Seminar paper from the year 2016 in the subject Law - Comparative Legal Systems, Comparative Law, , language: English, abstract: This topic on "An overview of cyber-crime, cyber law with comparative study on ETA 2063 of Nepal and IT Act 2000 of India" is very relevant in the present context of developing and developed economy such as Nepal and India respectively. Creating rules and laws binding on nations is a matter for international negotiations and mutual acceptance by governments. The strong nations have the power to make the rules in their favour and the authority to implement those rules. But, an undeveloped nation cannot bargain and is unable to afford these international sets of rules and policies. They are compelled but not compatible. In twenty first century the world has emerged as a global village and hence business, trades and all the international institutions, all the nations are being compelled to be a part of Cyberspace. In simple concerns, Cyberspace and cyber world are the most useful method for exercising the fundamental right of freedom of expression as in this world everybody has equal right to express their thoughts in front of large public, but this cyberspace has also been giving an open space for the cyber users to misuse the power of cyber world by giving the cyber users unauthorized access to infringe into the accounts of others.

Cyber Crimes against Women in India reveals loopholes in the present laws and policies of the Indian judicial system, and what can be done to ensure safety in cyberspace. The book is a significant contribution to socio-legal research on online crimes targeting teenage girls and women. It shows how they become soft targets of trolling, online grooming, privacy infringement, bullying, pornography, sexual defamation, morphing, spoofing and so on. The authors address various raging debates in the country such as how women can be protected from cybercrimes; what steps can be taken as prevention and as recourse to legal aid and how useful and accessible cyber laws are. The book provides detailed answers to a wide array of questions that bother scholars and charts a way forward.

The impetus for the development of intellectual property law, at its inception, was to ensure that sufficient incentives exist to lead to innovation and the creation of new and original works and products. The physical world has been relatively successful at erecting barriers to prevent acts that would limit this innovation, in the form of copyright, trademark, and patent regulations.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical guide to cyber law – the law affecting information and communication technology (ICT) – in India covers every aspect of the subject, including intellectual property rights in the ICT sector, relevant competition rules, drafting and negotiating ICT-related contracts, electronic transactions, privacy issues, and computer crime. Lawyers who handle transnational matters will appreciate the detailed explanation of specific characteristics of practice and procedure. Following a general introduction, the book assembles its information and guidance in seven main areas of practice: the regulatory framework of the electronic communications market; software protection, legal protection of databases or chips, and other intellectual property matters; contracts with regard to software licensing and network services, with special attention to case law in this area; rules with regard to electronic evidence, regulation of electronic signatures, electronic banking, and electronic commerce; specific laws and regulations with respect to the liability of network operators and service providers and related product liability; protection of individual persons in the context of the processing of personal data and confidentiality; and the application of substantive criminal law in the area of ICT. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in India will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative law in this relatively new and challenging field.

Cyber Law in India

(law on Internet)

The Internet's increasing scope, the rapid proliferation of ICTs for mobile information and communications technologies) and the wide distribution of social media have created new opportunities. Cyber-VAWG is emerging as a global issue with serious implications for global societies and economies. Cyber-crimes targeting women and children are on rise. 1 In the online world, women and children have been found to be very gullible, with cybercrimes against women and children witnessing a sharp rise in the last few years. Women are usually subjected to cybercrimes such as cyber harassment, online stalking, cyber pornography, cyber defamation, matrimonial fraud and much more. The right to the Internet is a human right, as declared in June 2016 by the United Nations Council on Human Rights. The cyber world as such has a virtual reality where anyone can hide or even falsify their identity, this internet gift is used by the criminally minded to commit wrongdoing and then hide under the internet's blanket. The paper identifies common forms of cyber-crimes against women, such as cyber stalking, cyber pornography, circulating images / morphing, sending obscene / defamatory / annoying messages, online trolling / bullying / blackmailing / threat or intimidation, and email spoofing and impersonation. It recommends further steps that need to be taken to deal holistically and effectively with cybercrimes against women. While India's Internet population may explode, social network users experience a looming gender imbalance. This can be seen in areas such as the number of internet users, the number of users on Facebook and Twitter, digital literacy and political tweets. Cybercrimes generally incepted by fake ids generated on Facebook, Twitter and other social media sites that cause severe harm to women, severe blackmailing, intimidation, bullying, or cheating via messenger messages and email are committed by the perpetrators. Ill-intentioned people commit these cyber-crimes with mischievous intent such as illicit gain, vengeance, insult to a woman's dignity, extort, blackmail, defamation, and steal information.

As we all know that this is the era where most of the things are done usually over the internet starting from online dealing to the online transaction. Since the web is considered as worldwide stage, anyone can access the resources of the internet from anywhere. The internet technology has been using by the few people for criminal activities like unauthorized access to other's network, scams etc. These criminal activities or the offense/crime related to the internet is termed as cyber crime. In order to stop or to punish the cyber criminals the term "Cyber Law" was introduced. We can define cyber law as it is the part of the legal systems that deals with the Internet, cyberspace, and with the legal issues. It covers a broad area, encompassing many subtopics as well as freedom of expressions, access to and utilization of the Internet, and online security or online privacy. Generically, it is alluded as the law of the web. The principle target of our my book is to spread the knowledge of the crimes or offences that take place through the internet or the cyberspace, along with the laws that are imposed against those crimes and criminals. I am additionally trying to focus on the safety in cyberspace.
