists takes on a holistic approach in order to help you pave the way for success. As such, it features practical guidelines on how to:

- conduct your scientific research (how

to: do literature review,  
design experiments,  
adopt best practice,  
ensure health and  
safety, etc.). • write and  
edit (reports, bid  
proposals, peer review  
publications, etc). •  
interact with the outside  
world (be a team leader,  
manage a project,  
network, deal with  
difficult people, do  
presentations, organise

meetings, etc.). • look after your career (and get your dream job). • look after yourself (and how to manage stress). • look for a job (develop your CV, prepare for interviews, etc.). • become self-employed (and achieve business success). • deal with redundancy (and move forward in life, etc) Whatever your

We commonly think of

society as made of and by humans, but with the proliferation of machine learning and AI technologies, this is clearly no longer the case. Billions of automated systems tacitly contribute to the social construction of reality by drawing algorithmic distinctions between the visible and the invisible, the

File Type PDF  
Contemporary

relevant and the irrelevant, the likely and the unlikely – on and beyond platforms. Drawing on the work of Pierre Bourdieu, this book develops an original sociology of algorithms as social agents, actively participating in social life. Through a wide range of examples, Massimo Airoidi shows

how society shapes algorithmic code, and how this culture in the code guides the practical behaviour of the code in the culture, shaping society in turn. The 'machine habitus' is the generative mechanism at work throughout myriads of feedback loops linking humans with artificial social agents, in the

context of digital infrastructures and pre-digital social structures. Machine Habitus will be of great interest to students and scholars in sociology, media and cultural studies, science and technology studies and information technology, and to anyone interested in the growing role of algorithms and AI in

This book  
examines the  
implications of  
new  
communication  
technologies in  
the light of the  
most recent work  
in social and  
cultural theory  
and argues that

new developments  
in electronic  
media, such as  
the Internet and  
Virtual Reality,  
justify the  
designation of a  
"second media

ends in a  
comprehensive  
analytical  
report.

Throughout,  
readers learn  
presentation  
techniques and  
skills they can  
use to  
communicate  
orally the  
information  
contained in
