

## Cpa Australia Study Material

This book serves as a guide to strategic management accounting. It introduces new and useful concepts on how to collect, analyse, and evaluate options to enable managers to steer corporate directions and write strategic plans for the long-term success of the corporation. Starting with basic techniques and the latest strategic management approaches, the book then presents cases that show the techniques employed step by step. By demonstrating how easily the ideas can be translated into action, it is a valuable resource for business practitioners, as well as for students taking advanced management accounting courses.

BPP Learning Media offers a range of learning materials for students working to complete the CPA Programme. Our Passcards, Revision Kits and I-Pass products complement the structure and content of the CPA syllabus, help focus your revision and hone your exam technique.

The essential guide for accounting practitioners. The 2013 CPA Accounting Handbook is again first to market and provides students and educators with all the legally enforceable Australian Accounting Standards (aligned to IFRS), all with accompanying new technical editor notes. There have been important changes to the standards over the past twelve months which makes the 2013 Handbook with its Technical Editor Notes a 'must-have' edition. The enhanced companion website for this title, www.pearson.com.au/highered/handbooks, will include the amending standards, and will be updated throughout 2013 with any further changes to the accounting standards, accompanied by technical editor notes. Students may also use the Student Self Test quizzes aligned to particular AASBs and with hints and references back to the Handbook as practice and preparation for exams.

*This revised and updated fifth edition of Accounting for Managers builds on the international success of the previous editions in explaining how accounting is used by non-financial managers. Emphasizing the interpretation rather than the construction of accounting information, Accounting for Managers encourages a critical, rather than an unthinking acceptance of accounting techniques. Whilst immensely valuable for planning, decision-making and control, users of accounting information need to recognize the assumptions behind, and the limitations of particular accounting techniques. As in the previous editions, the book links theory with practical examples and case studies drawn from real business situations across a wide range of manufacturing, retail and service industries.*

• increase understanding of the gap between the current skills of many accountants in some regions and the skills that are relevant in increasingly digitized and globalized economies;
• convey the essential features of Competency-Based Accounting Education, Training, and Certification (CBAETC);
• provide a common reference framework for organizations pursuing CBAETC and the consultants working with them;
• assist countries in developing in-country plans and implementing in-country processes that produce accountants with higher-order skills relevant to their economy's rapidly evolving needs; and
• improve financial reporting, auditing, and regulation. This guide complements and builds on International Education Standards (IES™) of the International Accounting Education Standards Board™ (IAESB™).
