"Remarkable personal journals . . . revealing the combat experience of the German-Russian War as seldom seen before. . . . a harrowing yet poignant story" (Military Times). Hans Roth was a member of the anti-tank panzerjäger battalion, 299th Infantry Division, attached to the Sixth Army, as the invasion of Russia began. As events transpired, he recorded the tension as the Germans deployed on the Soviet frontier in June 1941. Then, a firestorm broke loose as the Wehrmacht tore across the front, forging into the primitive vastness of the East. During the Kiev encirclement, Roth's unit was under constant attack as the Soviets desperately tried to break through the German ring. At one point, after the enemy had finally been beaten, a friend serving with the SS led him to a site—possibly Babi Yar—where he witnessed civilians being massacred. After suffering through a brutal winter against apparently endless Russian reserves, his division went on the offensive again when the Germans drove toward Stalingrad. In these journals, attacks and counterattacks are described in you-are-there detail. Roth wrote privately, as if to keep himself sane, knowing his honest accounts of the horrors in the East could never pass Wehrmacht censors. When the Soviet counteroffensive of winter 1942 begins, his unit is stationed alongside the Italian 8th Army, and his observations of its collapse, as opposed to the reaction of the German troops sent to stiffen its front, are of special fascination. Roth's three journals were discovered many years after his disappearance, tucked away in the home of his brother. After his brother's death, his family discovered them and sent them to Rosel, Roth's wife. In time, Rosel handed down the journals to Ericka, Roth's only daughter, who had emigrated to America. Roth was likely working on a fourth journal before he was reported missing in action in July 1944. Although his ultimate fate remains unknown, what he did leave behind, now finally revealed, is an incredible firsthand account of the horrific war the Germans waged in Russia.

Photo Finish's dead diva, the soprano Isabella Sommita, was so widely loathed that the problem is less a lack of plausible suspects than an embarrassment of options. Though the grand country-house - and with it, the country-house murder - was history by 1980, when Photo Finish was originally published, Dame Ngaio got around the problem by setting the story on a lavish island estate, cut off from the mainland by a sudden storm. Happily, Inspector Allyn is among the guests, and can take charge in the coppers' absence. The penultimate book in the series, Photo Finish is also one of only four books set in Marsh's native New Zealand.

Hökule'a, Nainoa Thompson, and the Hawaiian Renaissance

Annulosa. [By W. E. Leach. Extracted from vol. 1 of the Supplement to the Encyclopædia Britannica.]

Attuned to a world of natural signs—the stars, the winds, the curl of ocean swells—Polynesian explorers navigated for thousands of miles without charts or instruments. They sailed against prevailing winds and currents aboard powerful double canoes to settle the vast Pacific Ocean. And they did this when Greek mariners still hugged the coast of an inland sea, and Europe was populated by stone-age farmers. Yet by the turn of the twentieth century, this story had been lost and Polynesians had become an oppressed minority in their own land. Then, in 1975, a replica of an ancient Hawaiian canoe—Höküle'a—was launched to sail the ancient star paths, and help Hawaiians reclaim pride in the accomplishments of their ancestors. Hawaiiki Rising tells this story in the words of the men and women who created and sailed aboard Höküle'a. They speak of growing up at a time when their Hawaiian culture was in danger of extinction; of their vision of sailing ancestral sea-routes; and of the heartbreaking loss of Eddie Aikau in a courageous effort to save his crewmates when Höküle'a capsized in a raging storm. We join a young Hawaiian, Nainoa Thompson, as he rediscovers the ancient star signs that guided his ancestors, navigates Höküle'a to Tahiti, and becomes the first Hawaiian to find distant landfall without charts or instruments in a thousand years. Hawaiiki Rising is the saga of an astonishing revival of indigenous culture by voyagers who took hold of the old story and sailed deep into their ancestral past.

The process through which a liquid material is delivered into a mold, which contains a hollow cavity of the intended shape, and then being allowed to cool is known as casting. It is generally used to produce sophisticated shapes which are difficult or uneconomical to make using other methods. Metals and other time setting materials are usually used for casting. It is used in the making of a variety of products such as bronze structures, concrete structures, collectible toys, weapons and tools. The traditional methods of casting are lost-wax casting, sand casting and plaster mold casting. The modern casting processes are classified into two categories, expendable and non-expendable casting. The topics included in this book on casting are of utmost significance and bound to provide incredible insights to readers. Some of the diverse topics covered in this book address the varied branches that fall under this category. It will serve as a valuable source of reference for graduate and post graduate students.

The book is particularly useful for actors transitioning from stage to screen, by clearly defining the difference. On stage, you communicate with your body and voice; on camera you need to add a third means of communication - your face. The book contains detailed photos and experiential exercises; it also helps you understand how you personally communicate and what's missing or misunderstood about your facial expressions, so you can take your acting to the next level.

The acclaimed novel of love, ambition, and Arctic adventure "old with lin de siecle elegance"—with an introduction by Philip Pullman (Kirkus Reviews). It is July 1897, at the northernmost reach of the inhabited world. Swedish inventor Gustav Crispin is determined to become the first person to set foot on the North Pole, and return, borne by hot air balloon. Making the expedition with two companions—an American journalist and a young, French-speaking adventurer—all three climb into the small wicker gondola and cut the ropes. But as Gustav pursues his history-making ambition, and their flimsy balloon is battered by Arctic winds, his mind returns again and again to his fraught romance with the beautiful Luisa. Nominated for the National Book Award in 1977, The Balloonist was hailed by Mary Renault as a "tour de force." The story of Gustav Crispin is "chilling and comic by turn. . . . An unusual mixture of Arctic adventure and Parisian love story with philosophic overtones" (Kirkus Reviews).
