Golf is big business around the world. With high profile series such as the PGA, LPGA and European tours to the re-introduction of golf to the Olympics at Rio 2016, golf occupies a prominent place in the global sport community. This is the first book to introduce the fundamentals of golf business and management from a truly international perspective, covering key topics such as media, club management, sponsorship and retail, at elite and non-elite levels. With sections exploring the development of golf on every continent, including North America, South America, Europe, the Middle East, Africa and Asia, this book presents the latest thinking on current issues in golf, ranging from sustainability and innovation to global governance. Each chapter incorporates helpful features for students including learning objectives, discussion questions, guides to further reading, recommended websites and insights from industry voices. This book is essential reading for students of any golf-related degree course or professional accreditation programme, and will also be of interest to those studying or working in sport business, sport management and sport tourism. Underpinned by up-to-date literature, golf researchers will also find the book a useful starting point.

Hidden reality is present in people's lives every day. Perception of its secrets helps one not only to gain experience of living in this world, but also to make a step in the investigation of one's own self... Numerous of so-called people's diseases, sudden depressions, suicide attempts, accidents, murders are the results of the hidden forces activity. In the past, there used to be those who actively opposed them, defending people from the other side of reality. The scales of Good and Evil are in hands of a human. Ezoosmos determines everything.

This book outlines the theory of Neo-Humanism as propounded by the great 20th century think P.R. Sarkar. Neo-humanism is described as humanism expanded to include the entire creation: all varieties of human cultural expressions, and the animal and plant world, even until the inanimate world. This 'new-humanism', rather than being an atheistic concept, recognizes the value of a human beings internal world, and thus bases the inspiration of neo-humanism upon a universal spirituality which is an essential part of the human psyche, although at times unconscious. This inner connection provides the mental expansion, empathy and perception so that will allow human society to live 'neo-humanism' not only in theory but as a real experience integrated into the individual and collective self. The author also clearly and concisely describes the modes by which vested economic and media interests manipulate and distort human thinking, and how this can be combatted through rationality and proper education. This he links in a unique way spirituality, rationality and human emotion. This book offers a unique perspective for anyone interested in sociology, multi-culturalism, anti-speciesism, globalization, anthropology, alternative economics, etc.

**Naturally aspirated Mopar Wedge big-blocks are quite capable of producing between 600 to 900 horsepower.**

**This book covers how to build Mopar's 383-, 400-, 413-ci, 440-ci engines to these power levels. Discussed is how to select a stock or aftermarket block for the desired performance level. The reciprocating assembly is examined in detail, so you select the right design and material for durability and performance requirements. Cylinder heads and valve train configurations are crucial for generating maximum horsepower and torque and this volume provides special treatment in this area. Camshafts and lifters are compared and contrasted using hydraulic flat tappet, hydraulic roller and solid flat tappet cams. Also, detailed engine builds at 600, 700, 800, and 900 horsepower levels provide insight and reveal what can be done with real-world component packages.**

**Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.**

***There has been much opinion and little fact written on the subject of lock picking. It is the purpose of this book to clarify the facts about this delicate process, and at the same time to train you in proper procedure. Reading this book is certainly enough to get you started picking simple locks, but remember: a great deal of time and patience are needed to become a truly proficient locksmith. In this volume, you will learn the fundamental theories of lock picking in addition to proper terminology, the importance of tool design (i.e. how to select and use the right tool for a given job), the effects of tolerances, and finally the techniques most commonly used by locksmiths to successfully pick the vast majority of standard pin and wafer tumbler locks. Lock picking is a useful, engaging, and satisfying skill; with this book and a little determination, you'll be off to a great start.***

***Manufacturing and Design presents a fresh view on the world of industrial production: thinking in terms of both abstraction levels and trade-offs. The book invites its readers to distinguish between what is possible in principle for a certain process (as determined by physical law); what is possible in practice (the production method as determined by industrial state-of-the-art); and what is possible for a certain supplier (as determined by its production equipment). Specific processes considered here include metal forging, extrusion, and casting; plastic injection molding and thermoforming; additive manufacturing; joining; recycling; and more. By tackling the field of manufacturing processes from this new angle, this book makes the most out of a reader's limited***

*time. It gives the knowledge needed to not only create well-producible designs, but also to understand supplier needs in order to find the optimal compromise. Apart from improving design for production, this publication raises the standards of thinking about producibility. Emphasizes the strong link between product design and choice of manufacturing process Introduces the concept of a "production triangle" to highlight tradeoffs between function, cost, and quality for different manufacturing methods Balanced sets of questions are included to stimulate the reader's thoughts Each chapter ends information on the production methods commonly associated with the principle discussed, as well as pointers for further reading Hints to chapter exercises and an appendix on long exercises with worked solutions available on the book's companion site:*

Manufacturing and Design

Foreword by Jerry Seinfeld

A Global Introduction

Alan Spillett is recognised as one of Britain's foremost painters of trucking scenes with over 700 commissions to date. He portrays lorries from the 1960s, '70s and '80s, when he was a long-distance driver, as well as more recent trucks. His paintings are set in exact locations, capturing to the full the experiences of so many drivers. A Volvo easing its way along a Scottish lochside on a summer's day or an ERF setting out on a wet early morning from a factory in Kent - these are strongly evocative images. The paintings are accompanied by full captions describing the context of the pictures. There are longer features on aspects of trucking and truckers, photographs and miscellanea adding up to a fulfilling read. His images range widely through England, Wales, Scotland and Ireland. Alan's first book, Roadscapes, was published in 2005. The paintings in Roadscapes II have not been published in book form before and many have been prepared specially for this new book.
