

Current Issues In English Language Teaching And Learning

This two volume handbook provides a comprehensive examination of policy, practice, research and theory related to English Language Teaching in international contexts. More than 70 chapters highlight the research foundation for best practices, frameworks for policy decisions, and areas of consensus and controversy in second language acquisition and pedagogy. The Handbook provides a unique resource for policy makers, educational administrators, and researchers concerned with meeting the increasing demand for effective English language teaching. It offers a strongly socio-cultural view of language learning and teaching. It is comprehensive and global in perspective with a range of fresh new voices in English language teaching research.

Pronunciation plays a crucial role in learning English as an international language, yet often remains marginalised by educators due to a lack of required phonetic and phonological knowledge. Pronunciation for English as an International Language bridges the gap between phonetics, phonology and pronunciation and provides the reader with a research based guide on how best to teach the English language. The book follows an easy to follow format which ensures the reader will have a comprehensive grasp of each given topic by the end of the chapter. Key ideas explored include:

- Articulation of English speech sounds and basic transcription
- Connected speech processes
- Current issues in English language pronunciation teaching
- Multimedia in English language pronunciation practice
- Using speech analysis to investigate pronunciation features

Using the latest research, Pronunciation for English as an International Language will facilitate effective teaching and learning for any individual involved in teaching English as a second, foreign or international language.

The Rise of English is a masterful account of the spread of English as the dominant lingua franca worldwide, its intimate connections with globalization and neoliberalism, and its effects on linguistic justice, opportunity, and identity. Deeply researched and wide-ranging in scope, this book shows how English has privileged some and disadvantaged others, but ultimately offers the promise of transcending cultural and linguistic borders in a multilingual world.

Although the notion of Global Englishes (GE) has been widely discussed in the literature, few books consider how GE can be translated into educational practice. This book addresses the incorporation of GE into language policy and curriculum, pedagogy and assessment practices, and focuses on a wide range of geographical and language contexts. Incorporating GE into language curriculum, pedagogy and assessment practices calls for a reframing of our pedagogical practices that take into account the use of Englishes in intercultural and multicultural encounters where people have different first languages and cultural backgrounds. This book will be of interest to policymakers, curriculum developers and practitioner-researchers in the area of English language education.

Current Issues in Language Teaching and Teacher Education

Global education has become a focus of many teachers and teacher educators. Its impact on foreign language teaching is constantly growing. This book explores current discourses in literary and cultural studies, as well as through environmental education or 'Content and Language Integrated Learning' (CLIL). Global issues - such as peace, human rights, globalization, sustainability, and the environment - have entered the school curricula world-wide. This book discusses the challenges of global education through English Language Teaching. (Series: Foreign Language Teaching in a Global Perspective - Fremdsprachendidaktik in Globaler Perspektive - Vol. 4) [Subject: Education, Language]

This volume brings together a collection of papers presented at the 2014 World Congress of the International Association of Applied Linguistics held in Brisbane, Australia, and represents current research and practice from across the globe related to reading, writing and visual literacy. As globalisation has resulted in an increase in the pursuit of second language (often English) literacy for those who want to enhance their education and employment options, the development of literacy skills cannot be left to chance. This book explores current efforts to teach literacy, the challenges involved in the development of literacies, and will inform educators and teacher trainers of ways to improve classroom pedagogies and develop literacy competencies. The volume will be of use to both new and seasoned researchers wishing to enhance their understanding of current perspectives in the development of literacies. It will also be of interest to language teachers and language policy makers as the papers address key issues in language education.

Co-published with TESOL Press There is a growing need for knowledge and practical ideas about the preparation of teachers for English Language Learners (ELLs), a growing segment of the K-12 population in the United States. This book is for teachers, administrators, and teacher educators who seek for innovative ways to prepare teachers for ELLs and will position teachers to empower these students. This volume will appeal mostly to teachers in contexts that have not historically had large numbers of ELLs, but have had a high rate of recent growth (e.g., Midwest and South). The book's work is the combination of teacher preparation and ELL issues. This volume is unique in tackling pre-service and inservice teacher preparation. Additionally, the chapters collectively aim to go beyond merely equipping teachers to meet the needs of ELLs, but to reach a level of effectiveness and outcome of equity. The book highlights the knowledge, skills, and beliefs of teachers about ELLs. Part I addresses teacher perceptions of ELLs and teacher preparation specifically addressing what they should know in terms of students' perspectives. Chapters attend to the beliefs of immigrant teachers about their roles, the role of service learning in teacher preparation, and the potential of understanding how teaching practices to change teacher beliefs about ELLs. Part II focuses on skills necessary to teach ELLs—writing skills teachers can draw on to enhance their teaching practices, technological skills teachers need to develop, and skills related to focusing on the Common Core State Standards for English Language Arts and mathematics. Each chapter explicitly addresses implications for teacher education or professional development.

This comprehensive anthology provides an overview of current approaches, issues, and practices in the teaching of English to speakers of other languages. Containing a broad collection of articles published primarily in the last decade, it illustrates the complexity underlying many of the practical and instructional activities involved in teaching English. These activities include teaching English at elementary, secondary, and tertiary levels; teacher training, language testing, curriculum and materials development, the use of computers and other technology in teaching, as well as research on various aspects of second-language learning. Organized into 16 sections, the book contains 41 articles by well-known teacher trainers and researchers. Included are two sets of discussion questions--a pre-reading background set and a post-reading reflection set. The anthology serves as a valuable resource for researchers, M.A. TESOL students, and teachers wishing to design a basic course in methodology.

This book investigates different ways in which neoliberal language and teaching policies have influenced the English language in global south countries across Asia, Africa and Latin America. Through the three main sub themes covered by the book, namely Neoliberalism and English Language Teaching Policies, Neoliberalism Ideology as in English Language Teaching Materials, and Experiences of Neoliberal Subjects, it investigates various aspects and means through which neoliberalism is realized in a variety of contexts. Through the first subtheme the volume covers the English language education policies of Chile, Bangladesh, India, and Morocco. The second sub theme concerns how different neoliberal values such as consumerism, entrepreneurship, and individualism are localized and constructed in the locally developed English language materials of Thailand, Taiwan, Malaysia, and Vietnam. The third sub theme includes studies on the impact of neoliberalization of English in relation to Colombian, Brazilian, and Pakistani stakeholders. This book is a valuable resource for academics, postgraduate students, researchers, policy makers, educators, and practitioners who are interested in neoliberalism in English language.

The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners teaching language: knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. Advisory board: Guy Cook, Diane Larsen-Freeman, Amy Tsui, and Steve Walsh

Issues in English Teaching invites primary and secondary teachers of English to engage in debates about key issues in subject teaching. The issues discussed include: *the increasingly centralised control of the curriculum, assessment, and pedagogy in the school teaching of English in England and Wales as a result of initiatives such as the National Literacy Strategy *new technologies which are transforming pupils' lived experience of literacy or literacies *the accelerating globalisation of English and the independence of other versions of English from English Standard English. A National Curriculum with a nationalist perspective on language, literacy and literature cannot fully accommodate English *what has become 'naturalised' and 'normalised' in English teaching, and the educational and ideological reasons for this *hierarchies that have been created in the curriculum and pedagogy, identifying who and what has been given low status, excluded or marginalised in the development of the current model of English. Issues in English Teaching will stimulate student teachers, NQTs, language and literacy co-ordinators, classroom English teachers and aspiring or practising Heads of English, to reflect on the identity or the subject, the principles and policies which, have determined practice, and those which should influence future practice.

Language Policy, Curriculum, Pedagogy and Assessment

From research to practice

Promising Futures

This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies, the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.

This book offers a holistic practitioner and research-based perspective on English Language Teaching and teacher education in difficult circumstances. In addition to extending the current conceptualization of 'difficult circumstances' in ELT to include the broader policy issues that may affect ELT in low-to-mid income countries, the book focuses on the challenges faced by practitioners and learners in contexts of confinement, conflict and special education. The chapters in this collection examine the challenges and problems that emerge from the complex current ELT environment, and present examples of contextualized inquiry-based strategies and interventions to address these challenges. Underlining the need to extend the boundaries of the discipline of ELT to include teaching-learning in less privileged contexts, this wide-ranging volume will appeal to students, scholars and practitioners of English Language Teaching.

Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs "who account for more than 9 percent of enrollment in grades K-12 in U.S. schools" are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

This book offers contemporary perspectives on English pronunciation teaching and research in the context of increasing multilingualism and English as an international language. It reviews current theory and practice in pronunciation pedagogy, language learning, language assessment, and technological developments, and presents an expanded view of pronunciation in communication, education, and

employment. Its eight chapters provide a comprehensive and up-to-date analysis of pronunciation and the linguistic and social functions it fulfils. Topics include pronunciation in first and second language acquisition; instructional approaches and factors impacting teachers' curriculum decisions; methods for assessing pronunciation; the use of technology for pronunciation teaching, learning, and testing; pronunciation issues of teachers who are second-language speakers; and applications of pronunciation research and pedagogy in L1 literacy and speech therapy, forensic linguistics, and health, workplace, and political communication. The chapters also critically examine the research base supporting specific teaching approaches and identify research gaps in need of further investigation. This rigorous work will provide an invaluable resource for teachers and teacher educators; in addition to researchers in the fields of applied linguistics, phonology and communication.

Current Issues and Strategies in ESL Studies (Volume II)

Politics and the English Language

Defining Issues in English Language Teaching

Insight into EFL Teaching and Issues in Asia

Current Issues in Second/Foreign Language Teaching and Teacher Development: Research and Practice represents a collection of selected papers from the 17th World Congress of the International Association of Applied Linguistics (AILA), which was held in August 2014 in Brisbane, Australia. The volume comprises 18 chapters presenting current research projects and discussing issues related to second language acquisition, teaching and teacher education in a variety of contexts from around the world. This collection of research papers will be of use to both new and seasoned researchers in the field of applied linguistics. Teacher educators, language teachers and language policy makers will find this volume equally useful as the papers address current issues in language education.

This volume contains a selection of the papers, seminars and workshops presented in the First International Conference on English Language Teaching and Learning (ICELTL1), held at the University of Santiago, Spain, in September 2008, as well as a number of valuable original contributions by other specialists who were involved in the conference. It aims to represent the views of teachers, scholars, researchers, teacher trainers and curriculum developers from all over the world, from the USA and Japan to Europe. It is addressed to ELT teachers, researchers and professionals who want to reflect upon and develop their knowledge and practice of current issues in English language teaching and learning. Current problems in many of the areas of ELT are given different solutions depending on the context in which respective contributors conduct their work. It is precisely this international perspective that makes this volume unique and illustrative of different realities with a similar objective in mind: the implementation and improvement of English language teaching. The various contributions have been organised in four main sections that correspond to the major focal topics of the conference: teacher training and development, classroom management and practice, new technologies and language teaching, and research on learner language.

The Routledge Handbook of English Language Teacher Education provides an accessible, authoritative, comprehensive and up-to-date resource of English language teacher education. With an overview of historical issues, theoretical frameworks and current debates, this handbook provides unique insights into a range of teacher education contexts, focusing on key issues relating to teacher and learner priorities, language and communication, current practices, reflective practice, and research. Key features include: a cross-section of current theories, practices and issues, providing readers with a resource which can be used in a variety of contexts; the use of data, transcripts and tasks to highlight and illustrate a range of practices, including examples of 'best practice'; 'snapshots' of ELTE from a number of contexts taken from all around the world; and examples of current technological advances, contemporary thinking on reflective practice, and insights gained from recent research. This wide-ranging and international collection of chapters has been written by leading experts in the field. The Routledge Handbook of English Language Teacher Education is sure to be core reading for students, researchers and educators in applied linguistics, TESOL and language education.

This text goes back to basics by investigating fundamental assumptions about the way English should be defined and taught as a foreign language. It looks at different attitudes to English teaching, and critically examines proposals for course content.

English Language Education Policy in Asia

Issues in English Language Development

Key Issues in English for Specific Purposes in Higher Education

Research, Policy and Practice

English Language Teaching Today

Current Issues in Reading, Writing and Visual Literacy

This timely volume opens a window on issues related to English language education in Vietnam. The authors consider that teacher quality is the key factor to be considered if the national English language curriculum outcomes are to be achievable. Aiming to shed light on key issues recently observed in the Vietnamese landscape of English language education, it examines the complexity of the institutionalization of the standardized English proficiency policy, which has been in force since 2008. That policy uses the Common European Framework of References for Languages (CEFR) as the model to set the standards and levels of proficiency for teachers, learners and state employees. The book presents both the theoretical and practical aspects of the standardization movement in English language education. The contents comprise a series of extended research-based chapters written by experts of language-in-education policy and planning in and about Vietnam from a range of perspectives including teachers, English language curriculum developers, teacher educators and researchers. The rich coverage of the book includes current discussion on English language education in Vietnam ranging from policy to practice, making it highly relevant to English teachers, teacher educators, and scholars, in Vietnam and worldwide, who aspire to broaden their horizons and professionalism.

With English becoming the world's foremost lingua franca, the pressure to improve English language education (ELE) has been steadily increasing. Consequently, the nature of ELE has changed drastically in the last decade. This has not only brought about a number of changes in the way English is taught and learnt, but it has also led to various innovative practices around the world. As a result, this edited book aims to shed light on the new theoretical and methodological developments in the field of ELE as well as the major issues and difficulties faced by practitioners in different parts of the globe. One very important variable that the book takes into account is the role that English already plays in a particular society since this may affect the views that teachers and students hold of the language. This in turn can significantly influence the way English is taught and learnt in given political, economic and socio-cultural settings. The purpose of this book is therefore to provide a comprehensive overview of the pedagogical methods, policies and problems that underlie English language education in ten different regions across the world, including: the USA, Canada, the UK, Australia, New Zealand, India, Singapore, Japan, China and Hong Kong. In doing so, the different chapters in the book emphasize the importance of responding to linguistic and other forms of diversity in order to develop English language education in a globalized world. This book will be useful for teachers and students of English language, for English language curriculum and materials developers, and for those involved in educational policy-making and language acquisition research. Written

by experts in the field, the range of content covered in the book's chapters will also help policy-makers, researchers and practitioners develop effective English language education practices and policies, and propose solutions to emerging issues in English language teaching and learning in different environments around the world. The newly-developed arguments and concerns pertaining to English language education will serve as future reference for professionals interested in this area of expertise.

Volume 5 covers the dialects of England since 1776, the historical development of English in the former Celtic-speaking countries, and English other countries.

Timely, thoughtful, and comprehensive, this text directly supports pre-service and in-service teachers in developing curriculum and instruction that both addresses and exceeds the requirements of English language arts standards. It demonstrates how the Common Core State Standards as well as other local and national standards' highest and best intentions for student success can be implemented from a critical, culturally relevant perspective firmly grounded in current literacy learning theory and research. The third edition frames ELA instruction around adopting a justice, inquiry, and action approach that supports students in their schools and community contexts. Offering new ways to respond to current issues and events, the text provides specific examples of teachers employing the justice, inquiry, and action curriculum framework to promote critical engagement and learning. Chapters cover common problems and challenges, alternative models, and theories of language arts teaching. The framework, knowledge, and guidance in this book shows how ELA standards can not only be addressed but also surpassed through engaging instruction to foster truly diverse and inclusive classrooms. The third edition provides new material on: adopting a justice, inquiry, and action approach to enhance student engagement and critical thinking planning instruction to effectively implement standards in the classroom teaching literary and informational texts, with a focus on authors of color integrating drama activities into literature teaching informational, explanatory, argumentative, and narrative writing supporting bilingual/ELL students using digital tools and apps to respond to and create digital texts addressing how larger contextual and political factors shape instruction fostering preservice teacher development

International Perspectives on Teaching English in Difficult Circumstances

Information Exchange

Current Issues in teaching English as a second language to adults

This collection offers insight into current issues in teaching English as a Foreign Language (EFL) in Asia. University and secondary school teachers and researchers from nine different countries share experiences they have encountered in their English-language courses, offering suggestions for incorporating new methodologies and techniques both in and outside the classroom. Not only is this book filled with valuable teaching techniques that the contributors have found successful, but it also introduces new ways of dealing with various social situations in the classroom. This book is unique in that it offers the perspective of teaching English in Asia, where students often don't get many opportunities to engage with the language in informal settings. This book is geared towards university-level instructors and secondary school teachers teaching EFL in Asia, as well as researchers conducting cross-cultural studies which investigate foreign language learning and acquisition in today's global society. English language teaching has become a booming industry in this region, and with the professionalization of the field comes abundant opportunities for research and informed practices. This book stands alone in its purpose in generating a current view of the situations which EFL teachers and students in Asia today face. Topics discussed in this volume include action research projects, successful teaching practices, innovative language assistance programs, and issues of autonomy and identity.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can - and must - be rediscovered with every age.' - Irish Times

This book addresses questions of language education in the United States, focusing on how to teach the 3.5 million students in American public schools who do not speak English as a native language. These students are at the center of a national debate about the right relationship among ESL, bilingual, and mainstream classes. Bilingual education has been banned by constitutional amendment in California and Arizona, and similar amendments are being considered in other states. Language Minority Students in American Schools: An Education in English places this debate and related issues of teaching standard English to speakers of nonstandard dialects, such as black English, within the larger context of language acquisition theory and current methods of language teaching. Adamson draws from the large body of sociolinguistic, psycholinguistic, and educational research, and on his own experience as an English teacher in the U.S. and overseas, to shed light on some of these controversies and on the cognitive, cultural, public policy, and practical issues involved in educating English language learners.

Presenting all sides of the issues fairly, he offers a strong endorsement for bilingual and bidialectal education based on programs designed and administered according to the principles discussed in the book and supported by language acquisition theory and classroom research. A strength of the book is the inclusion of original research conducted in a middle school enrolling a majority of Latino students. This research contributes to the field of language education by providing a detailed description of how English language learners study content subjects. Examples from the study are used to illustrate a discussion of Vygotskian learning principles and the relationship between the students' home and school cultures. Language Minority Students in American Schools: An Education in English is intended for students who are preparing to become teachers of English as a second language, and for teachers of other subjects who work with English language learners.

This volume offers insights on English language education policies in Middle Eastern and North African countries, through state-of-the-art reports giving clear assessments of current policies and future trends, each expertly drafted by a specialist. Each chapter contains a general description of English education policies in the respective countries, and then expands on how the local English education policies play out in practice in the education system at all levels, in the curriculum, in teaching, and in teacher training. Essays cover issues such as the balance between English and the acquisition of the national language or the Arabic language, as well as political, cultural, economic and technical elements that strengthen or weaken the learning of English. This volume is essential reading for researchers, policy makers, and teacher trainers for its invaluable insights in the role of each of the stakeholders in the implementation of policies.

Promoting the Educational Success of Children and Youth Learning English

Practices, Issues and Challenges

Critical Perspectives on Global Englishes in Asia

English Language Education in a Global World

Current issues in English language methodology

Convention Of New Classroom Practices And Innovative Approaches To Designing Language Programmes And Materials Reflect A

Commitment To Finding More Efficient And More Effective Ways Of Teaching Languages. The Classroom Teacher Has A Wider Variety Of Methodological Options To Choose From Than Ever Before. They Can Choose Methods And Materials According To The Needs Of The Learners, The Preferences Of Teachers And The Constrains Of Their Institution Or Educational Setting. Though Technology Can Play A Dominant Role In English Language Teaching (Elt) In The Contemporary Society, The Need For Developing The Four Basic Language Skills In Elt Classrooms Still Prevails. The Perspicacious Papers Presented In This Volume Provide An Insight Into The Deeper Understanding Of The Various Issues Involved In Teaching English At The University Level. These Papers Cover A Broad Spectrum Of Topics Under Elt Ranging From Theoretical Aspects Such As Form And Function In Language Learning To The Most Useful Practical Aspects Such As Communicative Language Teaching In A Multimedia Language Laboratory. Both The Teachers And The Researchers May Find This Volume On Elt Extremely Useful In Identifying, Appreciating And Comprehending The Nuances Of English Language Teaching.

An interesting contribution to the discussed task of adopting an effective methodology in the teaching of English as a foreign language. Aspects such as the application of a cognitive theory, the usage of electronic mail in the classroom, the making of informative glossaries, take that question again and new proposals are actualised.

In language learning contexts, the role of the language teacher is a particularly crucial one: it is the teacher who, through and with their use of (the foreign) language, has a significant influence on the extent to which language learners are linguistically/cognitively activated, and thus determines whether processes of language learning are initiated and promoted, or perhaps even impeded or prevented. Thus, it is of utmost importance for language teachers to acquire a high level of classroom discourse competence (CDC) - a professional competence that goes far beyond the notions of FL proficiency and communicative competence. Located at the intersection of theory, classroom research and practical approaches to (E)FL teacher education, Classroom Discourse Competence: Current Issues in Language Teaching and Teacher Education offers university students, trainee teachers, in-service teachers and teacher educators a comprehensive conceptualization of CDC (Part I). Furthermore, the chapters in this book explore facets of CDC (Part II) and present good-practice examples of CDC development in the context of pre-service teacher education (Part III).

"Recognizing the need for increased social justice in the fields of TESOL and English Language Teaching (ELT) globally, this volume presents a range of international case studies and empirical research to demonstrate how English language instruction can promote social and linguistic justice through advocacy-oriented pedagogies and curricula. Advocacy for Social and Linguistic Justice in TESOL adopts a critical, and evidence-based approach to identifying effective practice in ensuring inclusive and equitable learning and teaching. Chapters address emergent issues including heritage language and L1 attrition, teacher and learner identity, and linguistic colonialism, as well as wider issues such as global citizenship and human rights. Focus is placed on empowering both educators and learners as advocates of social justice and consideration is also given to how social responsibility can be supported through enhanced teacher preparation and professional development. Making a timely contribution at the intersection of advocacy, social justice, and English language teaching, this book will be key reading for postgraduate researchers, scholars, and academics in the fields of TESOL and ELT, as well as language education, applied linguistics, and the sociology of education more broadly. English language teachers and practitioners will also find this volume of interest"--

The Rise of English

Preparing Teachers to Work with English Language Learners in Mainstream Classrooms

English Language Teaching Today: Linking Theory and Practice provides an up-to-date account of

current principles and practices for teaching English in the world today. The chapters, written by internationally recognized language teacher educators and TESOL specialists, introduce the reader to key language skill areas (i.e., listening, speaking, reading, writing, pronunciation, grammar and vocabulary) and explain how each skill area can be taught in a principled manner in diverse language learning contexts. Throughout the book, the link between theory and practice is explicitly highlighted and exemplified. This reader-friendly book is suitable for undergraduate and graduate students enrolled in TESOL and other second language education programmes as well as for TESOL professionals who wish to stay current with recent developments in ELT.

This second volume presents modern strategies in the teaching of English as a Second Language (ESL) and English as a Foreign Language (EFL) from the perspectives of multi-cultural communication, linguistic theory and praxis. Several chapters in the book are taken from the session "ESL Studies" held at the 2015 and 2016 PAMLA (Pacific Ancient and Modern Language Association) conferences. The collection, written by scholars from a range of countries, including Germany, Italy, Romania, Mexico, Russia, and the USA, examines current methods of English language learning from the perspectives of the global environment, cross-cultural analysis and modern digital space.

This volume offers comprehensive 'state-of-the-art' overviews of educational policies concerning the teaching of English in a large number of Asian countries. Each contribution is written by a leading expert and gives a clear assessment of current policies and future trends. Starting with a description of the English education policies in the respective countries, the contributors then delve into the 'nuts and bolts' of the English education policies and how they play out in practice in the education system, in schools, in the curriculum, and in teaching. Topics covered include the balance between the acquisition of English and the national language, political, cultural, economic and technical factors that strengthen or weaken the learning of English.
