

## Delayed Entry Program Guide To Success

*The lagging economy getting you down? No jobs out there, no job prospects? Join the Army. Or the Navy. Or the Marines. Or the Air Force. Good pay, great benefits -- an excellent career opportunity. -- This book will teach you how to tweak the system to help you enjoy the fullest benefits the U.S. Military has to offer. -- What little competition there is for this title is several years old and virtually obsolete. Uncle Sam Wants You -- more than ever. Since the tragic events of 9/11, all branches of the U.S. Military have seen a rise in enlistments. This is due to several factors: 1) A renewed sense of patriotism, and 2) a cooling off of the economy and subsequent recession. Suddenly, job opportunities for recent high school and college grads are drying up quickly. That's why a career in the Army, Navy, Air Force, Marines, or even the Coast Guard, may be an excellent option. Author Bill Harris, working closely with recruiters from branch of the military, will detail the intricacies of getting the most out of a military career and discuss which branch of the military might be best for you. He'll explore age limits, guaranteed training, bonuses and benefits, and even the rigors of basic training. He'll also cover the many perks offered by a career in the military, and how best to obtain them.*

*This book is a compendium of the attitude of the United States Armed Forces toward the conscientious objector (C.O.). It includes the portions of US military and Selective Service regulations that deal with the C.O. Included is the procedure for the C.O. to acquire a release from military service and what he should expect in the process. Also in case of a future conscription, the procedure to acquire an exemption as a C.O. is provided along with the requirement of alternative service. Also provided are a sample copy of the US Army and Selective Service forms that deal with acquiring an exemption or discharge from military service. The author, Daniel H. Shubin, has been an advisor 25 years for young people facing the decision of military service. He was a conscientious objector during the Viet-Nam War and performed alternative service. Shubin has also written several books on Christian church history, Bible interpretation, and a book on Christian pacifism.*

*When many Americans hear that the US may go to war against another nation, they tend to believe there's probably a good reason for it or that no viable alternatives exist or they don't think about it at all. They trust their leaders to represent them and defend their values. They accept their leaders' claims that war is to ensure their safety when others wish to harm them.The parties of war play on Americans' basic values to bring them online. The media reassures them that the reasons for war are altruistic that Americans wish to spread democracy and allow others to adopt their way of life. But is this the case? With 24 compelling illustrations, maps and graphs, this book is intended to serve as a tool for peace advocacy. Well known peace advocates respond to 19 of the most common illusions held by the American public which weaken their opposition to Washington's wars. The American way of war offers a nonstop supply of illusions—while imposing horrific realities far away and, ultimately, at home too. This book is intent on dispelling key illusions and coming to terms with human realities. Between the covers of American Wars, the result is a compendium of insights and hard-won knowledge of the sort you'll rarely find in the daily paper or the evening news. The writers are myth-busters who challenge the conventional lack of wisdom that drags the United States into one war after another and keeps us lethally mired in a warfare state. This collection provides us with an array of vital perspectives, opening up a crucial topic that usually remains shut down--what American wars are doing to humanity, under false pretenses and with calamitous results, around the world and in our own neighborhoods. The future is at stake. This book helps us to understand the perils and opportunities of the present moment. --NORMAN SOLOMON, author of War Made Easy*

This monograph examines the relationship between recruiting practices and conditions and the first-term success of Army soldiers. Success in the first term is important to the Army because recruiting soldiers is expensive. If soldiers fail to complete their first terms, the Army must recruit others to replace them, effectively doubling the cost. Given the expense of recruiting, the Army should reassess whether some management strategies could improve the success rates for first-term soldiers. Events in a soldier's first term that show a statistically significant relation to early loss include length of time in the Delayed Entry Program, gender (women have consistently higher rates of attrition at each stage of the first enlistment), and education (soldiers without high school diplomas drop out at an increased rate beginning with advanced individual training). Attrition can also vary depending on the training installation, but high loss rates during basic training have no effect on subsequent attrition. Thus, it does not appear that applying higher standards in basic training reduces subsequent attrition in the enlistment cohort. All other things being equal, soldiers in combat arms have higher attrition rates than do those in other occupations. Finally, promotion correlates positively with retention. Equally interesting are the influences that do not appear to make a major difference. These include participation in the Army College Fund, term of enlistment, the recruiting environment, and characteristics of recruiters. Recommendations include shorter time in the Delayed Entry Program for high school seniors, a revisiting of the fitness training unit concept, and imposition of consistent training standards and policies. The monograph also recommends exploring policies to help at-risk demographic groups such as women and recruits who hold GEDs, as well as a review of the promotion program to ensure that the most able soldiers are getting promoted.

The Navy's Delayed Entry ProgramA Study of the Effectiveness of Preparing Recruits for Basic Training

In FY-97, over 14 percent of all recruits who entered basic training attrited and nearly one-third of these were due to motivational problems. Could adequate training in the Navy's Delayed Entry Program (DEP) provide the necessary tools to prepare recruits for basic training and reduce attrition? This thesis examines the DEP's effectiveness in preparing recruits for basic training. It examines how well the recruits were prepared; the types of training conducted; how effectively the recruits perceived their training to be while in the DEP; use of the DEP Personnel Qualification Standards (POS); DEP meetings; and required recruiter/recruit weekly contact. Recruits at basic training were surveyed on various questions that pertained to their time in the DEP. The findings showed that training is not being conducted in the DEP. DEP PQS is not utilized as a primary training guide. Over one-third of the recruits sampled indicated that they were not told what to expect at basic training. Finally, over one-third of the recruits felt that the DEP did not prepare them for basic training. Recommendations were made to improve training in the DEP.
