The Crisis

Renowned political scientist Ian Bremmer draws lessons from global challenges of the past 100 years—including the pandemic—to show how we can respond to three great crises unfolding over the next decade. In this revelatory, unnerving, and ultimately hopeful book, Bremmer details how domestic and international conflicts leave us unprepared for a trio of looming crises—global health emergencies, transformative climate change, and the AI revolution. Today, Americans cannot reach consensus on any significant political issue, and US and Chinese leaders behave as if they're locked in a new Cold War. We are squandering opportunities to meet the challenges that will soon confront us all. In coming years, humanity will face viruses deadlier and more infectious than Covid. Intensifying climate change will put tens of millions of refugees in flight and require us to reimagine how we live our daily lives. Most dangerous of all, new technologies will reshape the geopolitical order, disrupting our livelihoods and destabilizing our societies faster than we can grasp and address their implications. The good news? Some farsighted political leaders, business decision-makers, and individual citizens are already collaborating to tackle all these crises. The question that should keep us awake is whether they will work well and quickly enough to limit the fallout—and, most importantly, whether we can use these crises to innovate our way toward a better world. Drawing on strategies both time-honored and cutting-edge, from the Marshall Plan to the Green New Deal, The Power of Crisis provides a roadmap for surviving—even thriving in—the 21st century. Bremmer shows governments, corporations, and every concerned citizen how we can use these coming crises to create the worldwide prosperity and opportunity that 20th-century globalism promised but failed to deliver.

The Power of Crisis

The Crisis

The Crisis of Christendom

**The Crisis, founded by W.E.B. Du Bois as the official publication of the NAACP, is a journal of civil rights, history, politics, and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, The Crisis has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. It has chronicled, informed, educated, entertained and, in many instances, set the economic, political and social agenda for our nation and its multi-ethnic citizens.**

Theorizing Crisis Communication

***This final volume on the history of Christendom is concerned with the crises of the modern era, the turning points in the diseases which plagued humanity during these two centuries. The book discusses in detail Nazi and Japanese militarism and its crisis in World War II, the damage caused by the inhuman system of communism and its fall in 1989, and the origins and consequences of the denial of the dignity of the human person in the modern culture of death. As did earlier volumes in this series, the book reflects an unabashedly Christian and Catholic view of history, taking as one of its major themes the centrality of the papacy to the destiny of the West. Carroll holds that God and individual men and women, not impersonal social and economic forces, make history.--***
