PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

language of the documents to be retrieved. For example, a Finnish-speaking person could pose a query to a CLIR system in Finnish (the source language) to retrieve documents written in English (the

Download File

PDF Cross

Language

target language).

Information

The language

Retrieval And

barrier is usually

Evaluation

crossed by

Workshop Of

translating the

Cross Language

query into the

Evaluation Forum

target language,

Cle

after which the

documents can be

retrieved with the

methods of

monolingual

Download File

PDF Cross

Language

information
retrieval (IR).

Aligned text

collections

(corpora) are

common query

translation

resources in CLIR.

A parallel corpus is

a collection where

texts in one

language are

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

aligned with their translations in another language.

The aligned texts of a comparable corpus are more loosely related.

They are not translations, but share topics and include common vocabulary in the

Download File

PDF Cross

Language

two languages.

Both kinds of corpora can be used to train statistical

translation models, but parallel

corpora are preferred because more dependable translation

knowledge can be

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

derived from them.

However, parallel

corpora do not

exist for all

language pairs

and domains.

Hence, it is

sometimes

necessary to resort

to noisier

comparable

corpora. This

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

thesis proposes new methods for the acquisition, alignment, and employment of comparable corpora. The acquisition method is based on language-aware focused web crawling, where

employing the

Cle

hyperlink structure

of the web. In the

alignment phase,

the source

language

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

documents are used as CLIR queries to retrieve target language documents. The similarity of the query to the documents, and various other factors, are used as evidence to form alignments

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

between the source and target language documents. The constructed corpora were employed in query translation as a cross-language similarity thesaurus, a structure where

Download File

PDF Cross

Language

target language
words are ranked
based on their

similarity with a
source language
word that is given
as input. The

highest ranking

words are

assumed to be
either translations
of the input word

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

or related to it in some other manner. The methods were evaluated with extensive IR experiments that covered different language pairs, domains, and test data. The proposed CLIR

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

approach was
combined with
approaches based
on bilingual
dictionaries. The
combined
approaches
outperformed pure
dictionary-based
translation. In
addition, the
comparable corpus

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

translation
performed better in
domain-specific
CLIR than
translation utilizing
high-quality
parallel corpora.

This suggests that
the proposed
methods are
particularly useful
in domains where

L. Littman Bonnie J.

A statistical language model, or more simply a language model, is a probabilistic mechanism for generating text. Such a definition is general enough to include an endless variety of schemes. However, a distinction should be made between generative models, which can in principle be used to

Download File PDF Cross

synthesize artificial text, and discriminative techniques to classify text into predefined categories. The first statistical language modeler was Claude Shannon. In exploring the application of his newly founded theory of information to human language, Shannon considered language as a statistical source, and

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cl

measured how well
simple n-gram models
predicted or, And
equivalently, compressed
natural text. To do this,
he estimated the entropy
of English through
experiments with human
subjects, and also
estimated the cross-
entropy of the n-gram
models on natural 1 text.
The ability of language
models to be

Download File

PDF Cross

Language

Information

quantitatively evaluated
in this way is one of their

important virtues. Of

course, estimating the

true entropy of language

is an elusive goal, aiming

at many moving targets,

since language is so

varied and evolves so

quickly. Yet fifty years

after Shannon's study,

language models remain,

by all measures, far from

the Shannon entropy

Download File PDF Cross

limit in terms of their predictive power.

However, this has not kept them from being useful for a variety of text processing tasks, and moreover can be viewed as encouragement that there is still great room for improvement in statistical language modeling.

Retrieval

Graph theory and the

fields of natural

language processing

and information

retrieval are well-

Download File

PDF Cross

Language

studied disciplines.

Traditionally, these areas have been perceived as distinct, with different algorithms, different applications and different potential

end-users. However, recent research has shown that these

disciplines are

Download File

PDF Cross

Language

intimately connected,

with a large variety

of natural language

processing and

information retrieval

applications finding

efficient solutions

within graph-

theoretical

frameworks. This

book extensively

covers the use of

Download File

PDF Cross

Language

graph-based

algorithms for

natural language

processing and

information retrieval.

It brings together

topics as diverse as

lexical semantics, text

summarization, text

mining, ontology

construction, text

classification and

Download File

PDF Cross

Language

information retrieval,

which are connected

by the common

underlying theme of

the use of graph-

theoretical methods

for text and

information

processing tasks.

Readers will come

away with a firm

understanding of the

Download File

PDF Cross

Language

major methods and

applications in

natural language

processing and

information retrieval

that rely on graph-

based representations

and algorithms.

Search for

information is no

longer exclusively

limited within the

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

native language of the user, but is more and more extended to other languages. This gives rise to the problem of cross-language information retrieval (CLIR),

whose goal is to find relevant information written in a different language to a query.

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

In addition to the problems of monolingual information retrieval (IR), translation is the key problem in CLIR: one should translate either the query or the documents from a language to another. However, this translation problem is

Download File

PDF Cross

Language

not identical to full-text machine

translation (MT): the

goal is not to produce

a human-readable

translation, but a

translation suitable

for finding relevant

documents. Specific

translation methods

are thus required.

The goal of this book

Download File

PDF Cross

Language

is to provide a

comprehensive

description of the

specific problems

arising in CLIR, the

solutions proposed in

this area, as well as

the remaining

problems. The book

starts with a general

description of the

monolingual IR and

Download File

PDF Cross

Language

CLIR problems.

Information

Different classes of

Retrieval And

approaches to

Evaluation

translation are then

Workshop Of

presented:

Cross Language

approaches using an

Evaluation Forum

MT system,

Cle

dictionary-based

translation and

approaches based on

parallel and

comparable corpora.

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

In addition, the typical retrieval effectiveness using different approaches is compared. It will be shown that translation approaches specifically designed for CLIR can rival and outperform high-quality MT systems.

Download File

PDF Cross

Language

Information

Retrieval And

Evaluation

Workshop Of

Cross Language

Evaluation Forum

Cle

Finally, the book offers a look into the future that draws a strong parallel between query expansion in monolingual IR and query translation in CLIR, suggesting that many approaches developed in monolingual IR can

Download File

PDF Cross

Language

be adapted to CLIR.

Information

The book can be used

Retrieval And

as an introduction to

Evaluation

CLIR. Advanced
