The text provides a fresh perspective on the contemporary politics of law, courts, the legal profession, and judicial policymaking, often with an

It covers four distinct areas: 1) What is law?; 2) How are courts organized and how do they work procedurally?; 3) What influences court access and, ultimately, judicial decision-making?; and, 4) How do courts make policy, and how is judicial authority constrained? It has relevant and contemporary analyses of literature from the political science and legal fields; and analyses from scholars who argue from the quantitative (attitudinal and strategic models) and the qualitative (new institutionalism) perspectives. few seconds before the judge endanger the rights of defendants. Not so, says Malcolm Feeley in this provocative and original book. Basing his argument on intensive study of the lower criminal court system, Feeley demonstrates that the absence of formal "due process" is preferred by all of the court's participants, and especially by defendants. Moreover, he argues, "it is not all clear that as a group defendants would be better off in a more 'formal' court system," since the real costs to those accused of misdemeanors and lesser felonies are not the fines and prison sentences meted out by the court, but the costs incurred before the case even comes before the judge—lost wages from missed work, commissions to bail bondsmen, attorney's fees, and

wasted time. Therefore, the overriding interest of the accused is not to secure the formal trappings of the judicial process, but to minimize the time, and money, spent dealing with the court. Focusing on New Haven, Connecticut's, lower court, Feeley found that the defense and prosecution often agreed that the pre-trial process was sufficient to "teach the defendant a lesson." In effect, Feeley demonstrates that the informal practices of the lower courts as they are presently constituted are more "just" than they are usually given credit for being. **Seminar paper from the year 2015 in the subject Politics - International Politics - Topic: International Organisations, grade: 1,0, University of Tübingen, language: English, abstract: More than 10 years ago the International Criminal Court entered into force. It was designed to be a model of a global governing of human rights. Trying to set universal standards for the jurisdiction of human rights, it is the first time in human history, that serious human rights violations such as genocide, crimes against humanity, war crimes, and the crime of aggression can be judged in a court of law. The thesis will argue, that the ICC therefore presents a milestone on the realization of international human rights. However, the ICC has to face many obstacles,**

most prominently the opposition by several UN member states, who refuse to accede the Court. The thesis will illuminate this development with the help of some cosmopolitan approaches. The focus will be on the progress of universal human rights over the last centuries with the remarkable climax of the Universal Declaration of Human Rights, which also laid the roots for the later foundation of the ICC. In chapter 3 this thesis will broach the issue of the obstacles regarding the realization of human rights. As mentioned above, a major opposition still stems from the nation states, who are partly still stuck on a realist view of the international system. Out of fear, that they might lose sovereignty, they prefer to follow their national interest instead of

He reflects on the observation that human rights are in practice in most of all cases incompatible with the national interest of a nation state. Although the majority of all states will commit themselves on paper to the noble goal of human rights promotion, in reality their foreign policy will quite often display quite the opposite. As a reply, I will argue with the help of David Held, that a cosmopolitan answer to overcome these obstacles is possible by creating common institutions as a new layer of legal competence to which people can transfer public powers. He introduces this provocative collection of essays with the observation that American constitutional theory has arrived at a dead-end, largely because it has been perceived as constitutional law rather than a form of political theory. He puts this view into sharp perspective by looking at what are in effect, three constitutions--the political, the economic, and the emergent corporate instrument. He analyzes important issues that confront the Supreme Court, policymakers, and theorists, such as the expansion of government control, the Court as a political mechanism, the power of corporations, politics and the First Amendment, the challenge of nuclear weapons, and
