In far too many classrooms, the emphasis is on instructional strategies that teachers employ rather than on what students should be doing or thinking about as part of their learning. What's more, students' minds are something of a mysterious "black box" for most teachers, so when learning breaks down, they're not sure what went wrong or what to do differently to help students learn. It doesn't have to be this way. Learning That Sticks helps you look inside that black box. Bryan Goodwin and his coauthors unpack the cognitive science underlying research-supported learning strategies so you can sequence them into experiences that challenge, inspire, and engage your students. As a result, you'll learn to teach with more intentionality—understanding not just what to do but also when and why to do it. By way of an easy-to-use six-phase model of learning, this book * Analyzes how the brain reacts to, stores, and retrieves new information. * Helps you "zoom out" to understand the process of learning from beginning to end. * Helps you "zoom in" to see what's going on in students' minds during each phase. Learning may be complicated, but learning about learning doesn't have to be. And to that end, Learning That Sticks helps shine a light into all the black boxes in your classroom and make your practice the most powerful it can be. Jane Austen's Pride and Prejudice

Research into computational models of argument is a rich interdisciplinary field involving the study of natural, artificial and theoretical argumentation and requiring openness to interactions with a variety of disciplines, ranging from philosophy and cognitive science to formal logic and graph theory. The ultimate aim is to support the development of computer-based systems able to engage in argumentation-related activities, either with human users or among themselves. This book presents the proceedings of the sixth biennial International Conference on Computational Models of Argument (COMMA 2016), held in Potsdam, Germany, on 12- 16 September. The aim of the COMMA conferences is to bring together researchers interested in computational models of argument and the representation of argumentation structures in natural language texts, with special attention to contributions concerning emerging trends and the development of new connections with other areas. The book contains the 25 full papers, 17 short papers and 10 demonstration abstracts presented at the conference, together with 3 invited talks. Subjects covered include abstract, bipolar and structured argumentation, quantitative approaches and their connections with formalisms like Bayesian networks and fuzzy logic, multi-agent scenarios, algorithms and solvers, and mining arguments in text, dialogue, and social media. The book provides an overview of current research and developments in the field of computational models of argument, and will be essential reading for all those with an interest in the field.

Presenting a variety of viewpoints on current issues across disciplines, PERSPECTIVES ON CONTEMPORARY ISSUES, 8e, equips readers to think, read, and write critically. Emphasizing writing and research, Part I offers separate chapters on reading critically, the writing process, writing a summary, the critique, argumentation, synthesis requiring documentation, and the research paper. Part II is packed with captivating readings organized by broad-based curricular areas. Helping students fully engage on a personal level, questions at the end encourage a reaction to the readings while Responding to Visuals sections prompt students to analyze images. The Structure of Argument covers critical thinking, reading, writing, and research. Concise but thorough, it includes questions, exercises, writing assignments, and a full semester's worth of readings—everything students need in an affordable, compact format. Presenting Aristotelian and Rogerian as well as Toulmin argument, The Structure of Argument has been totally revised, with more than three-quarters of the readings new (including many multimodal selections available online at no extra charge), new coverage of multimodal argument, expanded treatment of key rhetorical concepts, a fresh new design, and additional support for research. Its emphasis on Toulmin argument makes Structure highly teachable, since the approach fits with the goals of the composition course.

Explores how we justify our beliefs - and try to influence those of others - both soundly and effectively.

Essays and Arguments: A Handbook for Writing Student Essays

A Survival Guide for the First Year and Beyond

Part Two Advanced Level

Developing Creative Thinking to Improve Academic Writing Part Two Advanced Level textbook helps enhancing lateral thinking within the given contextual frame in order to promote students intellectual challenge to produce a comprehensive understanding about the topic. This facilitates flexible thinking required to write academic assignments in which arguments are presented for thorough analysis. Since rigid judgments can lead to fossilized views, it is recommended to emphasize the concept that all opinions are correct from the points of view of their holders. In this regard, this book helps college students practice improving their triangular thinking skills which emphasize evaluation of all the aspects of the topic in an equal pattern. Furthermore, this book is useful for ESL college students as well as native speakers of English as it reinforces transformational learning principles which highlight education by inspiration rather than information. Such a strategy can motivate the students to become more creative, more practical and more resourceful and enable them to transform their learning-related thinking abilities and attitudes in order to come to a better understanding of themselves and the world.

This volume is part of a series of 18 monographs on service learning and the academic disciplines. These essays highlight some of the benefits and problems of service-learning in the college composition curriculum and present further areas for study. Following the Introduction, "Service-Learning and Composition at the Crossroads," by Linda Adler-Kassner, Robert Crooks, and Ann Watters, and an Introduction, "Service-Learning: Help for Higher Education in a New Millennium?" by Lillian Bridwell-Bowles, the essays are: "Writing across the Curriculum and Community Service Learning: Correspondences, Cautions, and Futures" (Tom Deans); "Community Service Writing: Problems, Challenges, Questions" (Nora Bacon); "Community Service and Critical Teaching" (Bruce Herzberg); "Rhetoric Made Real: Civic Discourse and Writing beyond the Curriculum" (Paul Heilker); "Democratic Conversations: Civic Literacy and Service-Learning in the American Grains" (David D. Cooper and Laura Julier); "Partners in Inquiry: A Logic for Community Outreach" (Linda Flower); "Service-Learning: Bridging the Gap between the Real World and the Composition Classroom" (Wade Dorman and Susann Fox Dorman); "Systems Thinking, Symbiosis, and Service: The Road to Authority for Basic Writers" (Rosemary L. Arca); "Combining the Classroom and the Community: Service-Learning in Composition at Arizona State University" (Gay W. Brack and Leanna R. Hall); "The Write for Your Life Project: Learning To Serve by Serving To Learn" (Patricia Lambert Stock and Janet Swenson); and "On Reflection: The Role of Logs and Journals in Service-Learning Courses" (Chris M. Anson). Appended are a 39-item annotated bibliography and a list of program descriptions by institution. (All papers contain references.) (SM)

Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).

THE RESEARCH WRITER helps students transition from writing the research paper to doing research writing, from reporting information to working with ideas. The subtitle--Curiosity, Discovery, Dialogue--signals this shift: this handbook promotes research as a curiosity-driven activity that leads to discoveries that are then shared through various types of dialogue. With this practical and reader-friendly handbook, students will learn the research and writing skills needed for any research project and will be able to apply and transfer these skills to their own disciplines. Students can use THE RESEARCH WRITER to become more intelligent, ethically aware researchers, able not just to avoid plagiarism but to write with credibility while navigating the twenty-first century digital landscape. 101 Easy Tips & Tricks to Make Your Work Stand Out

Applications for Teacher Professional Development

Outreach Strategies and Innovative Teaching Approaches for German Programs explores recruitment, curricular design and student retention in modern language instruction by sharing best practices and a wide variety of pragmatic initiatives from teacher-scholars who have been involved in the successful building of German programs. With German programs facing dwindling grant monies as students across the country shift from the liberal arts into career-oriented fields, it is paramount to promote German programs vigorously, to offer courses that reflect and compel students' interest, to keep students engaged in extracurricular activities and to establish a community of like-minded language learners. The combination of curriculum-based strategies coupled with innovative projects, and extracurricular and outreach activities is intended to serve as a guideline for teachers and scholars alike who are in need of best practices they can use to boost enrollment and attract and retain more students.

This book fills the need for a text that integrates Information and Communication Technologies (ICTs) into English for Specific Purposes (ESP). It offers insights on current methodological principles in ESP in both academic and professional contexts, drawing on authentic teaching and learning situations, and analyses best practice guidelines. Part I begins with ESP pedagogical principles and technological practice in order to focus on its two main branches: English for Academic Purposes, which includes linguistic skills and students' needs, and English for Occupational Purposes, specifically looking at Business, Medical and Translators courses. This book is a great resource for ESP researchers, educators and students, because it provides case studies of how ICTs can be used in English for multiple purposes. Authors present their experiences of integrating tools into their instructions, with each chapter contributing unique pedagogical implications.

Writing Made Easy: Just the Basics is the culmination of Timothy Sharkey's 15-year effort to put the good information about writing into one book.

This book is a very important contribution to the growing body of work on postgraduate, and specifically doctoral, education ... I find the metaphor of pushing boundaries to be very appropriate, as it suggests a field of study and a range of behaviours and institutional organisational approaches to postgraduate education that are dynamic and characterised by fluidity, creativity and challenge... Readers will gain new theoretical perspectives, ideas for improved practice, and fresh perspectives on boundaries and pressing issues that deserve to be pushed and conceptualised in new ways. - Professor Ann Austin (Higher, Adult and Lifelong Education Michigan State University)

This book offers a global presentation of issues under study for improving science education research in the context of the knowledge-based society at a European and international level. It includes discussions of several theoretical approaches, research overviews, research methodologies, and the teaching and learning of science. It is based on papers presented at the Third International Conference of the European Science Education Research Association (Thessaloniki, Greece, August 2001).

Laurie Kirszner and Stephen Mandell, authors with nearly thirty years of experience teaching college writing, know what works in the classroom and have a knack for picking just the right readings. In Patterns for College Writing, they provide students with exemplary rhetorical models and instructors with class-tested selections that balance classic and contemporary essays. Along with more examples of student writing than any other reader, Patterns has the most comprehensive coverage of active reading, research, and the writing process, with a five-chapter mini-rhetoric; the clearest explanations of the patterns of development; and the most thorough apparatus of any rhetorical reader, all reasons why Patterns for College Writing is the best-selling reader in the country. And the new edition includes exciting new readings and expanded coverage of critical reading, working with sources, and research. It is now available as an interactive Bedford e-book and in a variety of other e-book formats that can be downloaded to a computer, tablet, or e-reader. Read the preface.
