*Modern IT managers are confronted with an overwhelming number of management frameworks, methods and methodologies - making it difficult to see the wood for the trees. In addition many IT service providers believe they can't be taken seriously if they don't also have a proprietary framework to offer - which makes it even more difficult to find your way through the framework forest. This itSMF publication covers the most important frameworks in use, in a neutral and objective way, so that readers can better understand the potential value of each instrument. Each framework is described by a well-known expert in that field, in a structured format, to emphasise the specific characteristics. A consistent approach to each chapter allows easy comparison between the instruments: a description of each framework, the origin/history, where the instrument is used, description and core graphics, approach/how to, relevance to IT*

"Promise me you'll love me after this?" Those were the words I asked my first love on a high school date. "Always, Vi," he told me before crushing his lips against mine. I gave him a part

of me I can never get back that night. Even worse, I gave him my heart. That was four years ago. Back when I was young and naive. Back when I thought we'd always be together. He dumped me right after graduation and left me to join the military. He said I shouldn't wait for him; it didn't matter that I wanted to. I would have waited for him forever, but he threw me away and left me here in this small town. Now he's home and says he wants me back. Second chances don't work in love. No matter how much I wish I could erase what's happened since he's been gone... no matter how much I think of falling back into his arms...
