The Decisive Battles of India

The Decisive Battles of the Western World, and Their Influence Upon History:

From the defeat of the Spanish Armada, 1588, to the Battle of Waterloo, 1815

In this stimulating and original investigation of the decisive battles of the English Civil War, Malcolm Wanklyn reassesses what actually happened on the battlefield and as a result sheds new light on the causes of the eventual defeat of Charles I. Taking each major battle in turn - Edgehill, Newbury I, Cheriton, Marston Moor, Newbury II, Naseby, and Preston - he looks critically at contemporary accounts and at historians' narratives, explores the surviving battlegrounds and retells the story of each battle from a new perspective. His lucid, closely argued analysis questions traditional assumptions about each battle and the course of the war itself.

Spanning two and a half thousand years of warfare, from Salamis, where the Greeks put an end to Persian attempts to overwhelm their country, through the Battle of Hastings and the fall of Constantinople to the key engagements in the World Wars: Midway, El Alamein and Stalingrad right up to Operation Desert Storm, *Battles that Changed History* is a stimulating and lively account of fifty decisive battles that, either as a result of victory or defeat, have had a long-term impact on the course of world history. With the aid of numerous maps and illustrations military expert Geoffrey Regan not only examines the background and consequences of each battle, but also vividly re-creates the actual fighting, analyses the tactics and profiles key commanders and weaponry. *Battles that Changed History* provides an informative look at the military engagements that have shaped the modern world and will appeal to both the military history enthusiast and the general reader alike.

Their Influence Upon History and Civilisation

Waller, Essex, Fairfax, Manchester and Cromwell are among the most famous military men who fought for Parliament during the English Civil War. While their performance as generals has been explored in numerous books on the campaigns, comparatively little has been written by military historians about the political aspects of high command, namely the ever-changing and often fractious relationship with the English Parliament and its executive committees. That is why Malcolm Wanklyn's study of these men is of such value, for he sheds new light on the qualities they employed in their attempts to achieve their military and political aspirations. In a series of insightful chapters he follows their careers through the course of the conflict, focusing on their successes and failures in battle and the consequences for their reputations and influence. Dissatisfaction with the leadership of Essex, Manchester and Waller in the inconclusive early campaigns is examined, as are the contrasting strengths of Fairfax and Cromwell. This reassessment sheds new light on how these commanders managed promotions, outmaneuvered their fellow generals and controlled their

subordinates.

Famous and Decisive Battles of the World ; the Essence of History for 2500 Years

Decisive British battles, from 'The fifteen decisive battles of the world'

The author "threads various geographical, logistical, and psychological factors into a colorful, realistic report" of 15 historic battles. Includes maps.

The British Raj at its height measured almost 2 million square miles of territory and counted more than 200 million people among its citizens. This land was truly the 'Jewel' of the British Empire, however the path to this dominance was punctuated by fierce and bloody fighting by the British and her Indian allies against numerous, native Nawabs, Princes and leaders across the patchwork kingdoms of India. These battles most often featured small numbers of British and sepoy troops facing off against huge numbers of Indian troops, where the fate of the Empire hung in the balance. Colonel Malleson uses his expert knowledge of India and his long military career there to survey and recounts the battles that shaped what would become the British Raj. The author obtained a cadetship in the Bengal infantry at the tender age of 17 in 1842, he served in India for over three decades in both military and civil appointments. He wrote many famous volumes on India and the country's history; perhaps most famous of which were History of the Indian Mutiny, 1857-8, Akbar And The Rise Of The Mughals and History of the French in India.
