Cosmeceuticals and Active Cosmetics discusses the science of nearly two dozen cosmeceuticals used today. This third edition provides ample evidence on specific cosmeceutical substances, their classes of use, skin conditions for which they are used, and points of interest arising from other considerations, such as toxicology and manufacturing. The book discusses both cosmetic and therapeutic uses of cosmeceuticals for various conditions including rosacea, dry

skin, alopecia, eczema, seborrheic dermatitis, purpura, and vitiligo. Active ingredients in the following products are discussed: caffeine, curcumin, green tea, Rhodiola rosea, milk thistle, and more. Also covered are topical peptides and proteins, amino acids and derivatives, antioxidants, vitamins E and C, niacinamide, botanical extracts, and biomarine actives. Providing ample scientific references, this book is an excellent guide to understanding the science behind the use of cosmeceuticals to treat a variety of dermatological conditions.

A special edition of the book Science Without Borders is dedicated to the most important problem of modern civilization at present - the fight against a pandemic of COVID-19. The authors of this issue offer their concept of reducing the risks of coronavirus infection and mortality from it before the advent of the vaccine. Based on the analysis of long-term clinical and laboratory tests of the drug "AZEOMED", the authors give convincing arguments in support of the possibility of effective use of the drug "AZEOMED" in the process of prevention and treatment of COVID-19. Clinical and laboratory studies of the mineral composition "AZEOMED" were coordinated and funded by the International Scientific and Technical Complex "Intergeo-Tethys". The book contains data on analogues of the drug AZEOMED produced in different countries. A delightful visual compendium and very nearly a substitute for good common sense, How To is the silly and seriously useful guide to mastering the miscellany of modern life. Packed in this chunky little volume are hundreds of instructional diagrams, culled from vintage how-to books, manuals, and product packaging, illustrating how to do anything you'll ever need to do—and many things you won't. With a bare minimum of text and just a few action arrows, these hard-working graphics are here to help. Learn how to use chopsticks, breakdance, tie a trash bag, diaper a baby, and parallel park. Discover the right way to do a cartwheel, use dental floss, hammer a nail, and slice bread. And if you've ever wondered whether you were walking correctly, wonder no more. With chapters to help you navigate the daily concerns of manners and grooming, home and family, health and safety, sports and exercise, and science and the world at large, this pocket-sized primer is the only book you'll ever really need. Honest.

Today we find the applications of nanotechnology in all spheres of life.

Nanotechnology: Therapeutic, Nutraceutical and Cosmetic Advances discusses recent advances in the field, particularly with therapeutics, nutraceuticals and cosmetic sciences. Therapeutics is an area which has perhaps benefitted the

most, although nanoscience and technology have quietly entered the realms of food science and are playing pivotal roles in the efficient utilization of nutraceuticals. Finally, even before therapeutics came cosmetics and companies started marketing unique products embedding the beneficial and advanced properties enabled by the use of nanostructures. This book highlights trends and applications of this wonderful new technology.

Preparation of Phytopharmaceuticals for the Management of Disorders: The Development of Nutraceuticals and Traditional Medicine presents comprehensive coverage and recent advances surrounding phytopharmaceuticals, nutraceuticals and traditional and alternative systems of medicines. Sections cover the concepts of phytopharmaceuticals, their history, and current highlights in phytomedicine. Also included are classifications of crude drugs, herbal remedies and toxicity, traditional and alternative systems of medicine, nanotechnology applications, and herbal cosmeticology. Final sections cover applications of microbiology and biotechnology in drug discovery. This book provides key information for everyone interested in drug discovery, including medicinal chemists, nutritionists, biochemists, toxicologists, drug developers and health care professionals. Students, professors and researchers working in the area of pharmaceutical sciences and beyond will also find the book useful. Includes the history and current highlights in phytomedicine, along with classifications of crude drugs, herbal drug technologies and herbal cosmeticology Provides detailed information on herbal remedies and toxicity, traditional and alternative systems of medicine, and applications of microbiology and biotechnology in drug discovery Discusses the nutritional and health benefits of nutraceuticals and how they help in the management and treatment of metabolic diseases

Nanobiomaterials in Galenic Formulations and Cosmetics: Applications of

Nanobiomaterials is one of the first books on the market related to the application of nanotechnology in galenic formulations and cosmetics. This book provides the results of current research for those working in an applied setting. The advantage of having all this information in one coherent text is the focused nature of the chapters and the ease of which this information can be accessed. This collection of titles brings together many of the novel applications these materials have in biology, and discusses the advantages and disadvantages of each application and the perspectives of the technologies based on these findings. At the moment there is no other comparable book series covering all the subjects approached in this set of titles. Offers an updated and highly structured reference material for students,

researchers, and practitioners working in biomedical, biotechnological, and engineering fields Serves as a valuable resource of recent scientific progress, along with most known applications of nanomaterials in the biomedical field Features novel opportunities and ideas for developing or improving technologies in nanomedicine and nanobiology

Cosmetic Science and Technology: Theoretical Principles and Applications covers the fundamental aspects of cosmetic science that are necessary to understand material development, formulation, and the dermatological effects that result from the use of these products. The book fulfills this role by offering a comprehensive view of cosmetic science and technology, including environmental and dermatological concerns. As the cosmetics field quickly applies cutting-edge research to high value commercial products that have a large impact in our lives and on the world's economy, this book is an indispensable source of information that is ideal for experienced researchers and scientists, as well as non-scientists who want to learn more about this topic on an introductory level. Covers the science, preparation, function, and interaction of cosmetic products with skin Addresses safety and environmental concerns related to cosmetics and their use Provides a graphical summary with short introductory explanation for each topic Relates product type performance to its main components Describes manufacturing methods of oral care cosmetics and body cosmetics in a systematic manner This text examines the concept of cosmetology and developments in surgical and clinical techniques in cosmetic skin care.

A foremost critic of the English language here reflects on beauty and the language that it inspires in authors from Kant to Keats, Hawthorne to Housman. "An excellent and eloquent book."--James Wood, New York Times Book Review "A beautiful book about beauty. Enormously learned, allusive, recuperative, and citational, it is a passionate meditation on what has been said about beauty in the West from the Greeks to the present day."--J. Hillis Miller "Donoghue talks . . . with a delightful informality and absence of dogma. . . . One of the most charming features of Denis Donoghue's book is his appendix of 'afterwords,' brief quotations on beauty from sundry writers."--John Bayley, New York Review of Books "Continuously fascinating, continuously readable, the book speaks of beauty, and of speakers of beauty, in its own calm, steady voice. You won't want to lay it down."--Hugh Kenner

Milady has evolved for over 85 years to become what it is today, the cornerstone of beauty and wellness education. We are very excited and proud to announce the latest edition of Milady Standard Cosmetology, the most commonly used resource in cosmetology education. For decades since our first textbook published, it has been our commitment to provide students with the foundation in the principles and skills needed to master the science and art of cosmetology, and with this latest version that commitment has not waivered. For the new edition, celebrity stylist Ted Gibson served as Creative Director on the project. The result is a brilliant new design with over 750 new photos and a gorgeous layout, providing a visually stunning resource to engage today's learner. We also recruited a team of twelve authors, made up of top professionals and educators in the industry, to provide the most current information on concepts and techniques. During our extensive peer review and development process, we were asked for a resource that placed emphasis on essential content needed for licensure success, and we feel confident that we delivered. Milady Standard Cosmetology will continue to be a source of education that students can count on, not only while in school, but throughout their careers.
