This collection assembles the best interviews from Steve Cushing's long-running radio program
Blues Before Sunrise, the nationally syndicated, award-winning program focusing on vintage
blues and R&B. As both an observer and performer, Cushing has been involved with the blues
scene in Chicago for decades. His candid, colorful interviews with prominent blues players,
producers, and deejays reveal the behind-the-scenes world of the formative years of recorded
blues. Many of these oral histories detail the careers of lesser-known but greatly influential
blues performers and promoters. The book focuses in particular on pre–World War II blues
singers, performers active in 1950s Chicago, and nonperformers who contributed to the early
blues world. Interviewees include Alberta Hunter, one of the earliest African American singers
to transition from Chicago's Bronzeville nightlife to the international spotlight, and Ralph
Bass, one of the greatest R&B producers of his era. Blues expert, writer, record producer, and
cofounder of Living Blues Magazine Jim O'Neal provides the book's foreword.

The Secrets of House Music Production

"'The audio effects workshop' is designed to help anyone involved in recording and post-production understand audio effects and how to use them. First, you'll learn about the nature of sound and how the human ear receives it and perceives it--foundational knowledge that's key to understanding how audio effects work to modify sound. Next, you'll be introduced to numerous audio effects. The effects you'll learn about will include noise gates, EQ, compressors, expanders, limiters, chorus, delay, reverb, modulators, stereo imaging, stereo panning, and more. You'll also be introduced to a number of analysis tools, and you'll see just how useful and important these can be. You'll then take the crucial next steps, learning how these different effects behave in combination with each other. In this context, you'll learn about concepts such as serial and parallel effects (FX) processing and how to use them to your advantage. Concepts are explained in a friendly, conversational tone, using real-world practical examples"--Resource description p.

"Our cities drive innovation and growth, but they also propel us into housing crises and give rise to ever-greater inequality, as the super-rich displace the well-off and the workers who run our essential services are ghettoised and pushed out to the suburbs. There is a new urban crisis, and it is undermining the foundations of our society. In this bracingly original work of research and analysis, leading urbanist Richard Florida demonstrates how our cities are evolving in the twenty-first century, for good and for ill. From the world's superstar metropolises to the urban slums of the developing world, he shows how the crisis touches all of us, and sets out how we can make our cities more inclusive, ensuring prosperity for all"--Provided by publisher.

"Logic Pro X - The Details", from the best-selling GEM series (Graphically Enhanced Manuals), is the follow-up book of "Logic Pro X - How it Works". It explains all the remaining features in Logic Pro X with the same style by using rich illustrations and diagrams that are not found in any other manual. This is the first time that even beginners and intermediate Logic users can explore the more advanced features in Logic due to that easy to understand, visual approach of this manual. The book is up to date with the latest Logic Pro X v10.0.7 and its new features and functionality. Due to the limitation of the print-on-demand books, this book is divided into two parts as the paperback versions. Here is the content of the Part 1 and Part 2: Part 1 1 - Introduction: About the GEM series 2 - Workflow: The most important and most underrated topic when using Logic is how to use it efficiently. That's why I start the book with that chapter. 3 - Advanced Editing: To really become a Logic "Pro-user", you need all the available editing tools on your Logic tool belt. 4 - Flex Introduction: Finally, Audio Regions have the same freedom when it comes to editing as their MIDI Region counterparts. 5 - Flex Time: No time restrictions for Audio Regions anymore. No matter what tempo an audio file was recorded in, you can change it and even quantize it. 6 - Flex Pitch: If you ever wanted to change the pitch information in Audio Regions but couldn't afford the Melodyne app or couldn't (under-)stand it, then Logic has the most easy to use tool for you. 7 - Browsers: The three Browsers in Logic don't get the same respect from their users. Either they frown upon Apple Loops or don't know what to do with the Media Browser in the first - now you will. 8 - Audio File Management: The problem with having a lot of stuff is how to manage that stuff. This is also true for all the Logic related files. You better learn how to manage them before you start to lose them. 9 - Advanced Audio: There is much more to Audio in Logic that meets the eyes. I dive into all those pro features Logic has to offer to show you what is going on under the hood. 10 - Advanced MIDI: You can also advance your knowledge about the MIDI features in Logic, in addition to its audio features. 11 - Automation: Find out everything about Automation in Logic Pro, both Automations (yes there are two) and there are hidden secrets too. Part 2 12 - Music Notation: There are applications just for music notation. With Logic, that is included. No matter if you want to print out a single melody

or an entire orchestral score - you can do it. 13 - Tempo &
Time: Tempo and Time seems to be easy topics on the outside. But
be warned, this chapter goes deep, where no other manual has
gone before. 14 - Working to Picture: Logic is the best and most
popular DAW when it comes to scoring to picture. Learn all the
stuff you need to know - to do exactly that. 15 -
Synchronization: If you made it through the Tempo & Time
chapter, then this one is the right chapter for you with lots of
information beyond Logic. 16 - The Environment: The scariest
place in Logic, sending shivers down the spine of most Logic
users - unless you know your way around ... then all of a sudden
it becomes the most powerful place in Logic. 17 - Surround
Sound: If two speakers are not enough to do your Project good,
then it's time to move up to the world of Surround Sound. 18 -
Control Surfaces: Logic will also surrender to outside powers.

The history of the vocoder: how popular music hijacked the Pentagon's speech scrambling weapon The vocoder, invented by Bell Labs in 1928, once guarded phones from eavesdroppers during World War II; by the Vietnam War, it was repurposed as a voice-altering tool for musicians, and is now the ubiquitous voice of popular music. In How to Wreck a Nice Beach—from a mis-hearing of the vocoder-rendered phrase "how to recognize speech"—music journalist Dave Tompkins traces the history of electronic voices from Nazi research labs to Stalin's gulags, from the 1939 World's Fair to Hiroshima, from artificial larynges to Auto-Tune. We see the vocoder brush up against FDR, JFK, Stanley Kubrick, Stevie Wonder, Neil Young, Kraftwerk, the Cylons, Henry Kissinger, and Winston Churchill, who boomed, when vocoderized on V-E Day, "We must go off!" And now vocoder technology is a cell phone standard, allowing a digital replica of your voice to sound human. From T-Mobile to T-Pain, How to Wreck a Nice Beach is a riveting saga of technology and culture, illuminating the work of some of music's most provocative innovators.

Thulani Davis' synesthetic documentary poems breathe impressionistic life into the sonic-social history of East Coast avant-garde jazz, soul and punk Written between 1974 and 1985, these are Davis' most anthologized works. Featured musicians and dancers include Cecil Taylor, the Art Ensemble of Chicago, Bad Brains, Henry Threadgill, Thelonious Monk, the Revolutionary Ensemble, the Commodores, Ishmael Houston-Jones and many more, in performances at historic venues such as the Five Spot, the Village Vanguard and the Apollo. Nothing but the Musicis further proof of Davis' place as a crucial figure, alongside poets Jayne Cortez, Sonia Sanchez and Ntozake Shange, in the cultural landscape surrounding the Black Arts Movement. Thulani Davis(born 1949) is the author of the novels 1959and Maker of Saints, several works of poetry and the forthcoming book The Emancipation Circuit: Black Activism Forging a Culture of Freedom(Duke University Press). *From October 1959 until the mid-1970s, Paul Oliver and Mack McCormick
collaborated on what they hoped to be a definitive history and
analysis of the blues in Texas. Both were prominent scholars and
researchers—Oliver had already established an impressive record of
publications, and McCormick was building a sprawling collection of
primary materials that included field recordings and interviews with
blues musicians from all over Texas and the greater South. Despite
being eagerly awaited by blues fans, folklorists, historians, and
ethnomusicologists who knew about the Oliver-McCormick collaboration,
the intended manuscript was never completed. In 1996, Alan Govenar, a
respected writer, folklorist, photographer, and filmmaker, began a
conversation with Oliver about the unfinished book on Texas blues.
Subsequently, Oliver invited Govenar to assist him, and when Oliver
became ill, Govenar enlisted folklorist and ethnomusicologist Kip*
