Is conversational Dutch turning a little too tricky for you? Do you have no idea how to order a meal or book a room at a hotel? If your answer to any of the previous questions was 'Yes', then this book is for you! If there's even been something tougher than learning the grammar rules of a new language, it's finding the way to speak with other people in that tongue. Any student knows this - we do our best at practicing, but you always want to avoid making embarrassing mistakes or not getting your message through correctly. 'How do I get out of this situation?' many students ask themselves, to no avail, but no answer is forthcoming. Until now. We have compiled MORE THAN ONE HUNDRED conversational Dutch stories for beginners along with their translations, allowing new Dutch speakers to have the necessary tools to begin studying how to set a meeting, rent a car or tell a doctor that they don't feel well. We're not wasting time here with conversations that don't go anywhere: if you want to know how to solve problems (while learning a ton of Dutch along the way, obviously), this book is for you! How Conversational Dutch Dialogues works: - Each new chapter will have a fresh, new story between two people who wish to solve a common, day-to-day issue that you will surely encounter in real life. - An Dutch version of the conversation will take place first, followed by an English translation. This ensures that you fully understood just what it was that they were saying. - Before and after the main section of the book, we shall provide you with an introduction and conclusion that will offer you important strategies, tips and tricks to allow you to get the absolute most out of this learning material. - That's about it! Simple, useful and incredibly helpful: you will NOT need another conversational Dutch book once you have begun reading and studying this one! We want you to feel comfortable while learning the tongue: after all, no language should be a barrier to you to travel around the world and expand your social circles! So look no further! Pick up your copy of Conversational Dutch Dialogues and start learning Dutch right now!

Whether it's our choice of a new car or what we think about our neighbours, our opinions and attitudes are a way of negotiating the world around us. The Psychology of Influence explores how these preferences and behaviours are influenced and affected by the messages we receive in daily life. From consumer choices to political, lifestyle and financial decisions, the book examines how and why we may be influenced by a range of sources, from written text and television to social media and interpersonal communication. In a field that has fascinated scholars since Plato, the book addresses the key questions across cognitive, social and emotional domains: When do arguments become persuasive? What influence do role models have? What role do simple rules of thumb, social norms or emotions play? Which behaviours are difficult to influence, and why? Covering topics from attraction, prejudice and discrimination to reward, punishment and unconscious bias, The Psychology of Influence will be invaluable reading for students and researchers across a range of areas within applied and social psychology, as well as those in political science, communications, marketing and business and management.

"Dazzling...Critics hailed Buwalda as 'The Dutch answer to Jonathan Franzen', but his brilliance is entirely unique."--The Times (UK) Siem Sigerius is a beloved, brilliant professor of mathematics with a promising future in politics. His family—including a loving wife, two gorgeous, intelligent stepdaughters and a successful future son-in-law—and carefully appointed home in the bucolic countryside complete the portrait of a comfortable, morally upright household. But there are elements of Siem's past that threaten to upend the peace and stability that he has achieved, and when he stumbles upon a deception that's painfully close to home, things begin to fall apart. A cataclysmic explosion in a fireworks factory, the advent of internet pornography, and the reappearances of a discarded, dangerous son all play a terrible role in the spectacular fragmentation of the Sigerius clan. A riveting portrait of a family in crisis and the ways that even the smallest twists of fate can forever change our lives, Bonita Avenue is an incendiary, unpredictable debut of relationships torn asunder by lies, and minds destroyed by madness.

After his debut in 1964 the Belgian painter, Raoul De Keyser (1930-2012) developed a working method that was as obstinate as it was tactical, in which the common distinctions between abstraction and figuration dissolve in the poetic binding of the work with the everyday.This catalogue to the first posthumous retrospective exhibition is conceived as a classic monograph on the life and work of the artist.Alongside a detailed account of the development of Keyser's oeuvre, the catalogue contains an comprehensive illustrated chronology as well as, for the first time, a chapter on drawing and photography.Equally interesting are quotes by artists such as Tomma Abts, Maria Eichhorn, Thomas Scheibitz and James Welling (among others) about their influential colleague.Published on the occasion of the exhibition, Raoul De Keyser: Oeuvre at Stedelijk Museum voor Actuele Kunst (S.M.A.K.), Gent in 2018/19, and Pinakothek der Moderne, Munich in 2019.

Although research on business model innovation is flourishing internationally, many important questions on the 'how', 'what', and 'when' of this process remain largely unanswered, particularly in regard to the role of top management. This book answers some of those pressing questions by taking a deliberately managerial perspective. Based on new and original findings derived from a survey among firms from various industries, and several case studies (including DSM, NXP Semiconductors, Randstad, and TomTom), the authors provide new insights into how and when managers can change a firm's business model. They turn their attention particularly to one key question: is it better to replicate existing models or develop new ones? Business model renewal is regarded as being especially vital in highly competitive environments. Nonetheless, whatever the environment, high levels of both replication and renewal will be key for a firm to succeed. The book looks at four levers that can be used by managers to innovate their business model: management itself, organizational structure, technology, and co-creation with external parties. It discusses the individual effects of these levers on business model replication and renewal. It also analyses specific combinations that strengthen business model innovation, including those which are technology oriented, internally oriented, externally oriented, and those which combine all of the levers in an integrated way.

Hot and Smoky Shrimp Tacos, Roasted Wild Mushroom Tacos with Queso Fresco, Fire-Roasted Corn and Poblano Chile Tacos-these are a few of the most taste-tempting tacos you'll ever put in your mouth. And what to top them with-of course, it must be the perfect salsa!

When he disappears on a cruise, a woman discovers her husband's secret life in this international-best-selling thriller from a sensational Dutch author. Frank and Helen's anniversary cruise is going perfectly, until the unthinkable happens and Frank disappears. Helen does everything she can to find her husband, but is ultimately forced to return home, alone and distraught. After spending the next few months searching, Helen hears from someone who has news of her husband. But not the news she hoped for: Helen learns that Frank was leading a double life. It becomes increasingly apparent that the man she married had a dark side Helen could never have imagined. Suzanne Vermeer, the bestselling mystery writer in the Netherlands, spins this story with unparalleled suspense.

The humanities include disciplines as diverse as literary theory, linguistics, history, film studies, theology, and philosophy. Do these various fields of study have anything in common that distinguishes them from, say, physics or sociology? The tripartite division between the natural sciences, the social sciences and the humanities may seem self-evident, but it only arose during the course of the 19th century and is still contested today. History and Philosophy of the Humanities: An Introduction presents a reasoned overview of the conceptual and historical backgrounds of the humanities. In four sections, it discusses: - the most influential views on scientific knowledge from Aristotle to Thomas Kuhn; - the birth of the modern humanities and its relation to the natural and social sciences; - the various methodological schools and conceptual issues in the humanities; - several themes that set the agenda for current debates in the humanities: critiques of modernity; gender, sexuality and identity; and postcolonialism. Thus, it provides students in the humanities with a comprehensive understanding of the backgrounds of their own discipline, its relation to other disciplines, and the state of the art of the humanities at large.

The Fourth Edition reflects the latest scholarship while placing special emphasis on the theme of war and society. A new full-color design features a completely redrawn map program and new pedagogical and teaching tools.

Seventeen years after fleeing the revolutionary Ethiopia that claimed his father's life, Sepha Stephanos is a man still caught between two existences: the one he left behind, aged nineteen, and the new life he has forged in Washington D.C. Sepha spends his days in a sort of limbo: quietly running his grocery store into the ground, revisiting the Russian classics, and toasting the old days with his friends Kenneth and Joseph, themselves emigrants from Africa. But when a white woman named Judith moves next door with her only daughter, Naomi, Sepha's life seems on the verge of change...

For the First Time in English, a Foundational Work of One of the Church's Most Important Theologians As some point in life, we all wonder: Who am I? What is the world, and what is my place within it? Only Christianity offers answers to these questions in a way that meets our truest needs and satisfies our deepest longings. In this important book, translated into English for the first time, Herman Bavinck provides a framework for understanding why the Christian worldview is the only solution to the discord we feel between ourselves, the world, and God.

Rebecca M. Warner's bestselling Applied Statistics: From Bivariate Through Multivariate Techniques has been split into two volumes for ease of use over a two-course sequence. Applied Statistics II: Multivariable and Multivariate Techniques, Third Edition is a core multivariate statistics text based on chapters from the second half of the original book. The text begins with two new chapters: an introduction to the new statistics, and a chapter on handling outliers and missing values. All chapters on statistical control and multivariable or multivariate analyses from the previous edition are retained (with the moderation chapter heavily revised) and new chapters have been added on structural equation modeling, repeated measures, and on additional statistical techniques. Each chapter includes a complete example, and begins by considering the types of research questions that chapter's technique can answer, progresses to data screening, and provides screen shots of SPSS menu selections and output, and concludes with sample results sections. By-hand computation is used, where possible, to show how elements of the output are related to each other, and to obtain confidence interval and effect size information when SPSS does not provide this. Datasets are available on the accompanying website. Do you know what the hardest thing for a Dutch learner is? Finding PROPER reading material that they can handle...which is precisely the reason we've written this book! Teachers love giving out tough, expert-level literature to their students. Books that present many new problems to the reader and force them to search for words in a dictionary every five minutes - it's not entertaining, useful or motivating for the student at all, and many soon give up on learning at all! In this book, we have compiled 20 easy-to-read, compelling and fun stories that will allow you to expand your vocabulary and give you the tools to improve your grasp of the beautiful Dutch tongue. How Dutch Short Stories for Beginners works: - Each story is exciting and entertaining with realistic dialogues and day-to-day situations. - The summaries follow a synopsis in Dutch and in English of what you just read, both to review the lesson and for you to see if you understood what the tale was about. - At the end of those summaries, you'll be provided with a list of the most relevant vocabulary involved in the lesson, as well as slang and sayings that you may not have understood at first glance! - Finally, you'll be provided with a set of tricky questions in Dutch, providing you with the chance to prove that you learned something in the story. Don't worry if you don't know the answer to any - we will provide them immediately after, but no cheating! We want you to feel comfortable while learning the tongue: after all, no language should be a barrier for you to travel around the world and expand your social circles! So look no further! This book describes a process framework for business information management: the Business Information Services Library (BiSL®) – a public domain standard that is consistent with the IT Infrastructure Library (ITIL) and Application Services Library (ASL). BiSL establishes a bridge between IT and business processes, and between business information administrators and information managers. The BiSL process model provides an insight into all of the primary processes within their field of operations and into the relationship between the various processes. It offers a starting point for the improvement of these processes using best practices, amongst other things, and it provides uniform terminology. This book explains BiSL, a process framework for business information management, encompassing the best way to manage and execute business information management in day-to-day practice, and explains how the framework BiSL can help to improve business processes and the alignment of business and IT. Whether they're threading a barrel or shredding a swell, these amazing women are making enormous waves in the world of surfing. If you thought surfing was a male-dominated sport, think again. The thirty women surfers profiled in this thrilling collection can rip a wave with the best of them. Hailing from all over the world, each surfer is featured in spectacular photography and with their own inspirational words. There's American professional surfer Lindsay Steinriede on how her father's death has inspired her career; French board shaper Valerie Duprat on how she got her start "sculpting foam"; Conchita Rossler, founder of Mooana Retreat in Portugal, on connecting mind, body, and spirit; and Australian photographer Cait Miers on empowering women. You'll also meet surfers who are over sixty, who surf while pregnant, who captain boats, teach yoga, and make movies. Breathtaking photography captures these women from every angle, on and off the waves, in some of the world's most visually stunning locations. The perfect gift for surfing enthusiasts, this unique compilation of stunning pictures and hard-won wisdom proves that the thrill of catching a wave, riding it, and kicking out belongs to everyone.

'You can learn from your failures.' **'Entrepreneurship is trial and error.'** These statements are hard to disagree with, but in reality it is not that simple. More than ever, we wish to be successful and erase all traces of mistakes and failures as soon as possible. This is not only a pity, but potentially dangerous as well, says professor Paul Louis Iske. Only when we dare to face what we do wrong can we make a thorough analysis and avoid unnecessary recurrence and disappointments. Fear of failure impedes creative thinking and innovation. This compelling book shows you how to develop a culture of openness in your organization and how failure paradoxically leads to significant progress. Institute of Brilliant Failures teaches you how to recognize recurring failing patterns at an early stage, how to harvest essential learnings and how to embrace uncertainty. Paul Louis Iske is professor of Open Innovation and Business Venturing at the School of Business and Economics, Maastricht University (the Netherlands) and Extraordinary Professor of Knowledge Management at Stellenbosch University (South Africa). He is Chief Failure Officer (CFO) at the Institute of Brilliant Failures, and a sought-after international consultant in the areas of innovation, sustainable business models, creativity and knowledge management.

Continuing on to the electronic revolution, Martin's account takes in the changes wrought on writing by computers and electronic systems of storage and communication, and offers surprising insights into the influence these new technologies have had on children born into the computer age. The power of writing to influence and dominate is, indeed, a central theme in this history, as Martin explores the processes by which the written word has gradually imposed its logic on society over four thousand years. The summation of decades of study by one of the world's great scholars on the subject, this fascinating account of writing explains much about the world we inhabit, where we uneasily confer, accept, and resist the power of the written word.
