This National Book Award finalist by Pulitzer Prize-winning novelist Louise Erdrich is the first installment in an essential nine-book series chronicling 100 years in the life of one Ojibwe family, and includes beautiful interior black-and-white artwork done by the author. She was named Omakayas, or Little Frog, because her first step was a hop. Omakayas and her family live on an island in Lake Superior. Though there are growing numbers of white people encroaching on their land, life continues much as it always has. But the satisfying rhythms of their life are shattered when a visitor comes to their lodge one winter night, bringing with him an invisible enemy that will change things forever—but that will eventually lead Omakayas to discover her calling. By turns moving and humorous, this novel is a breathtaking tour de force by a gifted writer. The beloved and essential Birchbark House series by Louise Erdrich includes The Birchbark House, The Game of Silence, The Porcupine Year, Chickadee, and Makoons.

A challenging year of standards lies ahead. With the new Finish Line English Language Arts, Third Edition, your students can get the extra support they need to master the Common Core-based standards you teach every day. Finish Line supplements your core basal program with instruction and practice that are concise and simply presented. The workbook is divided into units that parallel the strands in the Common Core State Standards (CCSS) for ELA at grade level. Finish Line features a gradual release model--from teacher-led instruction to individual student work--in a four-part lesson format: Skill Introduction, Focused Instruction, Guided Practice, and Independent Practice. The book includes a full unit of writing standards for students to practice the writing process, learn how to answer open-ended questions, and apply grammar and usage conventions. Much like Common Core-based standards and assessments, the book requires students to do close reading of rigorous text. Unit reviews include traditional item types and item types found on Common Core assessments. A glossary includes terms that appear in boldface throughout the book.

You've Come to the Right Place for Student Achievement! It's time to be proactive—get to know the newly adopted Common Core State Standards with New York Crosswalk Coach! As new, rigorous student-achievement expectations are introduced across your state, rest assured Crosswalk Coach has you covered. New York Crosswalk Coach clearly identifies how the standards are embedded in the new Common Core. This robust resource provides an easy approach to teaching the CCSS and is a great professional development tool for educators.

*David Macaulay, co-creator of the international bestseller *The Way Things Work*, brings his signature curiosity and detailing to the story of the steamship in this meticulously researched and stunningly illustrated book. Prior to the 1800s, ships crossing the Atlantic Ocean relied on the wind in their sails to make their journeys. But invention of steam power ushered in a new era of transportation that would change ocean travel forever: the steamship. Award-winning author-illustrator David Macaulay guides readers through the fascinating history that culminated in the building of the most advanced—and last—of these steamships: the SS United States. This book artfully explores the design and construction of the ship and the life of its designer and engineer, William Francis Gibbs. Framed around the author's own experience steaming across the Atlantic on the very same SS United States, *Crossing on Time* is a tour de force of the art of explanation and a touching and surprising childhood story. Personalized Learning: A Guide for Engaging Students with Technology is designed to help educators make sense of the shifting landscape in modern education. While changes may pose significant challenges, they also offer countless opportunities to engage students in meaningful ways to improve their learning outcomes. Personalized learning is the key to engaging students, as teachers are leading the way toward making learning as relevant, rigorous, and meaningful inside school as outside and what kids do outside school: connecting and sharing online, and engaging in virtual communities of their own. Renowned author of the Heck: Where the Bad Kids Go series, Dale Basye, and award winning educator Peggy Grant, provide a go-to tool available to every teacher today—technology as a way to 'personalize' the education experience for every student, enabling students to learn at their various paces and in the way most appropriate to their learning styles.

Americans have long recognized that investments in public education contribute to the common good, enhancing national prosperity and supporting stable families, neighborhoods, and communities. Education is even more critical today, in the face of economic, environmental, and social challenges. Today's children can meet future challenges if their schooling and informal learning activities prepare them for adult roles as citizens, employees, managers, parents, volunteers, and entrepreneurs. To achieve their full potential as adults, young people need to develop a range of skills and knowledge that facilitate mastery and application of English, mathematics, and other school subjects. At the same time, business and political leaders are increasingly asking schools to develop skills such as problem solving, critical thinking, communication, collaboration, and self-management - often referred to as "21st century skills." Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century describes this important set of key skills that increase deeper learning, college and career readiness, student-centered learning, and higher order thinking. These labels include both cognitive and non-cognitive skills- such as critical thinking, problem solving, collaboration, effective communication, motivation, persistence, and learning to learn. 21st century skills also include creativity, innovation, and ethics that are important to later success and may be developed in formal or informal learning environments. This report also describes how these skills relate to each other and to more traditional academic skills and content in the key disciplines of reading, mathematics, and science. Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century

summarizes the findings of the research that investigates the importance of such skills to success in education, work, and other areas of adult responsibility and that demonstrates the importance of developing these skills in K-16 education. In this report, features related to learning these skills are identified, which include teacher professional development, curriculum, assessment, after-school and out-of-school programs, and informal learning centers such as exhibits and museums.

The burgeoning multidisciplinary field of social and emotional learning (SEL) now has a comprehensive and definitive handbook covering all aspects of research, practice, and policy. The prominent editors and contributors describe state-of-the-art intervention and prevention programs designed to build students' skills for managing emotions, showing concern for others, making responsible decisions, and forming positive relationships. Conceptual and scientific underpinnings of SEL are explored and its relationship to children's and adolescents' academic success and mental health examined. Issues in implementing and assessing SEL programs in diverse educational settings are analyzed in depth, including the roles of school- and district-level leadership, teacher training, and school-family partnerships.

This edition is not just a rehash of old, albeit classic and still important, stuff. Instead, it provides a fresh perspective on a topic of perennial interest for those working in the field that has been variously called training and development, human resource development, performance technology, and workplace learning and performance. The fresh perspective takes into consideration two additional instructor settings to the traditional face-to-face environments that most instructors and trainers know -- that is, online and blended settings. These settings are, of course, becoming more critical as instruction moves beyond classroom settings to include virtual and combinations of classroom and other media delivery methods. The ibstpi instructor competencies match up well to Mapping the Future (Bernthal, Colteryahn, Davis, Naughton, Rothwell, & Wellins 2004), the current ASTD competency study of the field now known as Workplace Learning and Performance (WLP) and previously known as Training and Development (T&D). WLP is more than a new name for an old subject and represents a fundamental paradigm shift in what it means to be a professional in the field formerly known as training. WLP is all about getting improved performance -- and therefore improved results -- in organizational settings through planned and unplanned learning interventions. Instruction is thus a means to an end and not an end in itself. The ibstpi instructor competencies dovetail well with that philosophy.

A Framework for K-12 Science Education and Next Generation Science Standards (NGSS) describe a new vision for science learning and teaching that is catalyzing improvements in science classrooms across the United States. Achieving this new vision will require time, resources, and ongoing commitment from state, district, and school leaders, as well as classroom teachers. Successful implementation of the NGSS will ensure that all K-12 students have high-quality opportunities to learn science. Guide to Implementing the Next Generation Science Standards provides guidance to district and school leaders and teachers charged with developing a plan and implementing the NGSS as they change their curriculum, instruction, professional learning, policies, and assessment to align with the new standards. For each of these elements, this report lays out recommendations for action around key issues and cautions about potential pitfalls. Coordinating changes in these aspects of the education system is challenging. As a foundation for that process, Guide to Implementing the Next Generation Science Standards identifies some overarching principles that should guide the planning and implementation process. The new standards present a vision of science and engineering learning designed to bring these subjects alive for all students, emphasizing the satisfaction of pursuing compelling questions and the joy of discovery and invention. Achieving this vision in all science classrooms will be a major undertaking and will require changes to many aspects of science education. Guide to Implementing the Next Generation Science Standards will be a valuable resource for states, districts, and schools charged with planning and implementing changes, to help them achieve the goal of teaching science for the 21st century.

The Curriculum Management Audit

Can we measure what we treasure? Can we build and sustain truly excellent schools focused on the ambitious goal of human flourishing? And can we hold ourselves accountable to the children and families we serve in ways that harness data to advance that goal? The National Center for Montessori in the Public Sector says "yes"! The Montessori Assessment Playbook shows us how to do it. Organized around 33 discrete tools, the Playbook provides a clear and actionable scaffold for building an assessment protocol that captures compelling student outcomes, such as perseverance, compassion, and creativity, and that links those outcomes to the investments we make to classrooms and schools. Emphasizing both coherence and precision, the Montessori Assessment Playbook shows us how to develop and implement a comprehensive assessment framework focused on human flourishing and, just as important, why such a framework is urgently needed.

If you are a teacher of grades K-6, you might be asking, "Should I teach grammar in my class on a daily basis? How would I go about doing this? And how can I teach grammar so it isn't boring to my kids?" In Grammar Matters, Lynne Dofman and Diane Dougherty answer these questions and more. Using mentor texts as the cornerstone for how best to teach grammar, this book provides teachers with almost everything they need to get kids not only engaged but excited about learning grammar. Divided into four parts--Narrative Writing, Informational Writing, Opinion Writing, and Grammar Conversations--this hand reference provides practical teaching tips, assessment ideas, grammar definitions, and specific mentor texts to help students learn about parts of speech, idioms, usage issues, and punctuation. Through "Your Turn Lessons," conversations, conferences, and drafting, revising, and editing exercises, students will learn not only specific concepts but also how to reflect upon and transfer what they have learned to other writing tasks, no matter the subject. The "Treasure Chest of Children's Books" provides an extensive list of both fiction and nonfiction books that fit naturally into grammar instruction. Eight appendices provide even more resources, including information on homophones, using mentor texts to teach grammar and conventions, checklists, comma rules, help for ELL students, and a glossary of grammar terms. Grammar Matters links instruction to the Common Core State Standards and features quality, classroom-tested tools that help teachers provide their students with the gifts of grammar and literacy.

Antoine of Oregon : A Story of the Oregon Trail The author of this series of stories for children has endeavored simply to show why and how the descendants of the early colonists fought their way through the wilderness in search of new homes. The several narratives deal with the struggles of those adventurous people who forced their way westward, ever westward, whether in hope of gain or in answer to "the call of the wild," and who, in so doing, wrote their names with their blood across this country of ours from the Ohio to the Columbia. To excite in the

hearts of the young people of this land a desire to know more regarding the building up of this great nation, and at the same time to entertain in such a manner as may stimulate to noble deeds, is the real aim of these stories. In them there is nothing of romance, but only a careful, truthful record of the part played by children in the great battles with those forces, human as well as natural, which, for so long a time, held a vast 4 portion of this broad land against the advance of home seekers. With the knowledge of what has been done by our own people in our own land, surely there is no reason why one should resort to fiction in order to depict scenes of heroism, daring, and sublime disregard of suffering in nearly every form.
