JMW Turner is one of the greatest artists Britain has ever produced. His watercolours, with their extraordinary effects of shifting light and dramatic skylines, are especially highly regarded. For the first time, the secrets of Turner's technique are revealed, allowing present-day watercolourists to learn from his achievements. This book combines unrivalled knowledge of Turner's working methods from Tate curators and conservators with practical advice from some of the world's most respected watercolour experts. Twenty-two thematic exercises are illustrated with Turner's works. Expert contemporary watercolourists explain, step-by-step, how to paint a similar composition, learning from Turner's techniques. Packed with invaluable information, from the materials Turner used to achieve the masterpieces we know and love today, to the modern materials the twenty-first-century watercolour artist will need. Backed by the authority of Tate, the world centre for Turner scholarship, with a glossary of technical terms, this is an invaluable resource both for lovers of Turner's art and of watercolour painting.

This book provides young scientists, from physicists through to sociologists, the counsel and tools that are needed to be their own agents and planners, to survive and succeed, hopefully even thrive in science. Making a good career based on peer-reviewed science means navigating many stressful phases from graduate school through to permanent employment. Performing artists pay agents to help them in this effort. In effect, this book is designed to allow you to act as your own agent. You are counseled to analyze yourself deeply to know clearly what you want and whether you can live with it, how to make career choices and what you should then keep in mind, when to fight and when to yield. The unwritten rules of the "science game" are explained, including how to become published and known, the pitfalls of peer review and how to evade them, papers and posters, job interviews and getting your science funded. Interspersed with this are illustrative anecdotes and a fair amount of humor. While the book is aimed at young scientists, from graduate students and beyond, more senior scientists will benefit from seeing the world from the point of view of rising scientists and become aware of the preoccupations of people in a system which has changed much from when the present senior scientists were rather younger.

To enjoy woodworking, all you need is a few essential tools, a little bit of space, and the desire to make something with your own two hands. The Minimalist Woodworker is about making woodworking clean and simple--from the tools and the workspace to the easy-to-follow instructions. Woodworking is thriving in the hands-on, DIY, maker world we currently live in. Yet, for it's

increasing popularity, there are many crafters who don't engage in woodworking because they falsely believe you need a large workshop and a full-blown collection of tools and equipment. The Minimalist Woodworker disproves this myth. It eliminates the fears and excuses as it demystifies the craft. Written by Vic Tesolin, aka the Minimalist Woodworker, a woodworker and woodworking instructor, The Minimalist Woodworker is a stress-free approach for the hobbyist that emphasizes the destination is actually the journey. Beginning with an understanding of the minimalist mindset, The Minimalist Woodworker quickly details how to make a small space productive and outlines the most efficient tools for a woodworker. Each piece of equipment is explained and instructions on how to use are provided. Techniques for keeping them sharp and maintained are also explained. Once space and tools are covered, seven projects are presented: a saw bench and matching saw horse, a Nicholson-style workbench, a shooting board/bench hook, a shop mallet, and a small hanging cabinet. Each project not only develops woodworking skills, but also outfits the minimalist woodworker's small shop. With step-by-step instruction, photos and illustrations, and an easy-going voice, The Minimalist Woodworker offers a stress-free point of entry into the life-long craft of woodworking.

The monograph reflects the current standard of knowledge about the open questions considered, taking care to collect and collate all the relevant ideas, facts and formulae which have been until now widely scattered throughout the literature. For the first time, these aspects are collated in book form. Care is taken to clarify the issues, give a systematic collection of conditions which prospective solutions of these open questions have to meet, and gather and collate various useful theoretical concepts and results. The Minimalist Woodworker

The Satires of Juvenal Paraphrastically Imitated, and Adapted to the Times. With a Preface. [By Edward Burnaby Greene.]

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

First published in February 1936, just under a year from when the idea for it was first discussed, this is one of the most important and influential anthologies of the twentieth century. Since then three further editions by, in succession, Anne Ridler, Donald Hall and Peter Porter have been published. All took as their kernel the original selection by Michael Roberts. This "Faber Finds" reissue restores that pristine selection. More likely than not, the original idea was T. S. Eliot's, the choice of editor was undoubtedly his, and it was an inspired one. Michael Roberts was a poet himself, and a good one, but more important for this task was his acute awareness of the poetry scene, and his sense of the modern movement within it. Yes, his purpose was tendentious. He excludes some poets he admires such as Edmund Blunden and Walter de la Mare because (they) 'seem to me to have written good poems without having been compelled to make any notable development of poetic technique.' On the other hand, 'I have included only poems which seem to me to add to the resources of poetry, to be likely to influence the future development of poetry and language . . .' From the very start (and could there be a more arresting one?) with Gerard Manley Hopkins' "The Wreck of the Deutschland" Michael Roberts powerfully and consistently fulfils that aim. Philip Hobsbaum, in "The Oxford Companion to Twentieth-Century Poetry," says of "The Faber Book of Modern Verse," 'it also encapsulates, as no other literary document quite does, the innovative quality of the 1930s.'

Marginalised Communities in Higher Education

How to Paint Like Turner

"Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--
