Apply the "science" of reading to students with moderate-to-severe developmental disabilities, including autism. The Early Literacy Skills Builder program incorporates systematic instruction to teach both print and phonemic awareness. ELSB is a multi-year program with seven distinct levels and ongoing assessments so students progress at their own pace. Five years of solid research have been completed through the University of North Carolina at Charlotte, proving ELSB to be a highly effective literacy program and more effective than a sight-word only program. ELSB is based upon the principles of systematic and direct instruction. It incorporates scripted lessons, least-prompt strategies, teachable objectives, built-in lesson repetition, and ongoing assessments. The seven ELSB levels contain five structured lessons each. All students begin at Level 1. If a student struggles here, go back and administer Level A. Instruction is one-on-one or in small groups. Teach scripted lessons daily in two 30-minute sessions. On the completion of each level, formal assessments are given. ELSB includes everything you need to implement a multi-year literacy curriculum.

Getting Ready for the 4th Grade Assessment Test: Help Improve Your Child 's Math and English Skills – Many parents are expressing a demand for books that will help their children succeed and excel on the fourth grade assessment tests in math and English –especially in areas where children have limited access to computers. This book will help students practice basic

math concepts, i.e., number sense and applications as well as more difficult math, such as patterns, functions, and algebra. English skills will include practice in reading comprehension, writing, and vocabulary. Rubrics are included for self-evaluation.

“ This eloquent, elegant book thoughtfully plumbs the . . . consequences of our dependence on plastics ” (The Boston Globe, A Best Nonfiction Book of 2011). From pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we ’ re starting to realize it ’ s not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we ’ re at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We ’ re drowning in the stuff, and we need to start making some hard choices. Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can ’ t seem to live without. “ When you write about something so ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences. ”

—SF Gate “ Freinkel ’ s smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics. ”

—Publishers Weekly “ A compulsively interesting story. Buy it (with cash). ” —Bill McKibben, author of *The End of Nature* “ What a great read—rigorous, smart, inspiring, and as seductive as plastic itself. ” —Karim Rashid, designer

The NYSTCE pedagogical exams are designed according to the Constructivist Learning Theory. Although many teachers have studied aspects of Constructivism in their college programs, including Piaget, Bloom, Vygotsky and Gardner, the connection between these theorists is not always clarified. This book teaches you the correct approach for deconstructing the questions on the exam in order to pick the correct answer. This study guide is designed to help prospective teachers understand this theory and how it applies to learning. The strategies are easy to understand and are the key to passing these State exams. The book covers strategies for decoding the questions and outlines for writing a strong essay as well as common mistakes that teachers make when taking the exams. This time, pass the exam!

Antoine of Oregon : A Story of the Oregon Trail The author of this series of stories for children has endeavored simply to show why and how the descendants of the early colonists fought their way through the wilderness in search of new homes. The several narratives deal with the struggles of those adventurous people who forced their way westward, ever westward, whether in hope of gain or in answer to "the call of the wild," and who, in so doing, wrote their names with their blood across this country of ours from the Ohio to the Columbia. To excite in the hearts of the young people of this land a desire to know more regarding the building up of this great nation, and at the same time to entertain in such a manner as may stimulate to noble deeds, is the real aim of these stories. In them there is nothing of romance, but only a careful, truthful record of the part played by children in the great battles with those forces, human as well as natural, which, for so long a time, held a vast 4 portion of this broad land against the advance of home seekers. With the knowledge of what has been done by our own people in our own

land, surely there is no reason why one should resort to fiction in order to depict scenes of heroism, daring, and sublime disregard of suffering in nearly every form.

Essential for anyone seeking a teaching certificate in the state of New York.

Our research on literacy has produced considerable information about literacy demands of jobs, job proficiency of men of various literacy skill levels, methodologies for estimating literacy demands of jobs, and efforts to modify men and jobs to better match men to jobs.

While this research has been reported for public use, the information is presented in technical reports, journal articles, and HumRRO publications of limited distribution. Because many of these varied

documents are widely dispersed and hard to obtain, it was deemed desirable to make a summation of this research available in this single volume. Part I reports research to develop general methodologies for estimating functional literacy demands of jobs. Each of four chapters describes an approach to this problem; a fifth chapter presents a general summary and critical discussion of the various methods of estimating reading requirements of jobs used in this research and by others. Part II is concerned with methods of reducing discrepancies between personnel literacy skills and the literacy demands of jobs. The first chapter describes basic research on reducing reading demands of training schools by substituting listening for reading, and comments on preparing job and training aids capable of being more effectively used by less literate personnel. The second chapter describes an extensive R & D effort to design, develop, and implement a job-related literacy training program for the Army - an effort still under way at this writing. While changes undoubtedly will be made to the program as reported, the chapter is offered as an example of one approach to teaching reading "in the content areas" on a large scale. Table of contents:

Introduction Part I: Determining Functional Literacy Demands of Jobs *
