***This book addresses contemporary
discourses on a wide variety of topics
related to the ideological and
epistemological changes of the 19th, 20th
and 21st centuries, and the ways in which
they have shaped the Spanish language and
cultural manifestations in both Spain and
Hispanic America. The majority of the
chapters are concerned with 'otherness' in
its various dimensions; the alien Other -***

foreign, immigrant, ethnically different, disempowered, female or minor - as well as the Other of different sexual orientation and/or ideology. Following Octavio Paz, otherness is expressed as the attempt to find the lost object of desire, the frustrating endeavour of the androgynous Plato wishing to embrace the other half of Zeus, who in his wrath, tore off from him. Otherness compels human beings to search for the complement from which they were severed. Thus a male joins a female, his other half, the only half that not only fills

him but which allows him to return to the unity and reconciliation which is restored in its own perfection, formerly altered by divine will. As a result of this transformation, one can annul the distance that keeps us away from that which, not being our own, turns into a source of anguish. The clashing diversity of all things requires the human predisposition to accept that which is different. Such a predisposition is an expression of epistemological, ethical and political aperture. The disposition to co-exist with

the different is imagined in the de-anthropocentricization of the bonds with all living realms. And otherness is, in some way, the reflection of sameness (mismidad). The other is closely related to the self, because the vision of the other implies a reflection about the self; it implies, consciously or not, a relationship with the self. These topics are addressed in this book from an interdisciplinary perspective, encompassing arts, humanities and social sciences.

We are spurred into action by our troubles

and fears; but all too often our action fails to address the true causes of our worries. When trying to make sense of our lives, we tend to blame our own failings and weaknesses for our discomforts and defeats. And in doing so, we make things worse rather than better. Reasonable beings that we are, how does this happen and why does it go on happening? These are the questions addressed in this new book by Zygmunt Bauman - one of the most original and perceptive social thinkers writing today. For Bauman, the task of

sociology is not to censor or correct the stories we tell of our lives, but to show that there are more ways in which our life stories can be told. By bringing into view the many complex dependencies invisible from the vantage point of private experience, sociology can help us to link our individual decisions and actions to the deeper causes of our troubles and fears - to the ways we live, to the conditions under which we act, to the socially drawn limits of our imagination and ambition. Sociology can help us to understand the processes that

have shaped the society in which we live today, a society in which individualization has become our fate. And sociology can also help us to see that if our individual but shared anxieties are to be effectively tackled, they need to be addressed collectively, true to their social, not individual, nature. The Individualized Society will be of great interest to students of sociology, politics and the social sciences and humanities generally. It will also appeal to a broader range of readers who are interested in the changing nature of our

social and political life today.

South-East Asia has developed rapidly as a tourist destination, but what are the effects of this growth upon the peoples of the region? How far is it possible to control the impact of tourism whilst also supporting the industry's role in the region's development? This book, first published in 1993, attempts to answer these questions by providing a critical analysis of the nature of tourism as it has developed in the area. It questions commonly held assumptions about tourism both from a western perspective and from

the point of view of policy makers in the region. It explores central issues such as the impact of tourism on the environment, culture and the economy, placing it within an historical and political context in order to assess the implications of current developments. The contributors use case studies from a variety of countries on such aspects as the sex industry, dream holidays and rural handicrafts, assessing tourist perceptions, both domestic and international, and policy decisions. By taking a long-term perspective it should

provoke thought on the ways to develop sustainable tourism for the future.

Why was the sultan, descendent of the Prophet Muhammad, and head of a dynasty that had ruled Morocco for more than two hundred years, so eager to read this account? Perhaps he thought it would illuminate some troubling matters: how the French acquired their power and their mastery over nature; how they led their daily lives, educated their children, treated their women and servants. In short, the sultan wanted to know the condition of

French civilization and why it differed from his. As-Saffar provided the answers. Moreover, as we read the account, Muhammad as-Saffar comes alive for us. We see him reflecting on the beauty of women, contorting during his ritual ablutions, and suffering from boredom at endless dinners. His opinions and ideas infuse every page. For him the journey was more than a catalog of curiosities; it was a transforming experience. Given our very limited knowledge of the time and the absence of other voices that speak with

As tourism service standards become more homogeneous, travel destinations worldwide are conforming yet still trying to maintain, or even increase, their distinctiveness. Based on more than two years of fieldwork in Yogyakarta, Indonesia and Arusha, Tanzania, this book offers an in-depth investigation of the local-to-global dynamics of contemporary tourism. Each destination offers examples that illustrate how tour guide narratives and practices are informed by widely circulating imaginaries of the past as well as personal imaginings of the future.

case-study approach with significant theoretical development to challenge explanations of occupational segregation. It examines the diversity of women's employment experience, gender segregation within employment establishments, employment and domestic relations, and the place of gender in perceptions of inequality. The book develops the concepts of component-wage and full-wage jobs in the context of work histories and employment relations, and establishes their usefulness in the study of the social adequacy of wages. In doing so, it provides a close and critical examination of the power of gender as an explanatory concept in employment and domestic relations,

Even though Africans continued to be exchanged as chattel, urban frontiers allowed a number of enslaved blacks to negotiate the right to hire out their own time, often greatly enhancing their autonomy within the Atlantic commercial system. In *The Black Urban Atlantic in the Age of the Slave Trade*, eleven original essays by leading scholars from the United States, Europe, and Latin America chronicle the black experience in Atlantic ports, providing a rich and diverse portrait of the ways in which Africans experienced urban life during the era of plantation slavery. In this unique exploration of the mysteries of the human brain, Roger Bartra shows that consciousness is a phenomenon that occurs not only in the mind but also in an external network, a symbolic system. He argues that the symbolic systems created by humans in art, language, in cooking or in dress, are the key to understanding human consciousness. Placing culture at the centre of his analysis, Bartra brings together findings from anthropology and cognitive science and offers an original vision of the continuity between the brain and its symbolic environment. sexuality, and identity. This book presents the novel in German since 1990 through a set of close readings both of international bestsellers (including Daniel Kehlmann's *Measuring the World* and W. G. Sebald's *Austerlitz*) and of less familiar, but important texts (such as Yadé Kara's *Sela Berlin*). Each novel discussed in the volume has been chosen on account of its aesthetic quality, its impact and its representativeness; the authors featured, among them Nobel Prize winners Günter Grass, Elfriede Jelinek and Herta Müller demonstrate the energy and quality of contemporary writing in German.

In that environment, as Sebastiaan Faber argues in *Exile and Cultural Hegemony*, the Spaniards' conception of their role as intellectuals changed markedly over time. The first study of its kind to place the exiles' ideological evolution in a broad historical context, *Exile and Cultural Hegemony* takes into account developments in both Spanish and Mexican politics from the early 1930s through the 1970s. Faber pays particular attention to the intellectuals' persistent nationalism and misplaced illusions of pan-Hispanist grandeur, which included awkward and ironic overlaps with the rhetoric employed by

their enemies on the Francoist right. This embrace of nationalism, together with the intellectuals' dependence on an increasingly authoritarian Mexican regime and the international climate of the Cold War, eventually caused them to abandon the Gramscian ideal of the intellectual as political activist in favor of a more liberal, apolitical stance preferred by, among others, the Spanish philosopher Jose Ortega y Gasset. With its comprehensive approach to topics integral to Spanish culture, both students of and those with a general interest in twentieth-century Spanish literature, history, or culture will find *Exile and Cultural Hegemony* a fascinating and groundbreaking work.
