History of the Arabs, Revised

*After World War II, leading western powers focused their attention on fighting the "Red Menace," Communism. Today, as terrorist activity is increasingly linked to militant Islamism, some politicians and scholars fear a "Green Menace," a Pan-Islamic totalitarian movement fueled by monolithic religious ideology. Such fears have no foundation in history, according to Vartan Gregorian. In this succinct, powerful survey of Islam, Gregorian focuses on Muslim diversity and division, portraying the faith and its people as a mosaic, not a monolith. The book begins with an accessible overview of Islam's tenets, institutions, evolution, and historical role. Gregorian traces its origins and fundamental principles, from Muhammad's call to faith nearly 1,400 years ago to the defeat of the Ottoman Empire in World War I, and the subsequent abolition of the Caliphate. He focuses particular attention on the intense struggle between modernists and traditionalists, interaction between religion and nationalism, and key developments that have caused bitter divisions among Muslim nations and states: the partitions of Palestine, the break up and Islamization of Pakistan, the 1978 revolution in Iran, and the 1979 Soviet invasion of Afghanistan. Today Islamist views range across the entire spectra of religious and political thought, and Islamism is anything but a unified movement. While religious extremists have attempted to form a confederacy of like-minded radicals in many countries, much of the Muslim population lives in relatively modern, secular states. Gregorian urges Westerners to distinguish between activist Islamist parties, which promote--sometimes violently--Islam as an ideology in a theocratic state, and Islamic parties, whose traditional members want their secular political systems to co-exist with the moral principles of their religion. Gregorian emphasizes the importance of religion in today's world and urges states, societies, and intellectuals to intervene in order to prevent Islam--as well as other religions--from becoming the political tool of various parties and states. He recommends continuing dialogues between modernist and traditionalist Muslims, as well as among the educated, secular elite and their clerical counterparts. He also urges U.S.-led efforts to engage and better understand the diversity of Muslim communities in the United States and the world. Lamenting widespread U.S. ignorance of the world's fastest-growing religion, Gregorian calls on "enlightened citizens" to promote international understanding, tolerance, and peace.*

This book is one of the many Islamic publications distributed by Ahlulbayt Organization throughout the world in different languages with the aim of conveying the message of Islam to the people of the world. Ahlulbayt Organization is a registered Organisation that operates and is sustained through collaborative efforts of volunteers in many countries around the world, and it welcomes your involvement and support. Its objectives are numerous, yet its main goal is to spread the truth about the Islamic faith in general and the Shi'a School of Thought in particular due to the latter being misrepresented, misunderstood and its tenets often assaulted by many ignorant folks, Muslims and non-Muslims.

The relationship between the Christian and Muslim worlds has been a long and tortuous one. Over the course of the centuries the balance of power has swung in pendulum fashion at times the initiative seems to have lain with the Muslim community, with the Christian world simply being compelled to react to developments outside itself, while at other points the opposite has been true and Muslims have found themselves having to respond to Christian challenges in different forms. Today Christians and Muslims comprise the world's two largest religious communities. Although they can coexist fairly peacefully, at times they still engage in violent confrontation, such as in the recent conflicts in Bosnia and the Sudan. This book investigates the history of the relationships between Christians and Muslims over the centuries, from their initial encounters in the medieval period, when the Muslims were the dominant group, through to the modern period, when the balance of power seems to have been reversed. This much-needed overview of the Christian-Muslim encounter places the emphasis on the context within which perceptions and attitudes were worked out and provides a depth of historical insight to the complexities of current Christian-Muslim interactions on different continents."
