If you're thinking of buying cryptocurrency in the future, consider this... "If only I'd bought back then" Sound familiar? It probably does. Because when it comes to cryptocurrency, there are so many "if only" or "the one that got away" stories. 7 years ago you could've bought 1 Bitcoin for just 10 cents. That same Bitcoin is worth over \$8000 today. 100 dollars invested in 2010 would be worth over 8 million dollars today! But now you have an opportunity that's far from typical. It's an opportunity to cryptocurrencies, while the prices are down 60% from the start of the year? You're probably thinking - if prices are down so much, why on Earth would I buy? The answer is, this dip is only temporary. Because it gives institutions like investment banks a chance to load up their own holdings for less. Banks like JP Morgan, who just last year were adamantly against cryptocurrency - but now are offering it as an investment option And the Chicago Board of Exchange who just filed an application to provide the world's first Bitcoin ETF. Which is why earlier this month, Bitcoin rose 28%

in just 4 days. Indicating that the next big boom might just be upon us... In this giant 15 book bundle you will discover: A complete analysis of over 70! different cryptocurrencies (no other book on Amazon comes close) 7 giant cryptocurrency mistakes that are guaranteed to lose you money - and how you can avoid making them A step-by-step guide on how to safely store your newly bought cryptocurrency A secret but completely legal way to buy coins on Coinbase without paying transaction fees (potentially saving you hundreds of dollars per year) How to use cryptocurrency to hedge against your traditional portfolio A coin with game changing technology which will open up partnerships with Fortune 500 companies A fundamental analysis of 7 high growth potential cryptocurrencies that all utilize Ethereum technology How a tiny plastic tube is making investors in this marijuana company very rich The only gaming coin with actual ties to the casino industry (this is vital for future growth) How to legally invest in cryptocurrencies tax free How even a technophobic 90 year old can buy Bitcoin is less than 15 minutes (no more difficult than buying anything else online) ...and much, much more! Most financial trading books read more like an infomercial than a book – this is different Would you jump out of an airplane without a parachute? Then why would you start making trades online before you learned what you were doing? It's crazy! But with deep discount brokers making it look so easy for individual investors, it's no wonder consumers today are lulled into a false sense of security. You can't rely on outdated textbooks and strategies anymore. But if you adapt, you can make a considerable fortune with these new market conditions. Here's just a fraction of what you'll discover inside: The best brokerage accounts for swing traders (setting this up right can save you \$1000+ a year in commissions) How social media moves asset prices, and how to always be first to act on these (do this and you'll almost always ensure lower entry prices than your competition) The only 3 strategies you need for swing trading success (despite what everyone else tells you, it's these 3 which will bring 90% of your profits) How to always ensure the right entry position for a trade How to spot under or overvalued stocks with 99% accuracy The "magic trading number": If you win this percentage of your trades, you'll make massive profits (lower than you think) The secret to finding your trading edge (hint: the risk-reward ratio isn't enough) When to invest, and more important when NOT to invest like Warren Buffett The 10 best traders to follow on Twitter for maximum profit opportunities The #1 thing new traders miss about aftermarket trading. Get this right and you'll have a huge advantage How to set a proper stop loss so you don't get stopped out prematurely. One of the biggest mistakes new traders make is having a stop loss which is too tight. Do this instead and you'll profit when the market moves in your favor. The "zen trader" strategy which makes you immune to losses (which although rare, will occur with any trading plan) A useful, yet barely known website which breaks company news faster than relying on mainstream news services. How to use the "other 80/20 rule" to profit from short term price movements. 3 profit securing lessons you can learn from the DOTCOM bubble Why a new trader should never trade cryptocurrency How one trader made \$1.4 million in a single day with 1 options trade, and why you shouldn't try to replicate their strategy "Hedge-Fund Style" money management for absolute beginners How to profit from legal marijuana (all the upside of cannabis growing companies but without the red tape and volatility) A simple technique you can do in just 5 minutes a day. This is used by top hedge fund traders, and almost always guarantees an increase in your percentage of winning trades A "backdoor" technique which lets the market do the work for you (an effective "passive trading" strategy and used by Wall Street all the time) ...and much, much more. You may have experienced various obnoxious and even misleading advertisements of easy, get rich trading strategies. This is not one of those. You won't have to spend thousands on expensive trading software or "magic bullet systems" In fact, you can get started using an online trading account and use free websites for your information (you'll find the best two in Chapter 7) All written in plain, easy to understand English. WHAT IS CRYPTOCURRENCY? Cryptocurrency - otherwise called crypto - is a computerized money

intended to fill in as a mode of trade. It utilizes cryptography (the act of getting correspondence under an outsider) to get and confirm exchanges, just as to control the making of new units of a specific cryptocurrency. DECENTRALIZATION: When discussing decentralization with regards to Bitcoin and other crypto/blockchain networks, this is certainly not a solitary idea. From multiple points of view, it is essentially the reflection of an optimal situation: a future where the basic frameworks that support our lives, like the current monetary framework, are not kept up with by confided in directors however by a strong, competent organization of friends. To many, it is the general purpose of frameworks like Bitcoin and other blockchains - its *raison d'etre*. Notwithstanding the theoretical idea of the term, decentralization has become a center piece of the informing in the digital money industry and is frequently one of the primary things a novice experiences when they investigate the space. However, incidentally or suitably, there is absence of clearness and agreement in regards to what the term really implies, in vision and practice. For the motivations behind this aide, we'll momentarily unload the unpredictable thought and ideally give some valuable setting to the Bitcoin amateur. Initially, set up that decentralization has both specialized and social segments, which can regularly be inseparably connected. For instance, an intensive investigation of Bitcoin's decentralization would need to evaluate the whole convention stack, start to finish - the different subsystems inside it, how the organization adjusts over the long haul, the circulation of force among the different partners, and the impact of outer powers outside of the Bitcoin network like enterprises and governments.
