Lessons from Antigua

Crew is two things. It is a schoolwide culture that supports social and emotional wellness, character development, and academic and life success for students and staff. It is also a unique and transformational meeting structure for secondary school advisories, elementary school morning and closing circles, and for staff collaboration. We Are Crew provides guidance for bringing Crew to your school or district and highlights numerous examples from successful schools that have used Crew to foster student and staff success

for more than 25 years. We Are Crew is paired with an online toolkit of resources and a suite of open-source videos.

This Handbook is a useful guide and reference for Water Utility workers to learn useful information pertaining to water metering and backflow prevention operations that can be used each day on the job.

Some of the topics covered are: meter reading, meter selection, meter repair, tools, safety, regulations, compliance, solving problems, backflow installation, backflow maintenance, engineering, construction, plan review, inspection, career

advice, customer service, billing, water services, and utility projects. From Back Cover: ATTAIN INDUSTRY KNOWLEDGE, OPERATIONAL COMPETENCE, AND TRADE SKILLS WITHOUT YEARS OF JOB TRAINING! Readers just starting careers at Water Utilities will benefit most from this Handbook, but even seasoned veterans will find useful insights on a wide range of topics related to water meters and backflow preventers. Mark Hurley currently supervises water metering and cross connection control operations for a municipal utility. He started his career over a

decade ago as a crew leader repairing water meters with an underground utility contracting company. Afterward, Mark worked his way up the ranks at two utilities as a meter crew worker, water distribution crew leader, and lead meter service technician.

The Lessons from Antigua can be a set of guidelines. They can encourage mutual respect, responsible action, and brotherly love among workers. They are taken from more than forty years of experience in the trades and my involvement in the United States Navy Seabees. The Lessons hold topics that can be talked about in a team setting. They include, but are not limited to, faith, fighting, freedom, and resolution. These topics are covered separately, at times together, and at times they overlap because life is like that—one part will overlap

another. The purpose of Lessons from Antigua is to raise awareness on how different thought patterns and approaches to managing men will be met with a defined outcome. It is not my intention to put down methods or management. They got us where we are today, and there are strong points in any or all methods. There are, however, areas in any style that can be improved, and that is where awareness is born. Neither is this an idealist approach to work, because some men need to be led with a stick or fear of punishment and some

respond better to a carrot or a reward. A rare few just need a problem to solve to be motivated. The emotionally intelligent part is determining when carrots are needed and when to put the stick away, or how to use more carrots and less stick.
