

Cultural Competency Training Module

CULTURAL COMPETENCE: A PRIMER FOR EDUCATORS, 2nd Edition, covers the basics of multicultural education, making it easy for instructors to assign as a main text or use in conjunction with other books. The author gives special attention to the psychosocial dimensions of teaching culturally diverse populations. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

The purpose of this study was to measure the level of cultural competence of senior level dental hygiene students. The students were given a pretest, the Inventory for Assessing the Process of Cultural Competence- Student Version (IAPCC-SV). The students then completed the US Department of Health and Human Services (HHS) Office of Minority Health (OMH) Cultural Competency Program for Oral Health Professionals, a three module online training program. Three weeks after the pre-test the students retook the IAPCC-SV. The results indicated that there was a significant increase from the pre-test mean (55.14) to the post-test mean (61.37). This significant increase in a short three week time frame indicates that the Cultural Competency Program for Oral Health Professionals is effective for increasing dental hygiene students' levels of cultural competence.

Cultural Competency for the Health Professional reviews the importance of the implementation of cultural competency by allied health professionals, and the process of assessment, training and evaluation. This comprehensive text includes a clear and concise overview of the necessary tools to apply cultural competency processes as well as systematic and disciplined approaches to the process of achieving it. Attention is also given to some of the reservations that may exist in various health professions with interests in moving in the direction of cultural competency such as associated costs, limited time, and beyond. Cultural Competency for the Health Professional provides health professions students with key cultural competency information and practical insight into how to apply this knowledge in their day-to-day work environments as they deal with patients on a clinical basis. Interview With Dr. Shalala Chapter 10 includes an interview with Dr. Shalala conducted by the author of this text. Dr. Donna Shalala is currently the President of the University of Miami, in Florida. She has been in this position since 2001. Prior to her current role, she was appointed by President Clinton to serve as U.S. Secretary of Health and Human Services (HHS) and held this position for 8 years which amounted to the longest serving HHS

Secretary in U.S. history to date. She was responsible for a budget of almost \$600 billion, overseeing a number of programs such as Social Security, Medicare, Medicaid, Child Care and Head Start, Welfare, the Public Health Service, the National Institute of Health (NIH), The Center for Disease Control and Prevention (CDC) and the Food and Drug Administration (FDA) (Shalala, 2011).

FEATURES

- Overview of the demographic changes in the United States
- Accreditation requirements (programmatic, specialized and institutional)
- Cultural nuances of specific groups
- Comprehensive view of the Culturally and Linguistically Appropriate Services (CLAS) standards with an emphasis on the clinical aspect of various allied health professions
- Attitudinal survey with established reliability and validity

INSTRUCTOR RESOURCES

- PowerPoint Slides
- Over 150 Test Questions
- Case Studies

Measuring the Impact of Cultural Competence Training for Dental Hygiene Students

Manual for developing intercultural competencies

This handbook deals with the question of how people can best live and work with others who come from very different cultural backgrounds. Handbook of Intercultural Training provides an overview of current trends and issues in the field of intercultural training. Contributors represent a wide range of disciplines including psychology, interpersonal communication, human resource management, international management, anthropology, social work, and education. Twenty-four chapters, all new to this edition, cover an array of topics including training for specific contexts, instrumentation and methods, and training design.

Achieving Cultural Competency: A Case-Based Approach to Training Health Professionals provides the necessary tools to meet the ever-growing need for culturally competent practitioners and trainees. Twenty-five self-study cases cover a variety of medical topics, including cardiovascular, pulmonary, neurology, oncology, hematology, immunology, and pediatric disorders. Actual scenarios that occurred in clinical settings help the user gain direct insight into the realities of practice today. Cultural factors covered within the cases include cultural diversity plus gender, language, folk beliefs, socioeconomic status, religion, and sexual orientation. This book is an approved CME-certifying activity to meet physicians' cultural competency state requirements. Get 25 pre-approved self-study American Dietetic Association credits at no additional charge when you purchase the book. Email hark@lisahark.com for further instructions.

Black Acting Methods seeks to offer alternatives to the Euro-American performance styles that many actors find themselves working with. A wealth of contributions from directors, scholars and

actor trainers address afrocentric processes and aesthetics, and interviews with key figures in Black American theatre illuminate their methods. This ground-breaking collection is an essential resource for teachers, students, actors and directors seeking to reclaim, reaffirm or even redefine the role and contributions of Black culture in theatre arts.

Handbook of Intercultural Training

This open access book explores cultural competence in the higher education sector from multi-disciplinary and inter-disciplinary perspectives. It addresses cultural competence in terms of leadership and the role of the higher education sector in cultural competence policy and practice. Drawing on lessons learned, current research and emerging evidence, the book examines various innovative approaches and strategies that incorporate Indigenous knowledge and practices into the development and implementation of cultural competence, and considers the most effective approaches for supporting cultural competence in the higher education sector. This book will appeal to researchers, scholars, policy-makers, practitioners and general readers interested in cultural competence policy and practice.

With a focus on a broad spectrum of topics--race, ethnicity, gender, disability, and sexual orientation at the federal, tribal, state, and local levels--this book equips readers to better understand the complex, real-world challenges public administrators confront in serving an increasingly diverse society. The book's main themes include: What is cultural competency and why is it important? Building culturally competent public agencies; Culturally competent public policy; Building culturally competent public servants; How do agencies assess their cultural competency and what is enough? PA scholars will appreciate the attention given to the role of cultural competency in program accreditation, and to educational approaches to deliver essential instruction on this important topic. Practitioners will value the array of examples that reflect many of the common trade offs public administrators face when trying to deliver comprehensive programs and services within a context of fiscal realities.

Abstract: Palliative and end-of-life care is a field that is rapidly changing due to advancements in medical technology. New social workers are challenged to provide expertise in their delivery of end-of-life services within the medical field while recognizing unique cultural differences. This lack of

professional training presents a major barrier to improving care for dying patients and the bereaved. Social workers report their deficiencies in two key areas knowledge of end-of-life interventions and expertise in cultural competency. In response to this critical need for improved training, a grant was written to obtain funding for an ongoing end-of-life care training program on the best end-of-life cultural interventions for social workers in the hospice care profession. This 2-day training entitled, Bridges End-of-Life Care Training Program is based on NASW standards for cultural competency and end-of-life care. The actual submission or funding for this program was not required for the completion of this project.

DSM-5® Handbook of the Cultural Formulation Interview provides the background, context, and detailed guidance necessary to train clinicians in the use of the Cultural Formulation Interview (CFI), which was created as part of the 2007-2013 DSM revision process. The purpose of the CFI -- and this unique handbook -- is to make it easier for providers to account for the influence of culture in their clinical work to enhance patient-clinician communication and improve outcomes. Cultural psychiatry as a field has evolved enormously from the days when it was principally concerned with epidemiological and clinical studies of disease prevalence; it now examines a multitude of issues, primary among them the differing patient, family, and practitioner models of illness and treatment experiences within and across cultures. The editors, all of whom have been intimately involved in the evolution of the field, have designed the book and accompanying videos for maximum instructional and clinical utility. The Handbook boasts many strengths and useful features, including: A detailed description of each of the three CFI components: a core 16-item questionnaire, which can be applied in any clinical setting with any patient by any mental health clinician; an informant version of the core CFI used to obtain information from caregivers; and 12 supplementary modules that expand on these basic assessments. This material facilitates implementation of the CFI by clinicians. Over a dozen clinical vignettes are included to illustrate use of the three components, and the Handbook also includes multiple videos that demonstrate the application of portions of the core CFI, and several supplementary modules. Strategies for incorporating the CFI into clinical training are identified and discussed, furthering the objective of developing culturally-sensitive and astute practitioners. The theoretical bases of the CFI are explored, raising questions for discussion and identifying areas for further research. The CFI is a valuable tool for all patients, not just those judged to be culturally different. The CFI has been called the single most practically useful contribution of cultural psychiatry and medical anthropology to clinical psychiatry, primary care, and medicine in general. **DSM-5® Handbook on the Cultural Formulation Interview** is the only book on the market that equips readers with the skills and insight to incorporate the CFI into practice, making it a critically important addition to the clinical literature.

Cultural competence is more than an admirable goal: it is an essential skill set for mental health professionals working in a diverse global society marked by crisis and trauma. It is essential for clinicians to understand the intricate mix of history and self-concept, identity and tradition that are central not only for ameliorating psychological problems but to foster psychological health and well-being. As the definition of culture takes on broader meanings-at once embracing multiple identities and increasing globalization- Cultural Competency Training in a Global Society brings a vital perspective and practical understanding to clinical, counseling, and school psychologists, as well as to graduate students entering these fields. By describing a comprehensive training model for professional education and practice in the United States with ethnic minority groups, indigenous populations, immigrants, and refugees, this book has relevance for other multicultural societies because the implications are multidisciplinary in focus and potentially international in scope. The existing and emergent global multicultural populations described in this book represent the neglected human faces of economic globalization. Among the topics covered: Requirements for professional training in cultural competency. Research basis for cultural competency training. International resources and their usage in training and practice. Multicultural assessment in the service of intervention. Evaluating cultural competency training.

Cultural Competency for Health Administration and Public Health is serves as an introductory text addressing comprehensive coverage specific to the fields of health services administration and public health. While cultural competency has become a popular topic in these fields, the general population, health service administration and public health students, health service administrators and public health practitioners are in need of a greater key information relevant to the topic and how to apply this knowledge in their area of study/work. This book provides readers with a clear and concise overview of the subject matter and the necessary tools to apply cultural competency processes in various healthcare settings, offering a systematic and disciplined approach to the process of achieving cultural competence. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

DSM-5® Handbook on the Cultural Formulation Interview

The need for better quality services for people from different cultural backgrounds has widely been recognised. Calls for cultural competence training have resulted in many training activities, and yet there is little knowledge about the effectiveness of such training. This book reports on the development and evaluation of cultural competence training. An educational module was developed for staff working with people with drug and alcohol problems, with the aim of enhancing their cultural competence. The expectation was that their practice would improve by achieving a change in knowledge, attitude and behaviour of staff. This study sought to evaluate the success of the module in achieving a change in individual knowledge and behaviour, and if the learning had led to an improvement in services. It also highlights lessons that could be learnt from this study that could also inform the wider debate in educational research and anti-racism/diversity training.

Filling a gap in the existing library and information science

literature, this book consolidates recent research and best practices to address the need for diversity and social justice in the training and education of LIS professionals. • Addresses perennially important and emerging hot topics in librarianship, such as diversity, cultural competence, and social responsibility • Updates the ongoing discussion on cultural competence and diversity with new concepts, such as critical race theory • Authored by an expert who actively teaches and conducts research in the subject areas of library instruction and information literacy as well as diversity and social justice in librarianship

Praise for the Second Edition: "This book will help educators understand the multidimensional process of cultural competence, and the vignettes it provides will be useful to anyone who teaches cultural competence." -- Nursing Education Perspectives Based on proven research, this textbook is a unique "how-to" for nursing faculty called upon to educate students, nurses, and other health care providers on how to provide optimal care for culturally diverse populations. It offers a systematic approach featuring ready-to-use materials for planning, implementing, and evaluating cultural competence education strategies and programs. A wealth of practical information on all aspects of culturally competent communication and treatment--in both classroom and workplace settings--is supplemented with an assessment and evaluation toolkit that can be adapted for all educational levels. The third edition is reorganized to facilitate the incorporation of cultural competence into a greater variety of environments, and provides additional examples and case studies to better illustrate content. Updated and revised information, research findings, and expanded ready-to-apply strategies and exemplars are woven throughout all chapters. New and expanded chapters address curriculum; traditional classrooms, hybrid, and online courses; and clinical settings, immersion experiences, service learning, simulation, and nursing skills lab. Included are educational activities for academic, clinical, and professional association settings. Integrated reflection boxes, easy-to-apply action steps, toolkit resource boxes, references, and discussion questions help students to fully integrate the book's content. The text fulfills Cultural Competence accreditation requirements for undergraduate nursing programs and for institutions trying to obtain Magnet Status.

New to the Third Edition: Reorganized to address cultural competence in a variety of environments Expanded ready-to-apply strategies and exemplars A wealth of updated and revised information and research New and expanded chapters on curriculum and varied learning modalities New information on clinical settings, immersion experiences, service learning, simulation, and nursing skills lab Reflection boxes, easy-to-apply action steps, toolkit resource boxes, and discussion questions

Also available: For PhD students, instructors, institutions, and others who want to take it a step further, can purchase The Cultural Competence Education Resource Toolkit. This product contains questionnaires and evaluation methods for a variety of environments, and will enable the use to assess cultural competence in a group of

individuals, and a means to achieve optimal cultural competence. For more information, go to www.springerpub.com/cctoolkit.

Participant Workbook

Cultural Competency for Health Administration and Public Health is a clear and concise introduction to the topics and tools necessary for the application of cultural competency processes in various healthcare settings. The chapters offer an overview of demographic changes in the United States, as well as accreditation requirements and cultural competency, cultural nuances of specific groups, and a comprehensive review of the Culturally and Linguistically Appropriate Services (CLAS) Standards and beyond. Attention is also given to the associated costs, time, and skill sets associated with the p

Cultural competency training (CCT) programs are often used to train healthcare providers on the cultural needs and related healthcare disparities of patients. However, the current literature does not provide standardized best practice methods for CCT implementation, and CCT content is not consistent within healthcare disciplines and/or across disciplines (Beck & Boulton, 2012; Betancourt, Green, Carrillo, & Owusu Ananeh-Firempong, 2016; Crandall, George, Marion, & Davis, 2003; Lie, Lee-Rey, Gomez, Berekenyei, & Braddock, 2011). Additionally, current training programs do not typically address other factors of culturally appropriate care delivery in practice, such as provider bias. Current training programs also lack evaluation standards to effectively assess CCT interventions. The purpose of this research was to develop, pilot and evaluate a CCT training program. This research was completed in multiple phases and included the development of an assessment tool for the training, testing the validity and reliability of the assessment tool, implementing a newly developed CCT intervention and assessing the effects of the CCT related to the knowledge/awareness and attitudes/engagement of participants.

This resource supports evidence-informed approaches to improving the cultural competence of health service delivery. By reviewing the evidence from Australia, Canada, New Zealand and the US, it provides readers with a clear and systematic overview of the interventions and indicators applied to enable health system agencies and professionals to work effectively in various cross-cultural health care situations. The book highlights the importance of cultural competence and describes the current situation in the studied countries; identifies effective approaches and strategies for improving the situation; reviews the indicators for measuring progress; assesses the health outcomes associated with cultural competence; summarizes the quality of the evidence; and presents an evidence-informed conceptual framework for cultural competence in health. Cultural competence is critical to reducing health disparities and has become a popular concept in these countries for improving access to high-quality, respectful and responsive health care. This book provides policy makers, health practitioners, researchers and students with a much needed summary of what works to improve health systems, services and practice.

Each year, thousands of lesbian, gay, bisexual, transgender and intersex (LGBTI) asylum seekers apply for asylum in EU Member States. This book considers the position of LGBTI asylum seekers in European asylum law. Developing an encompassing approach to the topic, the book identifies and analyzes the main legal issues arising in relation to LGBTI people seeking asylum including: the underestimation of the relevance of criminalization of sexual orientation as well as the large scale violence against trans people in countries of origin by some European states; the requirement to seek State protection against violence even when they originate from countries where sexual orientation or gender identity is criminalized, or where the authorities are homophobic; the particular hurdles faced during credibility assessment on account of persisting stereotypes; and queer families and refugee law. The book gives a state of the art overview of law in Europe, both at the level of European legislation and at the level of Member State practice. While being largely focused on Europe, the book also takes into account asylum decisions from Australia, New Zealand, Canada, and the United States and is of relevance internationally, offering analysis of issues which are not specific to particular legal systems.

This book serves as a comprehensive, practical, and workshop-based program that facilitates change agents to help organizations and people develop cross cultural skills and global competence. It is grounded in the most rigorous and relevant theories, research, and learning methods and makes them easily accessible and fun to apply.

"No other training program hones in on these important multicultural topics with the scope and depth of the CBMCS Multicultural Training Program. We've had marked success implementing this program -- improving cultural competence in providers so they can offer more effective counseling to clients from diverse backgrounds. Trainees have also shown an increase in self-awareness and better understand their influence on therapy. CBMCS should be required training for counselors and social workers as well as others in the mental health field who work with diverse client populations." —Gloria Morrow, Ph.D., GM Psychological Services Bridging the gap between research and

practice, the CBMCS Multicultural Training Program will take mental health practitioners from cultural sensitivity to cultural proficiency. Eligible for up to 32 CE credits Eligible for Mental Health Services Act (Prop 63) Funds Based on several years of research and collaboration among the University of La Verne, the California Department of Mental Health, the California Institute of Mental Health, and the California Mental Health Directors Association, this unique training program gives mental health facilities a valuable tool in working with diverse populations. Developed with the frontline mental health practitioner in mind: Reliable Research Four comprehensive training modules came from rigorous research methods and multivariate statistical processes. The included Multicultural Reader provides trainers with critical background research, improving their knowledge base. The First Training Program That Empowers Trainers to Customize Workshops A 21-question, easy-to-administer cultural competence scale is at the core of this training program. This scale is a quick way for trainers to assess each individual mental health practitioner's level of cultural understanding, giving trainers the freedom to customize the program as needed. CBMCS includes the following materials: CBMCS Scale: A 21-item practitioner self-report scale, which was honed from five respected assessment scales that included provides the foundation for this extensive training program. (Qty. 25 included) Additional copies available at extra cost. CBMCS Multicultural Reader: Featuring leading research, this compilation of 29 articles provides a wellspring of seminal studies on delivering culturally competent care. Topics include general issues in multicultural counseling competence training, ethnic minority intervention and treatment research, and sociocultural diversities. One copy included in the Trainer's Package. Additional copies \$49.95 ea. CBMCS Training Modules: This step-by-step resource will guide trainers through four modules. Each module includes a description, techniques and methods, materials needed, references, handouts, PowerPoint slide presentation, trainer's notes, and evaluation as well as a scoring guide for the CBMCS scale. Module I - Multicultural Knowledge Module II - Awareness of Cultural Barriers Module III - Sensitivity and Responsiveness to Consumers Module IV - Sociocultural Diversities CBMCS Participant's Workbook: Exercises, group activities, and areas for reflection that follow along with the training modules. Includes the CBMCS Scale. VISIT: www.cbmcs.org for more information Build your intercultural communication skills to ensure the best possible patient outcomes. Includes DVD with dramatizations of realistic health-care scenarios. Cultural Competency Skills for

Health Professionals teaches techniques for meeting the challenges of working with culturally diverse patients and their families. The skills that health professionals and students acquire through using this workbook will improve their communication and problem-solving abilities when working across cultures. Cultural Competency Skills for Health Professionals approaches intercultural issues in health care from the perspective of communication. It sharpens your ability to understand the messages and information being communicated by patients and their families. The workbook provides eight learning modules based on realistic health-care scenarios, along with exercises and self-assessment tools. The modules include high-quality video dramatizations and worksheets, and cover topics including: Traditional roles of family care. Cultural issues in obtaining consent. Cultural issues in compliance. Language diversity in health care. Generational views on personal directives. Cultural issues in end-of-life care. Challenging cultural norms. Cultural influence in family decision-making.
