"Get ready, the garden you've always longed for is at your fingertips. With images and ideas, Cultivating Garden Style releases your inner designer and helps you create a landscape that is yours and yours alone!" –Ivette Soler, author of The Edible Front Yard In Cultivating Garden Style, Rochelle Greayer shares ways to create outdoor areas that are charming, comfortable, appealing, and reflect individuality. It features twenty-three unique garden styles accompanied by advice on how to recreate the look. Simple step-by-step projects, like how to make a macramé plant hanger, help the reader personalize the space. Helpful tips and tricks, including how to pick the right tree and pick the right combination of plants and containers, offer essential lessons in gardening and design. More than 1,500 dazzling color photographs give the book a visual punch.

Some lives are bigger than one reality. Because they have to be. The day Mara Lantern meets herself, her life gets bigger. When she meets her brother from an alternate universe, it becomes more complicated. And when her new mentor says creatures from other realms are invading this world, she thinks it's absurd. Until he explodes into a cloud of dust and reassembles himself. That makes her doubt. Then he says only she can stop the invaders. That makes her afraid. ----- Join Mara Lantern and her companions in a seven-volume science fiction adventure through reality, time and space, where they encounter everything from steampunk dream worlds to artificial humans, from dragons to disembodied spirits, where metaphysics is science and magic is just one belief from coming true. Author's note: To enjoy the story, you should read this series in order. Book 1: Broken Realms Book 2: Broken Souls Book 3: Broken Dragon Book 4: Broken Pixels Book 5: Broken Dreams Book 6: Broken Spells Book 7: Broken Talisman This series was previously titled The Chronicles of Mara Lantern. Individual book titles and contents have not changed.

Acadia Tucker's long love affair with perennial foods has produced this easy-to-understand guide to growing and harvesting them. A regenerative farmer who is deeply concerned about global warming, Tucker believes there may be no better time to plant these hardy crops. Perennials can weather climate extremes, promote healthy soil, mitigate drought conditions, and thrive without chemical fertilizers and pesticides. Many can be harvested year round. They taste good, pack lots of nutrients, and require little tending. In short, the world is a better place with more perennials in it and this book intends to get us there. Tucker inspires action by first laying the groundwork for tending an organic, regenerative garden. She highlights the 10 steps she recommends gardeners take to help perennial foods thrive. But most of the book is dedicated to profiles of popular perennial herbs, fruit, and vegetables, with explicit instructions on how to plant, grow, and harvest them. Tucker also offers suggestions on how to store and preserve perennials. Growing Perennial Foods is illustrated with dozens of pen & ink drawings and ends with a short chapter on frequently asked questions. And since this is a field guide, each profile gives readers enough space to write in any additional notes. While designed for gardening novices, this book is also for experienced gardeners who want to grow more resilient crops, and could use a little guidance. Growing Perennial Foods is part of our Growing Food book series and a companion guide to Growing Good Food: A Citizen's Guide to Backyard Carbon Farming, which is also written by Acadia Tucker and set to publish in early 2019.

The word “meadow” conjures images of wide expanses of land, but a mini meadow — a kind of informal flower garden started with seed sown directly into the soil — can be any size; plus, it’s fun, easy to grow, and good for the planet. With as little as 50 square feet and for less than \$20, gardeners can plant a colorful meadow that demands little in the way of space, mowing, or maintenance, uses less water than a traditional lawn, and provides habitat for pollinators — not to mention a natural exploration space for children. From choosing the right variety of seeds, preparing the soil, sowing evenly, and watering well, author Mike Lizotte guides readers through the process of successfully creating a miniature meadow that suits their climate, soil, and growing goals, whether planting to beautify a hellstrip, halt erosion, fill a boggy spot, or establish a nesting area for bees and butterflies. Mini Meadows offers gardeners of all levels the keys to creating, caring for, and reaping the rewards of thriving meadows through the seasons, year after year.

For almost fifty years, Joel P. Smith served as editor and publisher of the Eufaula Tribune, the newspaper of record in Eufaula in southeast Alabama. For much of that time, week after week, he wrote his "Candid Comments" column, which traced the often-intersecting history of Eufaula and Smith's own life. In the selections from "Candid Comments" collected in this volume, Smith ranges from Eufaula's "top ten characters" to the history of the Chattahoochee River, from the Tribune's initial support of Governor George Wallace until it ceased to endorse him, and from marriage and fatherhood to press junkets in Egypt and Cuba.

Become a more attentive observer and deepen your appreciation for the natural world. The unique five-year calendar format of The Naturalist’s Notebook helps you create a long-term record and point of comparison for memorable events, such as the first songbird you hear in spring, your first monarch butterfly sighting of summer, or the appearance of the northern lights. Biologist Nathaniel T. Wheelwright and best-selling author Bernd Heinrich teach nature lovers of all ages what to look for outdoors no matter where you live, using Heinrich’s classic illustrations as inspiration. As you jot down one observation a day, year after year, your collected field notes will serve as a valuable record of your piece of the planet. This deluxe book, with a three-piece case, gilt edges, a burgundy ribbon bookmark, and a belly band with gold foil stamping, is a perfect gift for all nature lovers.

Lecturer in horticulture, Julie Kilpatrick, takes you on a journey into the world of plants, from their evolution to their birth, growth, anatomy and finally, death. Along the way, she'll introduce you to some of her favourite plants and teach you how to care for any plant by understanding its signals.
