In the early ninth century, George Synkellos, a monk of Constantinople set out to compose (in Greek) a universal chronicle beginning with the creation of the universe. Synkellos' death prevented him from seeing this ambitious project through to completion, and it fell to a fellow monk, Theophanes Confessor, to complete the narrative

from the reign of the emperor Dicoletian up until his own day. The purpose of the chronicle, as Synkellos states on several occasions, was to confirm the orthodox dating of the incarnation of Christ at the completion of the 5500th year from the creation of the universe. In the course of demonstrating this point, Synkellos cites extensively from numerous histories and chronicles from Egypt and the Ancient Near East, some of which are

unattested elsewhere. Since the author comments at length on his authorities and predecessors, his work is also a rich resource of information about the origins and development of early Christian chronography. Despite its recognized importance, the chronicle has never been translated into a modern language. The English translation provided here, together with introduction and notes, promises to make this influential and wide-

ranging history more accessible to Byzantinists, students of ancient historiography, and specialists in biblical chronology, early Judaism, Egypt, and the Ancient Near East. This text covers the field of translation applied to information, human relations and literature. It is illustrated with examples and quotations. The content of the book covers the following subject areas: translation topics such as examining,

assessing, capitalization, emphasis, idiolect, grecolatinisms across languages, the small print, eponyms and howlers; translation theory: differences between good and bad translation, good and bad writing, literary and non-literary texts and translations, cultural and universal factors; translation as a matter of public interest in the European Union and national parliaments, as well as in museums and art galleries; and critical

discussion of recently published books and conference proceedings. "The Twelve Tables" by Anonymous (translated by Paul R. Coleman-Norton). Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and

formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Internet has revolutionized the globalized society and enabled the growth of infrastructures, applications, and technologies that significantly enhance global interactions and collaborations that have significant impact on society. Unprecedented cyber social, and cyber physical infrastructures and systems that span geographic boundaries are possible because of the Internet and the growing number of collaboration enabling technologies. Individuals and

organizations have increasingly relied on electronic and or Internet enabled collaboration between distributed teams of humans, computer applications, and or autonomous robots to achieve higher productivity and produce collaboratively developed products that would have been impossible to develop without the contributions of multiple collaborators Technology has evolved from standalone tools, to open systems supporting collaboration in multi organizational

settings, and from general purpose tools to specialized collaboration platforms

This book traces the archaeological history of Pylos and surrounding regions in Messenia from the Palaeolithic to the present. Designed as much for general readers and travelers interested in ancient Greece as for scholars, the volume presents the findings of the Pylos Regional Archaeological Project (PRAP), which has intensively studied the region over the past 15

years. The 1998 edition, originally published by the University of Texas Press and widely used as a textbook in undergraduate classes, is reprinted with a new preface by Jack Davis and John Bennet, two of the project's original directors, assessing PRAP's impact and outlining new discoveries in the region.

The Cambridge Companion to Postmodernism offers a comprehensive introduction to postmodernism. The Companion examines the different aspects of postmodernist thought and culture that have had a

significant impact on contemporary cultural production and thinking. Topics discussed by experts in the field include postmodernism's relation to modernity, and its significance and relevance to literature, film, law, philosophy, architecture, religion and modern cultural studies. The volume also includes a useful guide to further reading and a chronology. This is an essential aid for students and teachers from a range of disciplines interested in postmodernism in all its

incarnations. Accessible and comprehensive, this Companion addresses the many issues surrounding this elusive, enigmatic and often controversial topic.

Tur Abdin is a plateau skirted by

the Upper Tigris in Southeastern Turkey where Syrian Orthodox Christians of Aramaic tongue still worship in Late Antique churches. Monks converted the region and the most powerful monastery, founded in the fourth century, is still flourishing today.

Documenting more fully the early history of this abbey, the author aims to rediscover the practical and symbolic function of the monuments of Tur Abdin and place them in their original social context.

are used as sources of water for many purposes. This sub-discipline has been developed due to the importance of water quality issues, and gradually changed into a well established field of research. The study of quantity of water alone is not sufficient to solve the water management problems because its uses for various purposes depend on its quality. In addition, a number of other researchers show that the

hydrogeochemical characteristics of ground water and groundwater quality in different aquifers over space and time are important parameters in solving the groundwater management issues. This volume Hydrogeochemistry deals with quality, contamination, chemistry, chemical processes and reactions that take place in various groundwater systems. The purpose of the text is to present comprehensive and

practical information necessary for treatment and interpretation of environmental hydrogeochemical data. It provides some baseline data on the geochemical characteristics of the sediments and the water quality. Natural origin of groundwater and groundwater pollution by anthropogenic activities is considered in the groundwater quality analysis for drinking water purpose.

processes such as dissolution, precipitation, absorption and desorption, ion exchange reactions and the residence time along the flow path which controls the chemical composition of groundwater, constitutes the other issues that are dealt with in this book.

Advances in our ability to quantify these processes will improve our ability to manage our water resources, help us identify

potential sources of contamination, and illuminate potential solutions to water-quality problems. To better address societal needs, future advances will require a holistic approach to interpreting geochemical data.

Transforming Matter provides an accessible and clearly written introduction to the history of chemistry, telling the story of how the discipline has developed over the years.

What is the current role of

states, and could this role be extended? This question is often raised by researchers and policymakers as governments search for ways to cut pensions expenditure. Owner-occupation could potentially be part of a solution as the retired are often rich in terms of housing wealth. The existing theory shows that owning one's own home can be regarded as a form of pension: once the mortgage has been repaid, housing expenses are substantially lower and housing wealth can also be cashed in, either by selling or using equity release schemes. However, converting housing assets into

cash is a much less common strategy than expected. This book contributes to existing knowledge by relating household strategies to broader national contexts. The countries included in the study are Belgium, Finland, Germany, Hungary, Portugal, Slovenia, Sweden and United Kingdom, while the Netherlands is the subject of particular attention. The study suggests that owner-occupation is not the clear-cut solution that governments might have hoped for. This book is designed as a manual for the study of fundamental moral theology. It

is addressed primarily to those who are undertaking a required course of study in Catholic theology at seminaries or ecclesiastical colleges. The editorial and typographical style, the choice of topics, and the extent of material covered are intended to meet the needs of such students. Nevertheless, we trust that the book will likewise be of interest for those who pursue theological and moral studies at a non specialist, though nonetheless serious level.

All countries aim to improve housing conditions for their citizens but many have been forced by the financial crisis to reduce government expenditure. Social housing is at the crux of this tension. Policy-makers, practitioners and academics want to know how other systems work and are looking for something written in clear English, where there is a depth of

understanding of the literature in other languages and direct contributions from country experts across the continent. Social Housing in Europe combines a comparative overview of European social housing written by scholars with in-depth chapters written by international housing experts. The countries covered include Austria, Denmark, England, France, Germany, Hungary, Ireland, The Netherlands and Sweden, with a further chapter devoted to CEE countries other than Hungary. policy and practice. It offers an analysis of how the social housing system currently works in each country, supported by relevant statistics. It identifies European trends in the sector, and opportunities for innovation and improvement. These country-specific chapters are accompanied by topical thematic chapters dealing with subjects such as the role of social housing in urban regeneration, the privatisation of social housing, financing models, and the impact of European Union state aid regulations on the definitions and financing of social housing.

Cinema has been long associated with France, dating back to 1895, when Louis and Auguste Lumi_re screened their works, the first public viewing of films anywhere. Early silent pioneers Georges MZli_s, Alice Guy BlachZ and others followed in the footsteps of the Lumi_re brothers and the tradition of important filmmaking continued throughout the 20th century and beyond. The concept of sustainable development was first introduced by the Brundtland Commission almost 20 years ago and has received increased attention during the past decade. It is now

an essential part of any energy activities. This is a research-based textbook which can be used by senior undergraduate students, graduate students, engineers, practitioners, scientists, researchers in the area of sustainable energy systems and aimed to address some key pillars: better efficiency, better cost effectiveness, better use of energy resources, better environment, better energy security, and better sustainable development. It also includes some cutting-edge topics, such hydrogen and fuel cells, renewable, clean combustion technologies, CO₂ abatement technologies, and some potential

tools (exergy, constructal theory, etc.) for design, analysis and performance improvement.

The Vaccine Book offers parents a fair, impartial, fact-based resource from the most trusted name in pediatrics. Dr. Bob devotes each chapter in the book to a disease/vaccine pair and offers a comprehensive discussion of what the disease is, how common or rare it is, how serious or harmless it is, the ingredients of the vaccine, and any possible side effects from the vaccine. This completely revised edition offers:
