

Cxc Past Papers Agricultural Science 2010

A science course for students in Caribbean primary schools. Developed to fulfil the requirements of primary science curricula throughout the region, it also includes separate teacher's guides, with background information, teaching notes and support for remedial and extension activities.

This series covers all aspects of agriculture over the three years of the Junior Secondary educational programme. The topics covered within this third volume are systems of farming, vegetative propagation methods, production of crops, crop production technology, forestry, fishing, marketing, grasslands, pastures and forages, cattle rearing, farm records and agencies participating in agriculture.

Interest is growing in sustainable agriculture, which involves the use of productive and profitable farming practices that take advantage of natural biological processes to conserve resources, reduce inputs, protect the environment, and enhance public health. Continuing research is helping to demonstrate the ways that many factorsâ€"economics, biology, policy, and traditionâ€"interact in sustainable agriculture systems. This book contains the proceedings of a workshop on the findings of a broad range of research projects funded by the U.S. Department of Agriculture. The areas of study, such as integrated pest management, alternative cropping and tillage systems, and comparisons with more conventional approaches, are essential to developing and adopting profitable and sustainable farming systems.

Canes and Chains

Amerindians to Africans deals with the events that took place from the first human settlement of the region in prehistoric times to the end of the eighteenth century. Emphasis is placed on the effect of the forced introduction of Africans to the region.

This is a course for students of CSEC Spanish. Relevant and lively, it consists of a Student's Book each with 2 audio CDs, a Workbook and a Teacher's Guide.

Artificial insemination is used instead of natural mating for reproduction purposes and its chief priority is that the desirable characteristics of a bull or other male livestock animal can be passed on more quickly and to more progeny than if that animal is mated with females in a natural fashion. This book contains under one cover 16 chapters of concise, up-to-date information on artificial insemination in buffalos, ewes, pigs, swine, sheep, goats, pigs and dogs. Cryopreservation effect on sperm quality and fertility, new method and diagnostic test in semen analysis, management factors affecting fertility after cervical insemination, factors of non-infectious nature affecting the fertility, fatty acids effects on reproductive performance of ruminants, particularities of bovine artificial insemination, sperm preparation techniques and reproductive endocrinology diseases are described. This book will explain the advantages and disadvantages of using AI, the various methodologies used in different species, and how AI can be used to improve reproductive efficiency in farm animals.

This three-part course takes into account recent changes and provides a base for the CXC examination.

This book is the second in a series of three texts which cover the needs of students studying agriculture at the Junior Secondary Level.

Certificate Mathematics is a two-year revision course for students following the General Proficiency Syllabus in Mathematics of the Caribbean Examinations Council. It provides a programme for thorough review and consolidation of all the basic aspects of mathematics needed for success in the examination. The fourth edition of this extremely popular and successful textbook. Takes account of the latest changes to the CXC syllabuses. Incorporates a very large number of graded exercises to help student's "learn by doing". Includes chapter summaries and points to remember that enhance the usefulness of the book for consolidation and revision. Contains specimen tests in preparation for the multiple choice and long answer papers of the CXC examination. Used systematically, Certificate Mathematics will provide students with a firm foundation for success in their CXC mathematics examinations.

This CAPE Economics Multiple Choice Practice book is an invaluable exam preparation aid for CAPE Economics students. This book provides excellent practice for the multiple choice questions from Paper 1 of the CAPE examination, and has been specially written to help CAPE Economics students improve their Paper 1 exam score.

Agricultural Science for CSEC(R) Examinations is one of a series of texts written especially for students studying for the CSEC examinations in science subjects. The examination for Agricultural Science can be taken as a Single Award or as a Double Award, and this book covers the material for both.

Third Edition

Report on Cambridge G.C.E. and C.X.C. Examination Results

These Study Guides have been developed exclusively with the Caribbean Examinations Council (CXC(R)) to be used as an additional resource by candidates who are following the Caribbean Secondary Education Certificate (CSEC(R)) programme. They provide candidates with extra support to help them maximise their performance in their examinations.

Metalwork Technology is a well illustrated core text covering all the key areas of the subject in one accessible volume. There is a focus on practical work and it is suitable for technical and vocational syllabi from numerous countries including the UK and South Africa.

The essential introduction to the theory and application of linear models—now in a valuable new edition Since most advanced statistical tools are generalizations of the linear model, it is neces-sary to first master the linear model in order to move forward to more advanced concepts. The linear model remains the main tool of the applied statistician and is central to the training of any statistician regardless of whether the focus is applied or theoretical. This completely revised and updated new edition successfully develops the basic theory of linear models for regression, analysis of variance, analysis of covariance, and linear mixed models. Recent advances in the methodology related to linear mixed models, generalized linear models, and the Bayesian linear model are also addressed. Linear Models in Statistics, Second Edition includes full coverage of advanced topics, such as mixed and generalized linear models, Bayesian linear models, two-way models with empty cells, geometry of least squares, vector-matrix calculus, simultaneous inference, and logistic and nonlinear regression. Algebraic, geometrical, frequentist, and Bayesian approaches to both the inference of linear models and the analysis of variance are also illustrated. Through the expansion of relevant material and the inclusion of the latest technological developments in the field, this book provides readers with the theoretical foundation to correctly interpret computer software output as well as effectively use, customize, and understand linear models. This modern Second Edition features: New chapters on Bayesian linear models as well as random and mixed linear models Expanded discussion of two-way models with empty cells Additional sections on the geometry of least squares Updated coverage of simultaneous inference The book is complemented with easy-to-read proofs, real data sets, and an extensive bibliography. A thorough review of the requisite matrix algebra has been addedfor transitional purposes, and numerous theoretical and applied problems have been incorporated with selected answers provided at the end of the book. A related Web site includes additional data sets and SAS® code for all numerical examples. Linear Model in Statistics, Second Edition is a must-have book for courses in statistics, biostatistics, and mathematics at the upper-undergraduate and graduate levels. It is also an invaluable reference for researchers who need to gain a better understanding of regression and analysis of variance.

Develop IT skills through an active, accessible approach to theory and practice, providing an ideal foundation for lower secondary students going on to study IT at CSEC® and for building real-life computer skills; fully updated to reflect the new curriculum and new approaches to IT teaching. - Build knowledge with straightforward introductions to theoretical concepts, key practical applications and new topics such as ethical use of computers and multimedia. - Support all learning styles with a range of questions - Multiple Choice, True or False, Short Answer, Research, Project and a fun Crossword puzzle. - Develop critical thinking and research skills with research projects. The answers can be found here: www.hoddereducation.co.uk/Log-on-to-IT-Answers

This book is a printed edition of the Special Issue "Environmentally Sustainable Livestock Production" that was published in Sustainability

The final book in a comprehensive four-level series for Caribbean students, which provides thorough preparation for lower secondary and CSEC English A examinations. It includes multiple choice questions and regular exam practice, additional practice pages for each Unit and sample exam papers.

Developing Teachers' Assessment Literacy

Environmentally Sustainable Livestock Production

NO description available

This book covers the narratives of three authors who have different educational backgrounds, academic experiences, and fields of study. It interrogates and discusses the topic of educational assessment in different education systems, which represent eastern and western cultures and political contexts. The book provides recommendations for developing teachers' assessment literacy in teacher education and professional development programs. It also serves as a springboard for futher inquiry into the subject.

Newly revised in line with the latest syllabus and with a modernised, student-friendly design, including a truly interactive CD which provides additional practice for students and brings lab work to life with exciting activities and simulations.

Agricultural Science for CSEC

A Proceedings

English Matters for CSEC Examinations

This Book of Abstracts is the main publication of the 69th Annual Meeting of the European Federation of Animal Science (EAAP). It contains abstracts of the invited papers and contributed presentations of the sessions of EAAP's eleven Commissions: Animal Genetics, Animal Nutrition, Animal Management and Health, Animal Physiology, Cattle Production, Sheep and Goat Production, Pig Production, Horse Production and Livestock Farming Systems, Insects and Precision Livestock Farming.

A World of Prose includes all the prescribed texts for the revised CSEC English A and English B syllabuses. It has been compiled with the approval of the Caribbean Examinations Council by Editors who have served as CSEC English panel members. - The material in this anthology will help students to prepare effectively for the CSEC examination. - The texts have been chosen to cover a wide range of themes and subjects and include a balance of well-known texts from the past as well as more recent works. - The anthology includes texts from the Caribbean and the rest of the world to stimulate an interest in and enjoyment of reading and literature. - This collection contains notes on each text and questions to provoke discussion, as well as a useful checklist to help students with literary analysis. - The book contains practical guidance for students on how to tackle examination questions, with examples of model answers for reference.
